Smiles and Squalls BY "THE VERDANT ONE" A milliner attempted to smuggle a lot of piumes into New York. She hid them in her stockings. Some vile man probably saw her coming down the gang plank and got stuck on her shape. Or it might be some jealous minded woman might have sized her up and had her pulled on gear' principles. At any rate the poor dear was shorn of the Cochlin-ben adornments of her pedal extremities. Now they have sealed down Metimelab's ears from 322 years to 781 1/2. Shucks! What is the use of trying to be famous? The time is sure coming when posterity will say Rockefeller's fortune was only 30 centimes! And in time to come nobody will believe there ever was a fat man in the White House.

Jepson Threw Cooper Twice, But Only Downed Cravens Once

The wrestling match came off Sunday night. Jepson succeeded in throwing Cooper twice within 9 minutes. He got Cravens on the first fall, but on the second one Cravens threw him, and Jepson did not succeed in downing Cravens in the prescribed time of 45 minutes for both men. The result shows that Jepson is a young Hercules and probably will make an outside record, if he cares to go after that sort of thing. The pictures of the husky young fellows are presented herewith:

COYOTE SCALPS COMING IN FAST How to Obtain a Title to State Lands

The County Clerk's office is doing a big business these days - paying scalp bounties. The last two weeks 128 coyote pelts have been brought to the office. Yesterday W. R. Hamersley, the forest ranger brought in 42 coyote pelts and besides secured a big diamond wolf pup Crooked Creek. The pelt of which measured 5 feet and 4 inches. A. L. Highfill brought in 18 coyotes and Josh Hutchinson 8 more yesterday. C. G. Sevier, of Coffeyville, Kansas, who came here at the opening and drew a 10 acre tract in this valley, will remain during the winter.

Considerable outside inquiry has reached this office concerning the methods to be employed to obtain lands from the state of Oregon. The Examiner has been advised by Peter Applegate, State Land Agent, at Salem, as follows, which intending purchasers will do well to heed: Any vacant, surveyed, non-mineral Government land in Oregon, whether timbered or otherwise, may be secured through the State in the manner here indicated. The maximum area that can be sold to one person is 320 acres (in case of an irregular section 330 acres). The tracts need not be contiguous nor the applications be presented at one time.

In filing the blanks the application to purchase is to be completed in full containing a correct description of the tract to be selected and with affidavits sworn before a notary public or county clerk within this State. On the identity list blank each smallest legal subdivision of the land desired should be separately described under the heading "Selections". The non-mineral affidavit is to be made by some competent person who is familiar with the land in question and may be either applicant or another. The date of personal examination of the land by affidavit should be within three months prior to the filing of the selection list. On this blank nothing else is to be filled. The present price of base for identity selections is \$10.00 per acre. At least one-fifth of the total purchase price must accompany the application and non-mineral affidavit. Notice of each selection is published for five successive weeks in a paper to be designated by the register. The State pays filing, publication and other fees, where the selection contains ten

acres or more. If the selection is less than ten acres, applicant must remit \$12.50 extra for fees; excesses, if any will be returned. If the land applied for is covered by any form of entry or filing, relinquishment of the same should accompany the application. A receipt for the first payment is not issued until the selection is approved in the local United States Land Office. Should a selection be rejected the application and money are returned. No interest is charged on deferred payments until the selection is clear listed in the General Land Office and the land is patented to the State. At that time a certificate of sale is issued. In the event of failure to secure patent, all money paid to the State on account of the purchase price of the land will be repaid to the purchaser on proper application to the State Land Board and surrender of the Clerk's receipt. With the issuance of the certificate of sale the applicant may pay in full and take a deed; or may pay one-fifth in one year with interest at 8 per cent, and one-fifth in two years at 7 per cent. The remainder deferred payments are on demand with interest at 6 per cent. A certificate of sale cannot stand for a longer period than five years from the date of issuance. Interest is payable annually and notes on deferred payments are not required. It will be noted that the price has been raised to \$10 per acre.
