LAKE COUNTY ABSTRACT CO.
 Incorporated
A Complete Record
 We have made an entire transcript of all Records in Lake County, which, in any way, affect Real Property in the county.
 We have a complete Record of every Mortgage and transfer ever made in Lake County, and every Deed given.
Errors Found in Titles
 In transcribing the records we have found numerous mortgages recorded in the Deed record and not indexed; and many deeds are recorded in the Mortgage record and other books. Hundreds of mortgages and deeds are not indexed at all, and are most difficult to trace up from the records.
We have notations of all these Errors:
 Others cannot find them. We have put hundreds of dollars hunting for these errors, and we can guarantee our work.

GENERAL WILLIAM BOOTH AND HIS DAUGHTER.

Approaching his eightieth birthday, General William Booth announced his plan for the endowment of the University of Humanity, which he intends as the crowning achievement of his life's work. He means that the university shall be devoted to the training of men and women to deal with misfortune. The world over General Booth is regarded as one of the most remarkable characters of all times. Sixty-five years of his life have been devoted to the cause of humanity. Miss Eva Booth, his daughter, will have charge of the raising of the endowment fund for the university in America.

LONDON HEARS OF ENGINE OF WAR
Says America Has Invention that takes the Lead

Chicago, July 31.—A special cable from London to the Tribune says: From an excellent source it has been learned that the reason that the American Government remains apparently so little concerned about the advances in aerial navigation made by foreign experimenters is that an officer of the American Army stationed at Fort Omaha, has worked out an electric invention which is likely to paralyze all other existing or proposed engines of war. The invention, he says, is to be exclusively the property of the United States Government and up to the present the essential details are carefully guarded. The machine is said to project through the air a column of electric energy of almost any desired strength at any given object for a distance of many hundred yards. The informant, who is an expert in war said: "Such an electric column would queer every mechanism on a warship, stop the engines, annul the dynamo, kill the signalling apparatus, make the guns unworkable, slay hundreds of men by shock alone and might even explode the magazines. Its possibilities for offensive warfare are almost unlimited. Of course I don't say its absolute efficiency is assured, but from certain knowledge I can say in entire confidence that the experiments made point convincingly in this direction."

A carload of doors and windows received at B & M's.

The latest invention to hang in the family dining room is the gum board. It is a neat little circular board, plain, or decorated, fastened on the wall. The name of each of the family is painted on the circumference, and marks the spot where the gum is left until wanted. This saves carrying the gum to bed and getting it in one's hair or swallowing it at night. It is obvious that the gum board supplies a long felt want, and he who invented the new fad will have the best wishes of the young ladies.
