If not paid in advance, \$2.50 the year

## Notice to Subscribers

Subscribers to the Examiner who remove from one locality to another, or change their postoffice address, should remember to drop this office a card so their paper can be addressed to the right postoffice.

Lakeview, Oregon, Thursday, January 26, 1911

The University of Oregon wants \$534,418.92 for its maintenance during the years 1911 and 1912, while the Oregon Agricultural College asks for \$410,000.

Paul Morton, president of the Equitable Life Assurance company of New York, died very suddenly last Thursday evening. His successor has not yet been named, but it is rumored that Charles D. Norton, secretary to President Taft, will be the man.

At least one hundred circular letters describing the lands in the Lakeview district, were sent out last week by the local Government land office. These were sent on request of parties throughout the United States, all of whom had heard about this section and wished further information regarding its advantages in agricultural and stock lines. We are certainly getting lots of advertising, and the best of it is that those who come here are not disappointed in what we have to offer.

Lyman J. Gage, former Secretary of the Treasury, in an address before the Illinois State Bankers' Association, discussed the report of Senator Aldrich to the Monetary Commission. Mr. Gage said: "I think the report of Senator Aldrich is one that should appeal to every banker of the country for careful consideration. The need of something further in our banking system of today is too well known to require pointing out. The general plan, as offered by the Senator appears to me to have much of merit."

The big Democratic caucus on curried at Washington last week and the program arranged by the leaders was carried out to the letter. Champ Clark of Missouri was nominated for speaker of the next house, and rousing cheers on mention of his name for the presidency; Judson Harmon was also cheered in the same connection; a ways and means committee was chosen to nominate the standing committee and frame the tariff legislation for early action by the next congress, while a New York member was read out of the party and a list of resolutions and a host of speakers were featured at the caucus. There were only eight absentees among the old and new democrats of the 62d congress.

The report of the President of the Board of Regents of the University of Oregon shows a great growth in the institution in the last four years: A total gain of 165 per cent, not including the new departments added within this four year period, a gain of 108 per cent, and a gain of 93 per cent in the College of Literature, Science and the Arts, and the College of Engineering. The total enrollment of the University up to January 14 of the present year is 1,414, exclusive of duplicates. The collegiate departments at Eugene show 729; the School of Law, Portland, 176; the School of Medicine, Portland, 74; the School of Music, Eugene, 192; the Correspondence Study Department, 343 in the state at large. Thirty of the thirty-two counties of the state are represented in the University, and nineteen states and foreign countries.

California has displaced Colorado as first in gold production, according to the preliminary figures for 1910 issued by the United States Geological Survey. Nevada outstrips Alaska for the same period, taking third place, while Arizona was awarded seventh place over Montana which it held in 1909. South Dakota and Utah retain their present positions as fifth and sixth respectively. The total gold production for the year was 295,053,214, a decrease of \$3,618,185, compared to that of 1909. Statisticians attribute this to the temporary suspension in 1910 of several important gold mines in Colorado, South Dakota and Alaska. Increase in production in California is \$400,000; in Colorado the decrease was \$1,400,000, while Nevada gained \$1,500,000 in her output.

The first number of Paisley's new paper, the Chewaucan Press, made its appearance last week. The copy reaching the Examiner was scarcely legible. Paisley certainly is a good field for a small newspaper, and the newspaper should be a credit to the town, for the town is certainly judged by its newspaper. F. L. Young is editor of the Press.

## CONSERVING OUR WATER RESOURCES

### State Engineer Lewis Explains Workings in Oregon

State Engineer John H. Lewis argued with figures and statistics before the Commonwealth Conference at the U. of O. that the state's annual tax on water power development seriously retard industrial and financial development in the state. He showed that the tax in no measure begins to produce sufficient revenue to offset this retarding influence. "The equivalent," he says, "of seventy millions of dollars worth of coal is being annually wasted in the undeveloped water power of Oregon. This energy should be developed and used, and Oregon will prosper in proportion as this is accomplished.

"The engineering and financial difficulties in the way of development are usually sufficient to defeat construction except in the most promising cases." To add to this a heavy annual tax, imposed only on new projects, and with the idea of securing a revenue, Mr. Lewis thinks defeats, or at least seriously retards, development. To substitute for the tax, Mr. Lewis believes that an annual license should be imposed on all companies, old and new alike, simply for regulation purposes.

