

A Sugar Beet Factory For Lakeview

President Martin Asks for Data to Insure This Town The Best Thing in Oregon

Such an Enterprise Means a Million Dollar Investment Here

Now is The Time for Every one Here to Get Busy

Everyone should know what the establishment of a beet sugar factory means to a town, and the tributary country and especially when you can almost count the factories for that purpose on the fingers of one's right hand.

Best quality with a high sugar content. The climate also is perfect for beet production. The fact, further, that the efforts of the Oregon Valley Land Co., are to give this valley ample water for purposes of irrigation, making possible the cutting up of these broad, fertile lands of the golden Goose Lake valley into small holdings, so that intensive farming can be done by the family of each holder, all conclusively show that

Postoffice for the Hoag Mines

The establishment of such a factory at Lakeview alone would mean an increase of our population by several thousand, which in turn would mean increased business and prosperity for every resident. Its coming would also mean early construction of rail roads, radiating from Lakeview as a center. The benefits to be derived would be well high inculcated for Lakeview and the tributary country.

Its coming would also mean early construction of rail roads, radiating from Lakeview as a center. The benefits to be derived would be well high inculcated for Lakeview and the tributary country.

A Reported Certain Cure for Pneumonia In Its Worst Stages

The following has come into our hands, and knowing the terrible death rate due to pneumonia, which seems to buffet most expert medical skill, The Examiner publishes it for the benefit of our readers, feeling that it at least is worthy of a trial:

What prompted me to give this to the world? A friend of mine, Professor Henry P. Loomis, professor of medicine at Cornell University, who died with pneumonia last Christmas, and all his associates' knowledge could not save him; hence my warning and advice, and I hereby challenge any doctor in the United States to come forward and contradict me, I am ready to defend this remedy as an absolute cure for pneumonia, even in the last stage.

Editor: Will you please give me space in your paper for the following most valuable information:

I have sent this prescription to the Stanford University, the Northwestern College of Medicine (Chicago), Cornell University of New York, and to numerous other places, even across to England, to some of the most prominent men there.

THAT NOBODY NEEDS TO DIE OF PNEUMONIA.

Saturate a ball of cotton as large as a one-inch marble, with spirits of alcohol, add three drops of chloroform to each ball of cotton, place it between the patient's teeth, and let him inhale the fumes in deep long breaths for fifteen minutes; then, rest for fifteen minutes, or longer, if needed; then inhale again for fifteen minutes, and repeat the operation, as directed, for twenty four times, and the result will be that the lungs will expand to their normal condition, and in twenty four hours the patient is out of danger, and in forty eight hours he is cured—although weak.

Why do they let people die of pneumonia when the following simple remedy has saved not only myself but all who have had a chance to use it? In Worcester, Mass., Alaska, Seattle, Goldfield, Pasadena, and Los Angeles—at all these places it has been tried with unflinching effect.

Change cotton often. Doctors, try it, and use it for humanity's sake and the public for your own welfare. Cut this out it may come handy some time.

During my stay in Pasadena last winter, I read in the Los Angeles papers of deaths from this sneaking, dreaded disease called pneumonia, from two or three and up to five every twenty four hours. At last, on the 7th of February, 1908, I went to Los Angeles and got the prescription inserted in four of the Los Angeles daily papers. The public read it the 8th of February, and what a chance. From the high death rate during the winter and before that day, it stopped suddenly. The daily papers recorded only one death a day of pneumonia, and most all the victims were infants less than one year old.

MARRIUS A. REDDING, A Student of Human Nature, 921 McArthur St., S. F.

What was the cause of this sudden change? Let me tell you. It was this simple remedy, discovered by me fourteen years ago. It can be had at any drug store for 25 cents.

Stock Stealing in Klamath Causing Trouble

The Merrill Record, 14th inst says: Not since the late eighties has there been so much excitement in the Klamath country over cattle and horse stealing as at the present time. No trace has been found of Welch who consigned a carload of stolen horses to E. Stewart and Co., of San Francisco. The horses were found to belong principally to Henry Vinson of Langell Valley, and Mr. Vinson has since sold his reclaimed stock to California buyers, leaving Stewart several hundred dollars loser. If the court does not do something in the very near future with these thieves, there is great

danger of the stockmen taking summary vengeance for their losses. Since the above was put in type Welch has been captured and is now awaiting trial. It is believed it will implicate and expose the entire gang of thieves.

