A YIELD OF 67 BUSHELS OF WHEAT PER ACRE

at the Nebraska Station at North Platte, Nebraska, is causing everybody that hears of it to TURN AROUND and ask HOW? A 50-bushel yield is not unusual, and there is no reason in the world why you cannot learn HOW. Practically all these bumper crops have been produced with only a few inches of rain during the growing season, so you will never "fear a drought" when you know HOW.

U. S. Government, Department of Commerce and Labor Bulletin, Dec. 11, 1909, says: "Campbell's epoch making efforts in behalf of dry farming in connection with the introduction of Durum wheat, promises to turn the semi arid regions, covering millions of square miles, into one of the most prosperous sections in the world."
Mr. Campbell operates a line of Demonstration Farms from Texas to Canada and publishes his methods and results in the Scientific Farmer. Watch 1910!

No matter where you farm—in Virginia, Minnesota, Texas, Washington or Alberta, with irrigation or without, you cannot afford to live without knowing HOW. The vital principles are clearly explained and followed in CAMPBELL'S SCIENTIFIC FARMER (the only publication on tillage). A monthly, \$1.00 a year. Clubbed with our paper at the single price of our paper, even on renewals.
