

Lake County Examiner

VOL. XXX

LAKEVIEW, LAKE COUNTY, OREGON, NOVEMBER 11, 1931.

NO. 44

Proceedings of the County Court for November

Grist of Bills Allowed on Account of District Court

In the County Court of the State of Oregon, for Lake County, Tuesday October 19, 1931.

Court convened pursuant to adjournment of Sept. 9, 1931. Present: Hon. B. Daly, County Judge; C. H. Rehart, County Commissioner; E. W. Payne, County Clerk; A. A. Foster, County Assessor. When the following proceedings were had, to-wit: In the matter of claims against Lake County, Oregon: The following bills were examined and approved, and warrants were hereby ordered drawn on County Treasurer at Lake County, for the several amounts: To be paid out of the Road Fund: Bank of Lakeview, for cash advanced for supplies and freight for Court House \$28.08 Bank Lakeview, for cash advanced on lumber for Court House and grounds 161.00 Inasmuch as the Court House building is now completed, furnished and paid for, and to order that a thorough examination of all the expenditures made for its construction, and also for purchase of the furniture and fixtures for the same be made by a competent committee of representative business men of the County.

It is hereby ordered that Messrs. G. B. Wardwell, of Silver Lake, V. L. Saveling, of Lakeview, and H. M. Fleming, of New Pine Creek, be and they are hereby appointed a committee to make a thorough examination of all matters pertaining to the construction of the Court House building, and the purchase of the furniture and fixtures for the same, and to file a report of their findings with the County Clerk, which report shall be published for the information of all the people of Lake County.

The report was published in the Examiner of the issue of Nov. 4th and is omitted here.

In the matter of the appointment of a Road Supervisor for Road District No. 1, it is hereby ordered that G. D. Lusk be and he is hereby appointed Road Supervisor for Road District No. 1 of Lake County, Oregon.

In the matter of the Building Fund: It is hereby ordered that the County Treasurer be and he is hereby ordered to transfer all monies in said Building Fund to the General Fund.

In the matter of the approval of the plat of Walter's Second Addition to the town of Lakeview: It appearing that Harriet Walters has fully complied with the law thereto, it is hereby ordered that said plat be and it is hereby approved.

The case of James Clifford was noted upon which was published in the Examiner in the issue of Oct. 23.

In the County Court of the State of Oregon, for the County of Lake, November 3rd, 1931.

Be it remembered that a regular term of the County Court of Lake County, State of Oregon, was begun and held at the Court House in Lakeview, Oregon, on Wednesday, November 3rd, 1931, same being the first day of the regular November term of said County Court with the following officers present:

Hon. B. Daly, Judge; C. A. Rehart, Commissioner; E. W. Payne, County Clerk; Albert Dent, by C. D. Arthur, Deputy; A. J. Foster, Assessor.

When the following proceedings were had to-wit:

In the matter of claims against Lake County, Oregon: The following claims were examined, allowed, and warrants were ordered drawn on the County Treasurer in payment of the same, to be paid out of the General Fund, as follows, to-wit:

J. P. Duckworth, for hauling lumber and trash \$2.00 Glass & Proutyhouse Co., for supplies for assessors office 47.84

NATIONAL WEALTH CREATED BY FARMS

Farming still has first place in the industries of this nation. The figures of the progress are stupendous, and the aggregate wealth thus produced in one of the reasons why we have recovered from a panic almost in a day.

For instance the value of this years farm products, as estimated by Secretary Wilson is \$8,000,000,000, an increase of 5 per cent over the great record of 1928. The corn crop will reach 3,161,171,000 bushels, the spring and winter wheat crops will total 693,500,000 bushels, and there will be 392,983,000 bushels of oats, 183,923,000 bushels of barley, 31,928,000 bushels of rye and 11,250,000 bales of cotton, not to mention the immense aggregate of the lesser crops.

It will be observed from the above that the country's potential agricultural resources are beyond comprehension. Add to them the untold wealth of our mines, our forests and our fisheries, and it is easy to see why actual hard times cannot last for long.

Some Big Potatoes

The veteran grower of Oregon, and one who has lived in Lake County 35 years, Mr. James Foster, of Sumner Lake, and his wife, are in town.

In order to show what a man of his years could do, he brought down some

Gold Corn potatoes he raised himself, that weighed from 4 to 6 1/2 pounds apiece. He dug two hills for a neighbor. His scales weigh to 50 pounds. The man took the two hills at 65

COW HEAD IRRIGATION SCHEME

The irrigation project in which Geo. Ayres, of Lakeview is chief promoter, to utilize the waters of Cowhead Lake to irrigate sage brush lands of northern Surprise valley, seems in a fair way of being realized.

The irrigation project in which Geo. Ayres, of Lakeview is chief promoter, to utilize the waters of Cowhead Lake to irrigate sage brush lands of northern Surprise valley, seems in a fair way of being realized.

