Extensive Repairs

Manager Robert... improvements to the... will be greatly appreciated by the patrons during the irrigating season. The capacity of the pipe from Water street... has been greatly increased, a six inch pipe replacing a four inch one. However, the greatest improvement will be between... and the head of the system. At one place a change is to be made where the pipe comes over the hill between... and Bullard... and an additional 100 feet pressure will be gained thereby. The most improvement will be at the head of the system, where about 450 feet of seven-inch pipe is to be laid, and which will give an additional 1.0 feet pressure and also greatly increase the supply. The present intake is through a six-inch pipe, and by increasing the size to seven inches it is expected that the flow will be sufficient to supply all needs for years to come. Plans are now being made for a

Compare Favorably

That Lake county lands compare favorably with those of the adjacent sections of the state of Oregon, or California is shown when the experience of Peter Jacobson and his sons Jacob and Henry, is cited. These gentlemen have lived in California for thirty years, and experienced the changes that have come over the "Golden State." A short time ago they came to Oregon and looked over the famed Mefford and Ashland district, searching for low priced lands, their investigation taking some months. Later, they went to Klamath Falls and were told there that the vacant Government lands of Lake county were worthless for agriculture. But as they had come from hardy pioneer Teutonic stock, they felt that a personal investigation would be worth the money and time spent. On the way they ran into one of the "Chronic movers" that every land has at some time or another and he told them a tale of woe that would almost move a person to tears. Nothing daunted them and on they came to Lakeview, heard the various stories that a person will hear at times and then went with one of the locators to Christmas Lake Valley where they selected 320 acres of land near Fort Rock. Just think of getting that amount of land in one family at one time and for the mere paying of the Government filing fee and the cost of the trip and location charges. These men after they had seen what was being done in seven townships that they crossed, made the statement that the land that was open to homestead entry in that valley is as good from a soil standpoint as any that they had seen in the Mefford district which is selling for from three to five hundred dollars per acre and with none of the hillsides that that part of the state is infected with as the land that they took in Christmas Lake valley is comparatively level. Every man that investigates what Lake county has to offer and will go into the various valleys of the county is able to see for himself what an opportunity the county presents with its many thousands of acres of government lands, its cheap deeded lands and prospects of future development. Where can a man get 320 acres of land open to entry that is better than can be secured here.

New Stage Office

The office of the Southern Stage Co. is now located in the Watson block in the room occupied by the telephone company. Beginning June 1 the Western stage line will also move its office to the same place, and on July 1, at which time P. M. Corey takes charge, the Eastern will also be removed to the same location. The Northern may also have its office in the same place after July 1, when S. F. Chandler takes charge of the route. Such an arrangement will prove very convenient to all concerned.

To Light Consumers

All users of electric lights are cautioned to have their oil lamps ready for use during electrical storms, as the current will be shut off without fail whenever danger threatens. N. P. Jensen 18-4t
