

Beware the So Called "Rubber Roofing"

There are countless substitutes for the genuine Ruberoid which are advertised as "rubber roofings." Beware of them. For rubber in a roofing is a sin against nature. "Rubber roofing" is either a fraud, on its face because it contains no rubber, or it is a roofing so poor as to be almost valueless. The genuine Ruberoid contains no rubber.

Rubber roofing is waterproof, like rubber. It is flexible, like rubber. But the resemblance ends there.

Like rubber, it remains waterproof and flexible when exposed to the sun, the rain, the heat, the cold, the air.

Rubber rots after slight exposure. Ruberoid does not. Its life and durability under the severest weather conditions.

Rubber decomposes rapidly under the action of fumes and gases and acids, while Ruberoid resists them. Ruberoid roofing has, in fact, been used to line vats in which acids are kept.

Ruberoid contains no rubber. It contains no tar. It contains no asbestos. It is not an asphalt roofing.

Ruberoid. Before they are laid, they look like Ruberoid. But none of them can give the vital element which gives to Ruberoid its properties. No other maker of roofing can use the exclusive processed Ruberoid gum.

This processed gum, too, is the secret of Ruberine cement, which goes with Ruberoid.

By means of Ruberine cement the seams and edges of the roofing are joined together, and make a one-piece roofing against leaks—sealed against the elements.

Ruberoid can also be had in a variety of colors, Red, Brown, Green, are on the roofing—they are a part of it. They do not wear off or fade.

Protection Against Fire

Ruberoid is almost perfect protection against fire. Hot coals thrown on a Ruberoid roof set fire neither to the roofing nor to the building underneath.

Ruberoid is tasteless. It is not a source of any odor which is objectionable to the gathering of people.