WATER COMPANY IMPROVEMENTS

The water company is making extensive improvements in the system. Larger pipe are being laid, extensions are being made to newer parts of the town, and the pipes conducting the water from the springs to the reservoir given greater capacity.

OUR ONIONS ARE OF PRIME QUALITY

Will Prove to be One of Our Paying Grogs in The Future

Our fair showed that we could and do produce big fine onions. But we have not learned what the product would be per acre, as no one here has gone into such culture on so large a scale. The following, however, from the Ontario Optimist shows what can be done here in that line, which beats the famed production of Southeastern Texas, where irrigation is practiced.

It says: "C. A. Johnson brought in a big onion to the Commercial Club, which is now on exhibition here and is a splendid specimen."

It is a yellow Danver and is as large as a good sized acorn. Mr. Johnson grew 26,000 pounds, or 18 tons of these onions on the acre, which is certainly some few onions. The Commercial Club will send a bushel of these to the U. S. Land and Irrigation Exposition at Chicago to show what Malheur county can do in the onion line.

In the above the yield was 720 bushels, and at 4 cents a pound, the present Lakeview price, the income for the onions grown on that acre-tract would be \$1440 per acre!

Once we have a railroad onions can be made a source of great income for those who wish to engage in the production of that excellent vegetable, that everybody likes even though they have to eat them, on the fly and use tooth-powder, when their best health is expected.

The hay business has assumed considerable proportions in the Merrill valley, over in Klamath County. The Record says the crop is 15,000 tons this year and that 9,000 tons are required for feeding the stock at local farmers. About 5,000 tons so far have been sold to outside feeders.

The veterinarian of Oregon, and one who has lived in Lake County 35 years, Mr. James Foster, of Sumner Lake, and his wife, are in town.

In order to show what a man of his years could do, he brought down some

Gold Corn potatoes he raised himself, that weighed from 4 to 6 1/2 pounds apiece. He dug two hills for a neighbor. His scales weigh to 50 pounds. The man took the two hills at 65

FILED ARTICLES OF INCORPORATION

Articles of incorporation were signed in Susanville last week for the definite location of the Goose Lake Southern from Alturas down the Pitt river to three miles north of Lookout. Also one for the Modoc Northern commencing on the State line at Tule Lake and running southerly along the east shore of the lake for a distance of 25 miles.

Articles of incorporation were signed in Susanville last week for the definite location of the Goose Lake Southern from Alturas down the Pitt river to three miles north of Lookout. Also one for the Modoc Northern commencing on the State line at Tule Lake and running southerly along the east shore of the lake for a distance of 25 miles.

OUR APPLES BEST

The Cedaville Record reports that Modoc County apples were given the prize at the Seattle Exposition for being the best fruit exhibited. This means the apples of Surprise or Golden Goose Lake. When we get our railroads the fame of our apples will eclipse the fame of any grown anywhere. Even the golden apples of the garden of the gods of old would not equal them.

ANOTHER RANCH SOLD TO LOCAL MAN

Merchant Snelling Buys the Splendid McGrath Property

The McGrath ranch of 500 acres on the east side of Goose Lake valley 8 miles south of Lakeview has been sold to V. L. Snelling of Lakeview, consideration, \$25,000. This is one of the choicest ranches in the valley. There is a water right from Cogswell Creek, the oldest of record, several springs, a good orchard and a large amount of land available for subdivision in small orchard tracts for which there is a good local demand. The sale was made by W. E. Paine and Co., who recently negotiated the sale of the McKee ranch of 900 acres and who have placed under contract another ranch of 500 acres near Lakeview. As all of the properties were acquired by long time residents of Lakeview, no better recommendation as to the values of Lake county lands could be desired.

EASTERN OREGON DRY FARMING WINS

Takes Prizes Over All Competition at Billings Fair

THE DALLES OR., Nov. 4.—The country drained by the Des Chutes river made an exceptional record at the dry farming congress held in Billings, Montana, last week taking the grand prize offered by J. J. Hill, besides five first and two second premiums. The exhibits were drawn from Prineville, Madras, Bend and The Dalles, and were put on exhibition by J. M. Patterson and D. J. Cooper of the Dalles, and T. M. Baldwin and G. Springer of Crook county.

The specimens shown were of wheat, oats, barley, rye, alfalfa seed and potatoes. All were grown without irrigation. The men who had charge of the exhibit will assemble a little exhibit from the two counties for the National Corn show at Omaha, December 5 to 10.

