The Stassenville Advocate man has made an astronomical discovery among the type of the Examiner that may rival or eclipse the one made by Newton, which is nothing more or less than an "annual" eclipse of the sun. If the learned editor of the Advocate was blessed, or more likely damned, with a Simplex typewriter in his office and with a green ink operating it, he would doubt-

less have something else to attend to other than to get hyperventilated over such common-place errors.

Ex-register J. N. Watson, since he dropped the extra of his office, says he feels better, and is now hard at work gathering up crop of alfalfa. We expect to see him bloom into one of Lake County's future greatest graziers--but you will have to let your whiskers grow (and J. N.) if you want to insure the greatest success as a farmer.

If you are going to celebrate in custom, get your fireworks at The Frost.

Among the laws passed by his special session, the most important were those requiring all hotels and lodging houses more than ten stories high to be provided with fire escapes of iron or other non-combustible material, and providing that the doors of all public buildings open outward. It was Miss Smolth's first public appearance since her return from her musical studies the past year. The audience was quick to note the improved handling of her violin and the confident and masterful way in which she rendered the more difficult passages. The young lady has talent of a high order, which will yet command appreciation from larger audiences than that possible to be afforded by so small a town as Lakeview.

Silver Lake, Monday, July 1st. It is not when that a woman can handle a gun as well as a man. Just think an occasional exception and Mrs. R. E. Lockley, who lives near Coeur d'Alene is one of those exceptions. The Work Progressing

The Examiner has a letter from a Daggett, Calif., subscriber stating that a Grants Pass paper stating to work had been done on the dam and offices of the Oregon Valley Land Co. enterprise at this place, and that there was no assurance that any work thereon would be done. Naturally in an undertaking of this kind much preliminary work was necessary, which takes time in a government or an enterprise of a private character. The best and only answer to the malicious and misleading statements complained of will be found elsewhere in this issue of the Examiner which shows that the contracts are let and work thereon is to begin at once.
