WILL LECTURE ON HYPNOTISM SOON

The people of Lakeview have been promised a rare treat in the near future when they will have the opportunity to listen to a lecture upon "Hypnotism" and witness the workings of this science in the matter of controlling the mind of another. The science is not generally understood, even among the "Professionals" there is much that they are not conversant with, so this lecture delivered by a gentleman who has gone thoroughly into the mysteries of it will be appreciated.

Hypnotism has invaded many walks in life and exerts an influence that whether consciously or otherwise, marks a deep line between success and failure. It has been used by this operator to diagnose a difficult ailment where the ordinary skill of the physician and surgeon were at a loss as to what was wrong. In New York one of the operators has used it in assisting the living models in the art studios to pose for hours at a time, in the most strained positions, when the ordinary length of time possible with the most experienced models would not have exceeded five minutes. It has been used in many other ways and the best public speakers either have a knowledge of it or use it unconsciously.

Physicians have and are using it to produce anesthesia in many of the simple operations and pain can be produced or relieved instantly by its use. One phenomena that shows a mysterious something that is often depicted in the medical world is the fact that the pulse of the right arm can either be made to beat slower or faster than in the other arm, that every organ of the human body can be made dormant with the exception of the heart and a slight movement of the lungs.

In music, art science, medicine, surgery, criminology, public speaking etc. the science is valuable and when properly understood and used by high minded persons, it will be productive of good to humanity.

Contra, there are persons who can be hypnotized, but not "soul-minded" but on the contrary the majority that are placed in hypnotic sleep, generally termed hypnosis, are much stronger mentally than many that say they cannot be hypnotized. Every scientist knows that an insane person or an idiot cannot be placed under the spell and the experienced operator requires the strongest people mentally, that he is able to secure for subjects.

A committee of physicians will have the opportunity to examine any of the subjects who are used at the lecture.

Halley's Comet

Halley's Comet is now in the earth's orbit, and is coming towards us at a rate of 1,600,000 miles a day, or 80 miles a second. The best Senator's Hudson -20, and that is saying a good deal for his auto flier. We all want to get a good look at the monster, as he will be again be visible to Jolly old Earth until 1985, and some of us will be thrumming harps by that time while others may be using coal shovels, not J. Pier and Guggenheims!

Smiles and Squalls

A New York professor in Bronx Park has taught a frog to sneeze and to use his handkerchief. Now wouldn't that make you sneeze? Judging from the way the adverse republican returns came in rapulating him, Joe Cannon must be "Something Else!"
