Lands Getting Scarcer Fast

I standed wheat lands of Control From an teing tilled up at a mi ness of the Des Charles being in in this great undereligible can the During the mad years a recortrice we note into the vacual land wheat Bend by a party of metiles who went overland by muto from Cor alls: The trip on made from Corvalls to Bend, 50 m les, in one day and the best morning unmbers of the party field on 320 acre homestructs hear Bend and will engage in wheat growing, A true of land of 250,000 serse.

r that istrict has just been in clused in the new 320 acre brocestead law and a proving very attractive to

wearing but and the crop yields are intreasing rather toom ecreasing. These had a min demostrated in a hulation that will lead to the discovery letto shortly to be issued by the bureau of sums of the agricultural deof any horse branded with an old bareau of soils of the agricultural de-horseshoe brand on both jaws, placed barranent, prepared by ProtessorMil as in the cut in this advertisement, to whitney, chief of the bureau with fresh triangle brand underneath. The bulletin deals exhaustively the horseshoe. The triangle placed with the yields of the crops from 18-7 In such a manner as would cover up to 1966, inclusive A careful study of the anta which has been presented be found in the possession of some appears to justify two conclusions, "
lerson or persons." First, that the productivity of the newer agricultural sons of th United Staes and of the objer agricultural soils of Europe, taken as a whole and for the notion, are not declining, as is popularly supposed. Individual tarming deteriorates and soils wear out, but as a whole it seems probable that we producing more grops per acre than formerly. Second so far as our information \$1,000.00 Reward. NOTICE OF EXECUTOR'S SALE

goes there is apparently no significant inflerence at the present time between the composition of the old agricultural soils of Europe and then the newer agricultural soils of United States. with respect to potast, phosphoric

The bulletin gives averages by statas for production of wheat per acre trom 1866 to 1907. The first three are; Vermont 18,5 bushels; Maine 16 5 New York 13 7.

The Celarville Record says: Last Monday W. C. Scott's outfit pulled into town from Eagleville and finushed loading supplies for his sheep camp near Steins mountain. The outfit consisting of one 16 mule team two 8 borse and one four borse team nine big wagons. John Perry en gineered the big mule team. As sup-plies are taken to camp twice each year with the teams it will be seen that the sheep business is not all clear profit. Mr. Scott is one of the biggest and most successful sheep owners in the country, and his camp is always fully equipped with every thing neesary to run it.

MUNN & Co. 361Broadway, NEW York

THE BEST BUY IN THE COUNTY

Located in the south end of the rich Chewaucan Valley, in an ideal, protected and picturesque location, with pure cold water at ten feet.

With the advent of the railroad will control the trade of the 75,000 acres of this rich valley, enormous bodies of timber to the west, the great winter range to the north and the promising gold run mines to the east.

This is the point on the rallroad location where they have located the town for this valley and surrounding country, and on account of grades and curvature is the ONLY practical location.

John F. Stevens, Hill's chief engineer, lately said: "Central and Southern Oregon is an empire capable of sustaining a population the size of Portland."

Where will this population be? In a few natural locations. We have one. Chewaucan Valley, according to Government records, is two degrees warmer all year, has more rainfall, and is 500 feet lower than Goose Lake Valley. This comparison is with one of the best vaileys.

Invest a small amount now and secure big returns when the railroads and this per dation comes.

Our town is laid out in an attractive and up-to-date manner. Just a few of tie very best lots now for sale at a low figure.