BIG MONEY IN ALFALFA SEED

Malheur County Farmers Receive \$152 an Acre for Seed

Some of the farmers in Goose Lake and Surprise Valleys are engaged in growing alfalfa and are making good money in the business, but we have not heard of any results so good as the following from the Ontario Optimist in Malheur County:

L. A. Walker finished threshing his alfalfa seed which he mentioned a week or two ago, and has 6757 pounds. The alfalfa which produced this grew on the six acres of Mr. Walker's place. With alfalfa seed selling at 18 1/2 cents a pound it nets Mr. Walker \$912.19, from his six acre crop, or \$152.03 per acre. This alfalfa had no water this year in fact the last irrigation done on this tract of ground was a year ago last June.

GOOSE LAKE VALLEY APPLES WINNERS

The report is persistent that Mr. John Briles, of Davis Creek captured the \$1,000 cash prize at the Seattle Fair for the best apples in face of world wide competition. Mrs. Briles says she understands the prize was given to Modoc county apples, but has no particulars. If the report is confirmed it will mean that the Golden Goose Lake valley apples are top notchers of the whole world and will so continue! Have you secured a tract of land in Goose Lake valley for your orchard yet? You had better do so while there is opportunity and the land is still cheap.

SOME EXPERT TESTIMONY

N. E. Gore and W. F. Reshan, of Olathe, Colo., are here on a tour of inspection. They are fruit growers, and are so well pleased with this section that they will purchase land here for the purpose of setting out an orchard. They say this is a fruit section, and for that purpose there are no such opportunities to secure valuable land so cheap as here.

Dr. Everett is the proud papa of a 9-pound boy that arrived at his home Wednesday morning.

WILL DRILL FOR ARTESIAN WATER

J. D. Edler Will Test the Water Problem in Several Places

J. D. Edler, the man who has the largest number of sheep in Oregon was a caller Friday.

Mr. Edler says his flocks are all in condition, and feed is good so that he expects to bring them through the winter in good shape.

The gentleman is not only one of the biggest stockmen, but he is also interested in the agricultural resources of the country. He is a big holder of land, both grazing and farming, though so far he has not done anything in the latter line. He, however, sees that the future is to limit the operations of the stockmen, and for that reason is taking steps looking toward a change in his conducting his sheep and wool interests.

Last spring he shipped in a large artesian well drilling outfit at an expense of about \$50,000. He intends spending many thousands of dollars in addition to test the artesian well problem. He now has the outfit at work on one of his farms seven miles west of Bonanza, in Klamath County. When he left the outfit was down 102 feet. The ground selected for the first well proved to be a shale full of hard boulders which makes slow progress for the drill. But as the outfit is capable of reaching 3000 feet or more, he believes the workmen will have no trouble in soon getting down to a solid formation.

When he gets the present well completed he intends putting down an experimental well in the Warner Valley, and then elsewhere about Lake county.

Mr. Edler has gone into the matter to succeed, and we trust he will accomplish his purpose of discovering artesian wells in different parts of Lake and Klamath counties.

It is fortunate for others that a man of his wealth and purpose has had the courage of his convictions to enter upon so costly an experiment.

If he succeeds others will have the benefit of his experience without expense, and will know just what to expect in similar ventures.

FRUIT DRYER FINANCIAL SUCCESS

Fruit Inspector Smith is of the Opinion We Need a Fruit Evaporator

A. M. Smith, our County fruit inspector says that Sacramento buyers were in Surprise Valley and purchased 4,000 boxes of apples for that market. It took 5 big 8-horse outfits to haul them to the railroad.

He says the fruit evaporator at Cedaville is a big success. It affords employment for all the men, women and children that can be secured, and besides provides a market for fruit that otherwise would rot on the ground or become food for hogs. The factory has already turned out several carloads of dried fruit and is finding a big and profitable market for its product, some of it being sold right here in Lakeview.

In view of all these facts Mr. Smith rightly concludes that a fruit drying establishment and a cannery would be a money making institution in the upper Goose Lake valley.

WISHES HE HAD BOUGHT EARLIER

G. E. McKune, of New Pine Creek, was in town Monday. He is a firm believer in the future of this country, but says the boom has caught him napping. He had been renting the Reed place of several hundred acres recently purchased by W. K. Heryford and Felix Green. He was looking around for a farm with a view of purchase, when the \$125 per acre price paid by J. K. Heryford for the Fleming place makes him think he better hurry if he is to benefit from present prices. He believes, however, that any land at present prices is a good buy.

WELL OUTFIT UP NORTH

Bend Bulletin: Frank Powers, of Christmas Lake, on the lower end of the High Desert, passed through Bend the first of the week with an engine and a deep well boring machine which will be used in this locality to bore for artesian wells. The machine is capable of boring to a depth of 2,500 feet and the Christmas Lake settlers, who are interested in the scheme are fully confident that they will strike an artesian flow before that depth is reached.

Klamath Falls is walking all over itself, and huzzzing itself with joy, because the Oregon Trunk has announced that it is going to "build at or near Klamath Falls". Uh, hub!
