

## FEW GOOD QUARTERS

Many Football Elevens Shy of Little Men For This Position.

## PRINCETON IS WELL FIXED.

Dillon, Tigers' Captain, Expected to Be Premier Back at End of Season. Steffen of Chicago—McGovern of Minnesota Looks Promising.

It is the quarterback question that is worrying the coaches at many of the big colleges this season. Barring Princeton, Chicago and Minnesota, all the members of the big eastern and western football elevens are up against a serious proposition regarding the most important position on the team. The Tigers have Captain Eddie Dillon,

E. F. KENNEDY, CAPTAIN OF THE DARTMOUTH FOOTBALL TEAM.

[G. F. Kennedy is the fast captain of the Dartmouth eleven, which is feared by the colleges that hope to capture the football championship of the east.]

who is one of the greatest quarterbacks in the country, and unless the unexpected happens Dillon will easily be premier quarterback of the 1908 season.

Yale has lost Tad Jones, last year's regular quarter, and also Dines, the first substitute for the position. Who will play the position is a mystery. Already the blues have tried several men.

Hopkins of last year's freshman team and Bingham, second substitute on the 1907 varsity, are likely candidates. There is, however, a strong possibility that either Wheaton or Philbin may be moved into the all important position. These players both played halfback last year. Wheaton seems the most likely candidate. In fact, he was given a trial at the position. The coaches are desirous of having Wheaton on the team on account of his excellent drop kicking ability. If possible, therefore, he will be broken in.

Harvard, like Yale, has lost its 1907 quarterback and also its principal substitutes. Newhall played the position, and although he was not such a brilliant player as Jones, Harvard will feel his loss even more than the blues will note the absence of Jones. Three men are standing out prominently as the most valuable candidates for the position at Cambridge. There is not much to choose between them, as all are of fair varsity caliber. G. G. Brown, Cutler and Sprague are the players, and each is being thoroughly tried out by Coach Daly. At present Brown and Cutler are doing the best work.

Although Cornell and Pennsylvania both have veteran quarterbacks on hand, each university has to face the problem that is confronting Yale and Harvard. Kelnath, the regular quarterback of the Pennsylvania aggregation, is laid up by injuries, and Towne has been forbidden to play by his parents. Miller has worked well, but he is weak in handling kicks in the back field.

Gardner and Caldwell were at the all important position on the Cornell team last year, and both are back this fall. Neither is particularly brilliant, and some one may cut them out before the season is over.

Glen Warner says that Balenti, the Carlisle Indians' present quarterback, is as good as Mount Pleasant was in executing the forward pass. Mount Pleasant's value, however, was not confined to that department of the game, and his presence will be sadly missed.

Captain Walter Steffen at quarter is the brains and the speed of the Chicago university team, and much will depend on him to win a number of games this season. He is about the only strong open field runner on the team.

Minnesota has a promising quarter in McGovern, a freshman of last year. Although he is small, weighing only 155 pounds, he showed exceptional speed and ability in the open field last season and may develop into a star.

Springer and Moll are candidates for quarter on the Wisconsin eleven. Moll when right is one of the best kickers in the west.

## NEW GAME LAWS JUST ENACTED

Under the provisions of the new game law, which becomes operative May 22, 1909. The closed season for deer is from Nov. 1, to July 15, for buck deer. Female deer and spotted fawn are protected the year round. A limit of three deer for each hunter in any year is also provided. The sale of flesh or meat of deer is prohibited and also the use of dogs in hunting for deer or elk.

The penalty for any violation is a fine not less than \$25 nor more than \$250, or imprisonment in the county jail not less than 30 days nor more than 90 days.

Elk are protected until Sep 15, 1914, under a penalty of a fine of not less than \$100 nor more than \$1000. Duck are protected from March 1, to Oct. 11. Penalty, fine not less than \$25 nor more than \$250.

Quail are protected in Grant, Harney, Wheeler, Gilliam and Umatilla counties until Oct. 1, 1912. Sage hens between Dec 1, and Aug. 15, with same limits as to numbers as grouse. This open season for trout remains unchanged.

Fishing is strictly prohibited except with hook and line under severe penalty.

All ditches must be provided with wire screen grating the proper device, at the intake, when required by the Master Fish Warden. Strict regulations are provided regarding the dumping of sawdust, shavings, etc. in any stream.

All former laws protecting game and fish are repealed and the entire legislation upon the subject is embraced in a game code which is quite lengthy.

Hunters are still required to procure licenses as formerly.

## The Lurid Glow of Doom

was seen in the red face, hands and body of the little son of H. M. Adams, of Henrietta, Pa. His awful plight, from eczema, had, for five years, defied all remedies and baffled the best doctors, who said the poisoned blood had affected his lungs and nothing could save him. "But," writes his mother, "seven bottles of Electric Bitters completely cured him." Sores and all Blood Disorders and Rheumatism Electric Bitters is supreme. Only 50c. Guaranteed by A. L. Thornton.

