Our Line of Wall Paper Samples and Decorative Goods. A Good Stock of Cheap Paper now in. We want your trade.

The Lakeview Decorative Co.
 Moore Building.

LAKE COUNTY ABSTRACT CO.

Incorporated.

A Complete Record

We have made an entire transcript of all Records in Lake County which in any way affect Real Property in the county. We have a complete Record of every Mortgage and transfer ever made in Lake County, and ever Deed given.

Errors Found in Titles

In transcribing the records we have found numerous mortgages recorded in the Deed record and indexed; and many deeds are recorded in the Mortgage record and other books. Hundreds of mortgages and deeds are not indexed at all, and most difficult to trace up from the records.

We have notations of all these Errors.

Others cannot find them. We have put hundreds of dollars hunting up these errors, and we can fully guarantee our work.

J. D. VENATOR, Manager.

Here is Where You Get Your Money's Worth!

When you buy Mutton Stew at 6c per pound.

Have you tried Our sugar cured Hams, Bacon?

No better made any where.

Lard, home kitted rendered, absolutely pure, 5 lb. buckets \$1.00

In 40 lb. cans, 18c. Fresh frozen Oysters, \$1.00 per can. Krout 50c per gallon.

All kinds of first class fresh Meat and Sausage kept on hand.

We will pay the market price for good beef and pork-hogs. Cash on delivery.

Come and get acquainted with us.

Respectfully, **GOOSE LAKE VALLEY MEAT CO.**

THE INVALID'S HAIR.

How a Woman Sufferer May Be Spared Much Pain.

In every one's life there comes the work of having to comb or disentangle the hair of a woman who has been sick. It is not an easy task. It requires patience and a good deal of knowledge. Those who have never done the work may be glad to stow away in their memory these facts: That knots in hair should always be disentangled from below, not above.

In smoothing and combing a sick person's hair the first work is to part it from forehead to nape of neck and brush the two divisions well away from each other.

The hair should be separated by the comb into small divisions, one at a time, beginning at the forehead. The combing should begin at the end of hair, never at the scalp. The hair near the head should be securely held by the hand and twisted over one finger so that the scalp will not feel any pull from the comb.

Begin work about an inch from the end and gradually work up. When a knot is struck it should be separated, if possible, from the smooth hair and loosened by the teeth of the comb at its lower edge.

The comb should not be placed above it, as this will make it more obdurate and snarl the other hair. If a knot is loosened by the teeth of the comb inserted into the outer edges and shaken gently, the hairs uncoil and spring back into the rightful position.

A little skill and a little patience will teach a person how to disentangle any snarl with speed and ease.

When each division of the hair has been gently combed out and separated from those that are uncombed, all the hair should be drawn back over the shoulders and the comb gently run through it from forehead to ends.

If the patient remains in bed the hair should be again parted down center and softly braided into two plaits which have the ends turned under and securely tied with baby ribbon. Be sure not to make these plaits too tight. They should not start at the roots of the hair, for this causes a constant pull on the scalp, which results in soreness or headache.

How to Tell Good Wine.

The connoisseur tells good wine from bad by taste alone, but most men are not connoisseurs, and to most the following easier methods, guaranteed by an expert, prove useful:

The artificial coloring test: Soak a woolen thread in the wine and, removing it, drop on it a little vinegar. If the vinegar turns it bluish the coloring is natural, but if it turns it pink a chemical coloring matter has been used.

If the wine has been fortified with alcohol the addition of cream of tartar in the proportion of one gram to the quart will cause a granular precipitant to settle in the bottom.

If it contains sulphate of potash—a chemical that helps to hide the bad taste of a wine that has turned—a few drops of oxalate of ammonia will quickly produce a deposit.

How to Make Coconut Candy.

Buy one large coconut and in breaking it open save every bit of its milk. Pour a pound and a half of granulated sugar into a pan with the milk of the nut and heat slowly together until the sugar is melted and then let it simmer for about five minutes. Grate the fresh coconut and add it slowly. Boil for ten minutes after the coconut is all in and stir constantly to keep it from sticking to the bottom of the pot and burning. Pour out on to buttered china plates and cut into squares. This should then be set into a cool place and left for forty-eight hours, as it takes about that time to harden.

How to Secure Flaky Pie Crust.

One housekeeper noted for her flaky pie crust, which is never heavy nor soggy at the bottom, attributes her unvarying success to the fact that she never puts a pie flat on a table when removed from the oven. She takes it from the pan and rests it upon a wire screen, elevated so that air gets at the pie from all sides. The pies cool so quickly that there is little or no danger of their becoming steamed or soggy. Never put a pie away until it is perfectly cold and then do not place in the refrigerator or its flakiness will be ruined.

How to Prevent Ingrown Nails.

Boys who "simply grow" suffer torture with ingrown toe nails. The natural instinct of the boy is to cut the toe nails, as he does his finger nails, in a semicircle at the top. Teach him to reverse the cutting, making a dip or "v" toward the center of the nail, and not cutting down at the corners. It is well also to file the nail a little in the center at the top and always to keep the skin pressed back around the root of the nail. A festering, ingrown nail is just one step from blood poisoning.

How to Corn Beef Tongue.

To corn a beef's tongue wash it and wipe dry. Make a pickle of a gallon and a half of water, half a pound of brown sugar, two and a quarter ounces of salt and half an ounce of saltpeter. Boil for half an hour, skim and when cold pour over the tongue. Keep in a crock for a week in a cool place before using.

