An experienced teacher says that pupils who have access to newspapers at home, when compared with those who do not, are better grammarians, better punctuators, and read more understandingly and obtain a more practical knowledge of geography in almost half the time it requires others. The newspaper is decidedly an important factor in modern life. This will not be disputed by any one who has taken the trouble to investigate the matter for himself.—Examiner.

### Kill the Flies

One fly in early spring may mean 50,000,000 flies by July. Consequently such fly exterminators prevents the birth of millions of flies later. Reliable authorities say that common flies do more toward spreading typhoid fever than any other agencies. Flies instead of simply being regarded as a nuisance are today regarded as very dangerous pests.