## COUNTIES MAY BOOM RESOURCES

Salem, Or., Feb. 10.—Representative McCue's bill authorizing the counties to levy a special tax for advertising and other general boosting purposes has passed the senate with several amendments. The amended bill reduces the assessment from one mill to one half of one mill and requires 20 per cent instead of 10 per cent of the voters to petition the county court before the question of levying the special tax may be submitted to the voters.

This is the most dangerous time of the year to catch cold, and it is the hardest time to cure it. If you should take cold a few doses of Kennedy's Laxative Cough Syrup will act very promptly. Its laxative principle cures the cold by driving it from the system by a gentle but natural action of the bowels. Children especially like Kennedy's Laxative Cough Syrup as it tastes good, nearly like maple sugar. It is sold by Daly and Hall.

## Performing Matches.

Get a basin of water and arrange a number of matches on the surface in the form of a star. When the matches are all together in the center of the basin take a piece of soap and touch

the water, as in the illustration. The matches will make for the sides of the basin, repelled to all appearance by the soap. Lay down the soap and touch the water with a piece of sugar. Immediately the matches will return to the center.

## Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

P. J. CHENEY & Co., Toledo, O. Sold by Druggists, 76c.

Take Hall's Family Pills for constipation.

The Examiner has a supply of first class butter wrapper paper on hand now, at the following prices: For 500 wrappers, printed, \$1.50, for 1000 printed \$4.00.

## FOOD REFORM.

Most Married Women Do Not Interest Themselves in It.

There seems to be no letup in the matter of food reform, and we are having a veritable outpouring of individual views and experiences on the subject. Even the doctors, most conservative of men, have caught the infection and are prescribing granose, bromose, nuttose and all those queer looking sawdust and blotting paper sort of things that seem to suggest the need of a dustpan, but are really, don't you know, the very thing your overworked and weakened digestive system may be requiring!

These are the days when the advanced diet reformers are boasting that they are living—and living well, mind you—on sixpence a day. They make their breakfast off a cup of patent diet food, lunch on a nut meat or two and dine on a concoction of vegetable juices, with a banana perhaps for a jolly and acceptable dessert. These are the estimable folk who hurry past a butcher's shop with averted faces and a look of profound disgust. There are not a great many of them, but they are very radical. Such are the Haigites, the Fletcherites, the Eustace Milesians and the disciples of a dozen other modern food reformers. The simon pure Haigite turns faint if he sees you eating a pea, the Fletcherite wants you to chew on a mouthful until nothing remains and to be satisfied with that, and, as for the Eustace Milesian, he simply pities you if he discovers you eating anything you really like.

## Chiefly a Male Fad.

Be it noted also that the business of food reform has been confined principally to the male side of humanity. The women have not committed themselves to it with the eagerness with which they embrace most fads. In the matter of diet women are the great conservative force. Perhaps it is because they are compelled by circumstances to see so much of food that they are so indifferent. To get rid of the whole tiresome subject is the chief form of relaxation that many of them seek. It would be an absurdity to expect women to take the lead in reforming the national diet. The fact is that very few women care for food as food. When it is for themselves it quite singularly fails to interest them. Their business—it wouldn't be quite correct to call it their pleasure—is to prepare it for consumption. Really refined women seem never to know exactly what they are eating. Single women living by themselves practically do not eat at all. These latter are the ones who become food reformers, and they are so in order that they may forewear eating altogether.

When a married woman turns food reformer it may be set down as a fact that her domestic life is not a happy one, nor will her conversion tend to make it less delectable. The average married woman is wise enough to know all this. It is not from the ranks of the married women that the feminine food reformers come. They are recruited from the most part from single women who care so little about food that they are quite ready to experiment with it.

## A Shopping Luncheon.

Have you ever questioned a married woman as to what she ate for her luncheon on one of her shopping expeditions? The revelation, if you succeeded in securing it, will be worth the

## ON A SHOPPING EXPEDITION.

trouble. There is no form of masculine activity that is more wearing than the feminine occupation of shopping. If a man were compelled to engage in it he would find it necessary when the hour came round to recuperate with the assistance of a leisurely, satisfying lunch. How is it with a woman? Thrown back on her own gastronomic tastes and ideas, with no man to influence her, she rushes into a quick lunch room in the immediate vicinity, selects something that is neither appetizing nor restorative and nibbles with evident regret that she is losing time at the business.

This feminine lack of interest in food reform is not a difficult matter to explain. About two-thirds of the average woman's life is given up to some one or other of the endless branches of the food question. Her whole existence stretches down an endless vista of meals. It is certainly an appalling thought that most women know precisely what they are going to eat today and very likely tomorrow. The burden of that knowledge would crush the average man. It is so much of a yoke to her that, like the patient ox, she never thinks of reform.

SHIRLEY BRESSE.

## WHEN TO PRUNE AN ORCHARD

Grape vines require more pruning of all fruit. Cherry trees least. Apple trees require a little pruning every year, too much in one season causes growth of water sprouts and shortens life of tree. It is a big mistake to prune a great deal one year and not at all the next. Dead and dry dying limbs should be cut off.

