SILVER LAKE

Several persons were discussing the future possibilities of this being a great grain producing country, in the office of the hotel, a few evenings since, when Frank Powers of Christmas Lake, made the statement that he was one of the early settlers in the Palouse country, where soil and climate were identical with the same here, and it was thought by many persons grain and fruits would be a failure, but the result has been the reverse, as can be verified by the official crop reports, Palouse produces more grain porportionally than any country in the United States. Those who become discouraged and left missed the opportunity of a lifetime. Life there is promised are prosperous and happy. As soon as the soil is properly cultivated there is every reason to believe this country will equal if not surpass Palouse. The Power boys, who have all been through the mill, are taking a chance, and like the old farmer in the Hoosier Schoolmaster say "Hit a plenty while you's gettin' says I," and you won't regret it.

Lost in the mountains for three days while tracking horses was the experience of Roy Freeman, who left home last Saturday in search of a bunch of horses which had strayed off. While tracking and running on the trail he became confused and was unable to find his way. When he failed to return a search was instituted, resulting in his being found in a famishing condition, on Tuesday by Alex Baxter and Frank McBroom. His tongue was badly swollen when found, but he is alright now. The boys will put a bell on him the next time they turn him loose in the jack pines.

The Examiner has just received the May number of the State University Bulletin which announces the university summer school to be held from June 28 to August 6. The announcement is important to the teachers of Oregon in that the summer session is conducted practically free of charge to their interest at a time when it is possible for them to attend. In the past the larger part of those attending have been teachers. The University believes it can extend its advantages of library, laboratory, equipment and teaching force in no better way than through the summer school. The course offered for the teachers covers the greater number of subjects required in the state examinations.
