**SCHOOL LAND ASSIGNMENTS**

We have for sale 320 acres of land, in Klamath County, 30 miles west of Lakeview, the most part of which is mountain meadow land, with some pine timber on it. There is a creek flowing through this tract but is not used for irrigation, as this land does not require irrigation, there being sufficient sub-irrigation to produce a good growth of grass. This is an excellent property for a dairyman, or is first class pasture land. Price \$8. per acre. \$1250. cash, balance as per state terms on school land. We also have another school land

assignment for 320 acres, located in the Warner valley, and is bench land, but excellent pasture land. This tract is lower in elevation than Lakeview, but there is no water here for irrigation, and the same would have to be used either as pasture land or for dry land crops. The price of \$4. per acre will justify you in buying this for a speculation. Half cash will handle the above property, the balance as per state terms. Further particulars regarding either of the above properties will be furnished upon application to,

A frost at Stockton, Calif., on the 21st ult., tipped the potatoes. Beans were so badly damaged by frost that it will be necessary to replant. Our frost at the same time was not so bad as at first feared, and the later fruit trees are now loaded with bloom, while the earlier varieties were not damaged other than to thin out the crop, something that would have been necessary in any event.