Helen Had Ambitions
Helen, aged six, was telling Mary, aged seven, of her plans for the future. "I'm going to be married," she announced, "and have eighteen children."
"Oh," gasped Mary, her eyes wide with amazement, "you marry a wretch!"—The February, Delineator.

There can be no better locality for a beet sugar factory than right here. Even those who are planning to put in orchards, while awaiting the bearing period, can devote the land between the trees to beet production with profit, thus affording means of livelihood for themselves and families.

President Martin, submitted below, and then to take pains to forward him all data and particulars relating to the subject that is possible to be obtained. The securing of a beet sugar factory means one of the biggest things in Oregon, with Lakeview and its people the chief beneficiaries. Viewed from this standpoint the little asked for by Mr. Martin, should be promptly sent him:

Kansas City, Mo., Jan. 14, 1909.
Fred J. Bowman,
Editor Lake County Examiner,
Lakeview, Ore.
Dear Sir:
We have a letter from the Dyer Co., builders of sugar works with headquarters at Cleveland, Ohio, in regard to building of a sugar beet factory at

Lakeview. Our negotiations have gotten to the point that it is necessary to furnish them with data concerning the growth of sugar beets in Goose Lake valley. If we can show them that sugar beets can be grown in Goose Lake Valley, and that when

grown these beets contain the proper qualities for making sugar, a sugar beet factory in Lakeview is assured. We know of no better way to get this information than for you, through the columns of your paper, to ask the citizens of Goose Lake valley for such information as they may have on this subject. This is a splendid opportunity for the people of Goose Lake valley to secure a splendid industry. The Dyer Co. is one of the strongest Companies, financially, in the business. We ask the citizens of Lakeview and Lake Co. to assist us in securing this enterprise by giving us such information as they may have on the subject.
Very truly yours,
Oregon Valley Land Co.
R. J. Martin.

Gigantic Timber Lana Frauds Uncovered in Idaho and Oregon

WASHINGTON, January 19.—Starting information of alleged outstanding lands upon the public lands has come into the possession of Secretary Garfield through special agents. The allegation is made that approximately \$100,000,000 worth of land in States principally west of the Mississippi River have been fraudulently acquired within the last two years by corporations and individuals.

OUR NEIGHBORS SEEKING A BOOM

The Alturas Republican says: Article of incorporation of the Alturas Real Estate and Mining Exchange, were filed in the clerk's office. This company has just been organized and is composed of a number of our solid, substantial, business men whose object is the betterment and the up-building of Alturas and Modoc county. The officers of the incorporation are B. Laner, President; J. E. Niles, Vice President; S. R. Ranch, Secretary; and Louis Shaw, Treasurer. Lakeview should bestir itself in a similar way.

Frozen and Drowned On a "Pleasure Exertion," Home at Last

A. L. Thornton, C. D. Arthur, Dr. Boyd, and Pete Grob arrived home Tuesday from their trip to the Willamette valley. It took them four days with four horses on a light coach to make the trip from Klamath Falls, only 130 miles. At times they were plunging through huge snow drifts, and other times were busy singing "A Life on the Ocean Wave," in a sea of slush and mud.

people visiting there got a rest for a while from their importunities. Since their trip the Golden Goose Lake valley looks exceedingly good to the boys and they all say they will never care to roam to other parts again—at least not in the winter time.

Altitudes and Distances in This Vicinity

Hon. C. U. Sulder has given The Examiner the following table of distances and altitudes, which are the official figures of the U. S. Government and were made by Lieut. F. W. Simons, of the U. S. engineer and civil engineer corps.

