SNOWSHOES FOR HORSES

Mrs. George Westinghouse Provides

Protection For Helpless Equines. From the royal household of the king of Wurttemberg at Stuttgart there came recently a cable order for a full set of horse overshoes to be furnished for the stables of the king. The cable went to Pittsburg, the explanation being Mrs. George Westinghouse's interest in the horse oversboes. A representative of Mr. Westingbouse turned the message over to a manufacturer of these overshoes.

Mrs. Westinghouse some time ago gave to the Humane society of Pitts burg a supply of overshoes to keep horses from slipping on the ice and snow. A newspaper notice to this effect appears to have reached the king.

Mrs. Westinghouse is accredited with first having made the manufacture of the horse overshoe possible. She supplied funds for an inventor who had an idea for fastening chains under the frog of each horseshoe, giving the

MRS. GEORGE WESTINGHOUSE, THE HORSE'S FRIEND.

horse a rough hold on the ice of slippery streets. Mrs. George Westinghouse was before her marriage, which took place about a year ago, Miss Violet Brocklebank, the pretty daughter of Sir Thomas and Lady Brocklebank of Ireton Hall, Cumberland, England. The meeting of the young couple was able time to meit if allowed to remain very romantic, taking place in the ma- at the bottom of the vessel, but if we chine shops of the great Westinghouse | noid it up in the spoon near the surmother while visiting friends in Pitts more rapidly. This is owing to the burg one day went through the shops sugar as it melts rendering the portion with young George Westinghouse, was, of the tea containing it heavier. ## A Simple Six Room Bungalow.

Design 861, by Glenn L. Saxton, Architect.

PERSPECTIVE VIEW-FROM A PHOTOGRAPH.

In the bungalow line this design is a gem to study. This is what is called a six room bungalow. The rooms are all thrown together, the living room opening up with the reception hall and forming practically one large room twenty-nine feet wide. There is a little hall from the back of the bungalow which allows one to pass from the front to the rear of the house without entering or passing through any of the rooms, into each of which there is a hall entrance. This is as near a perfect floor plan as can be got up for a bungalow of this size. There is a small basement under the kitchen, with a bedroom across the rear. The size is 30 by 38 feet over the main part. The first story is nine feet in the clear, finished with hardwood floors throughout and Washington fir for finish in each room. Cost to build. exclusive of plumbing and heating

By special arrangement with me the editor of this paper will furnish one complete set of plans and specifications of design No. 861 for \$25.

GLENN L SAXTON.

How Sugar Melts.

If we drop a lump of sugar into a cup of tea we find it takes a considerworks. Miss Brocklebank and her face of the figuid it dissolves much was working as a day laborer in his sweetened part, therefore, descends, To quote Miss Violet, he was "perfect- with unsweetened or only partially great inventor. Several months later sugar is placed or permitted to lie at George Westinghouse went to England the bottom of the cup it dissolves until above it acting for a considerable time whips in England. And it was she offsetual in Gringing about the uniin a four in-hand to the station, sax frequently sweetened by the same stirring up process.

The Family Pair.

The wriggly stillness of the study period was broken by a standard door, and a thin boy in dirry, regard eleties slauched across the room. Hallway to the teacher's desk he drawfed, "Pawants that you should let Jim go home right now." As Miss Davis looked a little doubtful, he added, "He kin come back right away."

The permission given, the two badly solled, half starved sons of the most shiftless family in the district shuffled down the stairs. Very shortly Jim returned, wearing a pleased and important smile on his pathetic little face.

"I come as soon's I could. Pa's brother's dyin' to Poplar," he announced cheerfully. "That's why pa wanted

"But you weren't gone long; you didn't stay home. I can't see why you went at all," answered the bewildered Miss Davis,

"Why, pa's goin'," explained Jim. "Yes, but what has that to do with you?" asked the teacher.

"Pa had to have his suspenders," was Jim's matter of fact reply .- Exchange.

The Power of Snails.

One day by way of experiment I barnessed two common garden snails to a toy gun carriage to see if they could pull it along, says a writer in a London magazine. Although the gun carriage was a heavy leaden one, the snails pulled it so easily that I loaded the body of the carriage with small tached a toy cannon (made of lead and snails and their additional load moved on once again with the same apparent ease. Out of curiosity I decided to shot and to my great surprise found ment to make its point plain.

the total weight to be almost one pound. I venture to think this a very good load for two snalls to manage.

The Frying Pan.

"People are atways decrying the frying pan," said an experienced cook. "but the thing they refer to-cooking meat, etc., in a shallow pan with butter as fat-isn't really frying it; it is sauteing. The real frying pan is a deep kettle filled with not clear fard or olive oil. In this the food-doughit crisp and brown on the outside and feathery and light on the inside. Food cooked in this way is entirely digestible if properly unde. But so many cooks make the mistake of putting too-Sigch shortening in the mixture to be fried, and the fat inside, combining with the fat outside, prevents the formation of the crisp crust and makes the food soggy."

Meanness to a Blind Man. A man with dark glasses over his eves touched the conductor on the

shoulder as the var neared Euclid avenue and East Fifty with street. "Pardon me," the man said, "but it you're the conductor I want to ask a.

favor. I'm blind, and I want you to lead me over to the curb when the cur stops; if you'll be so great "Not that I minded the little bother

of done that for him," remarked the conductor when he got back on his car, "but 'tomat right to let a blind man go around all alone like that at night trying to find his way around in the dark."-Cleveland Plain Dealer.

His Idea of Economy.

"It's all very well for you to preach economy," said his wife, "but I notice whenever I cut down expenses that you smoke better cigars and spend more money for your own pleasure than at any other time."

"Well, confound it, what do you suppose I want you to economize for, anyway?"-Chicago Record-Herald.

Up and Down.

Mistress-Here's the man for that clock to be repaired. Get it for him. Nora-And, shure, where is it? Mistress-Upstairs, of course. Nora-Faith, an' I thought it had run down! -New York Press.

When rural carriers have to make a daily round of from twenty to twentyfive miles, rain or shine, snow or mad. the matter of good roads is a mighty pertinent one, and it is so held by the postal authorities at Washington, as a good many patrons in the northern snowbound states have likely concluded during the past few weeks. Some patrons we heard of the other day who live not more than forty miles away came to town following shot. The snails, however, were more a big snowstorm which blocked the than equal to the task. Anxious to roads and gave a particular carrier test their powers still further, I at- fits because he did not make a certain piece of road and distribute mail along it. When they were asked if they came to town via this piece of unbroken road they answered; "Why, no. We came around 'the other way.' weigh the cannon, gun carriage and The incident needs no further com-
