**WALTER'S Second Addition**

Several hard-headed, common-sense reasons why **WALTER'S ADDITION** is right now, and is bound to be in the immediate future the most desirable city property, from both residential and commercial standpoints :

- 1st. Physically the soil is good. Will make good lawns and gardens. The land lies on a gradual slope, insuring drainage for all time to come.**
- 2nd. This addition is in reality not an addition to the town, as it lays in the center of the most populous district, just three short (200-ft.) blocks from the principal business street and commercial center.**
- 3rd. We believe it is the first and only tract that was subdivided in conformity with adjacent property, all streets and alleys join and have the same names.**
- 4th. All lots blocks and streets are made to conform as nearly as possible to that of surrounding property. Lots 50 x 150, 60 ft. streets, 16 ft. alleys, 6 ft. sidewalks and 6 ft. parking.**
- 5th. Every lot when sold will be subject to restrictions, both as to value and character of improvements. A 25 ft. building line is likewise stipulated. Building restrictions are value insurance to the buyer, it guarantees the status of your property and assures you the better class of neighbors.**
- 6th. A liberal discount is given for cash, and most lenient monthly payments can be arranged. The prices range from \$300 to \$100 each according to location. We will gladly show you the property, and furnish plans.**