How to Wash Paper Mache.

All articles made of paper mache should be washed with clean water, without soap or suds. When the articles are washed they should be placed on newspapers to dry. Brush off the flour and the pieces will be like new.

SIRES AND SONS.

J. B. Hale of Georgia, the "pench king," has 350,000 trees in his southern orchards alone.

Archer M. Huntington, the son of the late Collis P. Huntington, is widely known as a student of Spanish literature and of Spanish-American history, and it was he who founded and endowed the Hispanic society.

Chung Ling, a priest of Buddha, well versed in all the mysterious knowledge that is secreted in those mystic temples of the plains of China, is a student in the first grade of the Franklin school night class for foreigners, Washington.

Henry E. Legier, the librarian of the Chicago Public library, has for many years made a practice of recommending twenty books each for the different classes of readers who use the library. He divides the books for this purpose into books for men, women, girls, boys and young children.

Colonel Charles Chaille-Long, soldier, lawyer, explorer, diplomat and author, has been honored by the American Geographical society, which has awarded him the Daily geographical medal for his services in Africa. The special work for which he was honored was the solution of the Nile source problem.

The Count of Turin, the Duke of the Abruzzi's brother, has been proving himself a mighty hunter in Africa, whence he is returning after a great hunting expedition. He brings back a splendid collection of stuffed animals and skins, which are to form a special section of the Zoological museum at Florence.

Sporting Notes.

Phillips-Andover plans a \$50,000 swimming pool.

Ed Geers, the veteran harness driver, is seventy-nine years old.

Frisco basketball players must register with the Pacific Athletic association.

The St. Louis Nationals and Americans have each seventeen pitchers on their ball teams for the coming season.

William J. Glover of Baltimore, who claims the long distance swimming title, has begun training for a swim from the Charlestown bridge to Boston light, in Boston harbor, next summer.

Moving pictures of the tennis matches for the Davis international cup played in Sydney, Australia, between McLaughlin and Long of San Francisco and Brooks and Wilding were brought to this country by Long.

The Writers.

Mrs. Anna Robeson Burr, the author, is a Philadelphian, a daughter of the late Henry Armit Brown. She is a homemaker as well as an author, has two small daughters and belongs to no clubs, movements or female agitations of any sort whatever.

Sven Hedlin, the explorer and author, is a Swede, forty-four years old and unmarried. His home is in Stockholm, but since 1885 his time has been spent largely in the wildest regions of Asia. He is a good linguist and has received titles and medals from various governments.

Harold MacGrath is on his way around the world, having the very finest kind of a time, hobnobbing with ambassadors, lurching in the shade of the pyramids and in the ruins of Karnak, storing his mind with a thousand romantic hints at Athens, at Bagdad, at Benares and Mandalay.

The Royal Box.

Every morning of his life Alfonso XIII. has a good rump steak and potatoes for his first breakfast, often preceded by eggs and sometimes followed by salad and fruit.

The Kaiser from his private purse makes a grant amounting to about \$15 on the birth of an eighth son in any family of the same father and mother. The Kaiser also promises to stand as godfather to the lucky eighth son.

The Princess of Wales has a fan covered with 6,520 woodcock feathers from the wings of 3,260 woodcocks, there being only one feather of the sort in each wing. The Prince of Wales supplied the birds, and the making of the fan occupied one hour a day of a woman's time for more than a year.

Train and Track.

Narrow gauge trackage is used only for industrial railways at present.

In England street car conductors are paid no more than laborers till they have served two years, when they receive the maximum rate of 12 cents an hour. Motormen are paid a shade more.

The famous engine No. 999, which used to haul the Empire State express when it became known as the fastest train in the world, now occasionally does the ignoble work of hauling a freight train on the Rome, Watertown and Ogdensburg division of the New York Central railroad.

English Etchings.

Women may be peereesses by royal grant, but cannot sit in the house of lords.

The king has power to dissolve parliament even before it has attempted any business.

Survey cameras for use from balloons are now in constant use in the British army.

In England's trade last year there was a decline of 10% per cent in the first quarter and an increase of 10% per cent in the last.

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

A YIELD OF 67 BUSHELS OF WHEAT PER ACRE

at the Nebraska Station at North Platte, Nebraska, is causing everybody that hears of it to TURN AROUND and ask HOW? A 50-bushel yield is not unusual, and there is no reason in the world why you cannot learn HOW. Practically all these bumper crops have been produced with only a few inches of rain during the growing season, so you will never "fear a drouth" when you know HOW.

U. S. Government, Department of Commerce and Labor Bulletin, Dec. 11, 1905 says: "Campbell's epoch making efforts in behalf of dry farming in connection with the introduction of Durum wheat, promises to turn the semi arid regions, covering millions of square miles, into one of the most prosperous sections in the world."

Mr. Campbell operates a line of Demonstration Farms from Texas to Canada and publishes his methods and results in the Scientific Farmer. March 1910!

No matter where you farm—in Virginia, Minnesota, Texas, Washington or Alberta, with irrigation or without, you cannot afford to live without knowing HOW. The vital principles are clearly explained and followed in CAMPBELL'S SCIENTIFIC FARMER (the only publication on tillage). A monthly, \$1.00 a year. Clubbed with our paper at the single price of our paper, even on renewals.

You will meet business men at Swenson's Restaurant.