Distances	Miles
Alturas to Willow Ranch	34 84-100
Willow Ranch to State Line	7 7-8
State Line to Lakeview	15 45-100
Lakeview to Camas Prairie	10
Camas Prairie to Drake's camp	15 52-00
Drake's Camp to Jones' Ranch	16 68-100
Prineville to Lakeview	181 9-100
Altitude	Feet
Alturas	4663
Goose Lake	4697
Lakeview	4825
Drews Valley	4953

Very Much Exaggerated
It was reported that Geo. Penland, of Eagleville, over the line in California had died. But upon his walking into the Alturas Republican office, hale and hearty, the editor says: "The report of his death was very much exaggerated."

Hoag Gold Miners are Sacking Ore Good For \$1,000 a Ton!

The Fort Bidwell Gold Nugget, of the 21st says: By careful study and diligent labor the Consolidated managers are fast placing their mining properties in line for the title of as great producers as there are in the north. The ledge upon which work is being prosecuted so vigorously is about three feet wide and increasing rapidly, the pay schute which consists of decomposed quartz is very rich and will assay one thousand dollar per ton or better. The vein is in place and no doubt exists as to quality. At present the force of miners are taking out from fifteen to twenty sacks of this grade of ore each day. The second grade ore taken from the three foot ledge assays fifty dollars to the ton; the third grade ore waste \$11 74 per ton. Note by the description that every ounce of ground broken and taken from the five by seven foot tunnels contains gold in sufficient quantities to justify saving, none going off in rock. As fast as ground is broken the ores are separated; the first grade being sacked and handled by the crew as carefully as though cost in ag diamonds.

THINGS ARE FINE ON THE DESERT

G. L. Holbrook, the stock man up at Juniper Mountain, in the centre of the county, was doing the metropolis Saturday. He reports little snow up there and plenty of rain. The grass is starting up in splendid shape, and gives big promise of feed for stock this year. He says sheep, cattle and horses, are in fine condition, and that all in all the prospect is good for big things for the stockman.

News of Interest for the Stock Growers

Merrill Record, 14: G. W. Offield sold 108 steers and cows this week to John Rose, buying for Mitchell, receiving therefor 6 and 7 1/2 cts. Mr. Offield is to hold these cattle until Feb. 1st. This is the last bunch of beef of any size in the community.

Gerber ranch in Horsefly valley. He left Tuesday for Merrill where he will drive 200 head of beef cattle to the railroad for shipment to the California markets.

O. T. McKendree left yesterday for San Francisco where he will deliver a bunch of sheep to Wm. Taaf & Co.

Louis Gerber was in town Monday from Klamath Falls. He left the next day with A. T. Langell for the reservation where he has about 200 head of cattle which he intends to drive to the Merrill country to feed before shipping.

Woodmen and Circle Install New Officers

Last Wednesday night the Woodmen of the World and Circle lodge held joint installation. The following officers were installed in the Woodmen: August Storkmann Jr., Escort; Marion Barnes, Secretary; Al Cheney, Clerk; Tom Watson, Council Commander; E. F. Cheney, Treasurer.

A BIG FLOW IN DREW'S CREEK

C. W. Watson, the hydrographer for the Oregon Valley Land Co., who is keeping tab on the water supply to be used for irrigation was in town several days last week from the dam sites on Drews and Cottonwood creeks. He reports that Drews creek during the recent thaw had a flow of 50,000 acre feet. That shows clearly that there will be plenty of water to irrigate the whole of this valley.

Iowa Man Coming Here

The Denton (Iowa) Bulletin, of the 6th inst contains an article in which the furniture business of Bartcher Bros. is dissolved after a very successful career of several years, in which a trade for a radius of 100 miles was built up from small beginnings to large proportions. The retiring partner, Ben Bartcher intends to move to Lakeview, Oregon in the near future, where he expects the climate to agree with him and where he feels there are great opportunities for business. Wherever he goes and whatever he does, he will find the best wishes of all.

An auto service is to be established, summer and winter, between Burns, Harney county, and Vale on the rail road in Malheur county. Our Alturas apto service was all right during the summer but fell down during the winter.

COUNTERFEIT MONEY CIRCULATING

Counterfeit \$5 gold pieces are in circulation in town. Look out for them. The Examiner man never had so much money at one time, so he does not know how to detect the real from the spurious.