Pruning fruit trees in winter stimulates growth. Pruning in June and July checks growth, causes the formation of fruit buds, helps to thin the fruit. In seasons when trees are too full open the heads to let in air and sunlight to color the fruit. Severely cutting back trees for a few years will dwarf them and in case of fruit trees will cause early bearing, for growth pruned in winter and for fruit in summer, as soon as the leaves are well grown.

DICK KINGSLEY

## Near Death in Big Pond

It was a thrilling experience to Mrs. Ida Soper to face death. "For years a severe lung trouble gave me intense suffering," she writes, "and several times nearly caused my death. All remedies failed and doctors said I was incurable. Then Dr. King's New Discovery brought quick relief and a cure so permanent that I have not been troubled in twelve years." Mrs. Soper lives in Big Pond, Pa. It works wonders in coughs and Colds, Sore Throats, Hemorrhages, La Grippe, Asthma, Croup, Whooping Cough and all Bronchial affections. 50c and \$1.00. Trial bottle free. Guaranteed by A. L. Thornton.

Welch, our telegraph operator is a great joker and an ardent Socialist. A few days ago he invited us to attend his lawn party, and then fixed the weather clerk so that there was six inches of snow on the ground, and of course, we did not go because we had light freeze. And to day he wanted to know what are the three most uncertain things in this world. We answered Death, Politics and Religion. But he said it was one woman, another woman, and the climate of Oregon. Welch, by the way is an old Bach.

## Good Liniment.

You will hunt a good while before you find a preparation that is equal to Chamberlain's Liniment a sure for muscular and rheumatic pains, for the cure of sprains and soreness of the muscles. It is equally valuable for lame back and all deep seated muscular pains. 25 and 50 cent sizes for sale by Daly and Hall.

A large number of students of the University of Oregon will be forced to leave the school on account of inability to pass the examinations. Parents should take notice that there is something more required at the University than to be able to play ball, dress like dudes and "spark" the girls says an exchange.

## It Saved His Leg.

"Although I'd lose my leg," writes J. A. Swenson, Watertown, Wis., "Ten years of eczema, that doctors could not cure, had at last laid me up. Then Bucklen's Arnica Salve cured it sound and well." Infallible for Skin Eruptions, Eczema, Salt Rheum, Boils, Fever Sores, Burns, Scalds, Cuts and Piles. 25 c at A. L. Thornton's.

White Salmon, Washington, the apple center of the "North Bank" Road, holds the record for liberality in raising an advertising fund. The entire population of the village and valley of White Salmon does not exceed 600 people, and at a recent meeting they raised \$2900, or almost \$4 apiece.

## Kills Would-be Slayer

A merciless murderer is Appendicitis with many victims. But Dr. King's New Life Pills kill it by prevention. They gently stimulate stomach, liver and bowels, preventing that clogging that invites appendicitis, curing constipation. Biliousness, Chills, Malaria, Headache and Indigestion. 25 cc at A. L. Thornton's.

It looks as though our neighboring city of Klamath Falls is "in the throes of a great moral wave." In addition to putting the blind pigs out of business the city council recently passed an ordinance prohibiting the sale of liquor within the corporate limits and it was also made a misdemeanor to play cards for "treats" or to shake dice, or to engage in any other game of chance.

## For Diseases of the Skin

Nearly all diseases of the skin such as eczema, tetter, salt rheum and barber's itch, are characterized by an intense itching and smarting, which often makes life a burden and disturbs sleep and rest. Quick relief may be had by applying Chamberlain's Salve. It allays the itching and smarting almost instantly. Many cases have been cured by its use. For sale by Daly and Hall.

There is now little doubt that a rich coal find has been made in Malheur county, says the Ontario Optimist. The company formed at Vale some three weeks ago for the purpose of investigating this coal vein, has pushed the work to a point where it seems proven beyond a doubt that there is an immense deposit of coal of good quality in the vein.

## A Pleasant Physic

When you want a pleasant physic give Chamberlain's Stomach and Liver Tablets a trial. They are mild and gentle in their action and always produce a pleasant cathartic effect. Call at Daly and Hall's drug store for sample.

House cleaning time. We are going to sell lace curtains for the occasion. B. & M.

The best known pills and the best pills made are De Witt's Little Early Risers. They are small, easy to take, gentle and certain, and are sold by Daly and Hall.

## COUNTY ORCH RDS MUST BE SPRAYED

All farmers or fruit growers in Lake county are hereby notified that under the state law it is imperative that all fruit trees should be sprayed.

For that reason fruit growers must obtain proper appliances in order that such work can be done during the period previous to budding in the spring. It is known that two dangerous fungus growths already have found lodgement in the county. Spraying will destroy all insects and fungus growth. All fruit growers will observe this official notice, and comply with the requirements of the law. Dated, New Pine Creek, Ore., Dec. 19<sup>th</sup> 1908.

A. M. Smith, Inspector.