### 8th Grade Exams

The students taking the eighth grade examination last week were: Louise and Emma Arzoer, Beryl, Mervin and Dick Vernon, Clarence Hahn, Donald Metzger, Valrie MacDowell, Pauline Oliver, Mary Young, Floyd Smith, Nathaniel McCurdy, Wm. Arzoer, Bertha Loftus, Nora McColey, Floy Berard, Mary Heryford, Dane Lynch, Alfred McCool, Lee Heryford, Ross Rehart, Winnie Bosworth, Laura Melick, Myrtle Stone, all of Lakeview and Cecil Taylor, of New Pine Creek.

The examination was the most exacting that has yet been held, and those passing may well congratulate themselves.

### Mercury Takes a Drop

During the past week rather cold weather was experienced, the thermometer reaching 13 degrees below zero Tuesday morning. The cold spell lasted but three days, however, a snowfall following Tuesday night, in all perhaps six inches of snow fell during the week, and now about 15 inches of "the beautiful" covers the valley.

The cold snap caused a number of water pipes to burst, and in some instances doing more or less damage. The hot water coil in J. C. Dudson's range "blew up," and caused quite a bit of excitement in the household for a time, but fortunately no one was injured.

### Surprise Party

A surprise party was given on Miss Cuba Amick at the home of Mr. and Mrs. Tom Cloud on Friday evening last. Refreshments were served and games were played until a late hour. Among those present were Erma Sharps, Lorena Bailey, Louise Storkman, Bessie Burgess, Docia Willis, Mabel Rice, Margaret, Ruth and Ellen Bernard, Lura Snyder, Walter and Chester Dykeman, Frank Cloud, James Burgess, Geo. Whorton, Fred Cronemiller, Bert Snyder, Walter Drenkel, Norman Jacobsen, James Judge and Harvey Cannon. All report having enjoyed themselves thoroughly.

### Card of Thanks

To the many kind friends and neighbors who lent their assistance during our recent sad bereavement, we desire to express our sincere thanks. On our arrival here with the remains of our beloved mother, Mrs. M. E. Kinsey, we were met by kind friends who did everything possible to make our burden lighter, and we therefore thank them from the bottom of our hearts and assure them that their many kind acts will be ever remembered.

MR. and MRS. JOHN GILMORE, WM. and FRANK KIMSEY.

## FARMERS COURSE AT O. A. C., FEB. 13

### Work Will Deal Entirely With Many Vital Problems

The annual Farmers Week Course at the Oregon Agricultural College has been set for February 13 to 18 and the plans for the work are being rapidly brought to completion. In addition to the regular lecture and demonstration work in fruit growing, orchard work, marketing, soils, drainage, farm management, stock raising, home management, insect and disease pests, butter and cheese making and kindred subjects, two special features in the form of discussions and demonstrations on the subject of good roads for the state and irrigation in the Willamette Valley will be added to the program.

A large corps of special lecturers, many of whom are representative men of this state, have been secured to assist the College experts in carrying on the work. This has made it possible to fill every hour of the day from eight in the morning until ten at night with special features.

The work will deal entirely with vital problems which are claiming the attention of the people of Oregon. Those in attendance will be urged to bring up for discussion and demonstration subjects in which they are particularly interested and which pertain to the peculiar problems arising out of their experience and which are characteristic of their particular community. The work will be carried on very much in the form of a large farmers' institute with a special division giving particular attention to the various features of home making and management.

### Davis Creek Items

The N.-C.-O. Surveyors have rented the McKinney house in Davis Creek and will use the same for office and apartments.

John Davis is in from the West Side and reports sheep doing finely. He is feeding them hay while the snow is on the ground.

Albert Berry is moving his house this week.

Chief Engineer Gen. S. Oliver of the N.-C.-O. was in Davis Creek Sunday and Monday.

Wm. F. Fisher was in Alturas several days last week on business.

Wm. Kirkpatrick is feeding cattle for Carse Crowder. He reports cattle doing well.

A very pleasant card party was given at the home of C. T. Watkins on Monday evening. About twenty five were present and all vote Mr. and Mrs. Watkins the best of enter-tainers. Dainty refreshments were served by Misses Katie Dutton and Inez Lee.

There will be a measuring social at the church Friday evening. The cost is 3 cents for each foot tall and one cent for each inch additional. So in this case it does not pay to be very tall.

Billie Drane has filed on a vacant piece of land near Lindale school house. Billie expects to raise alfalfa seed.

The snow has brought out the sleighs and every one is having sleigh rides.

The Davis Creek Orchards Co. have finished their dam for the winter and are now ready to catch the water for the 1911 crops.

There is plenty of snow in the mountains, so the water supply for this year will be more than enough for every one.

S. J. Dutton and Berle Gulliams were called to Alturas on Sunday as jurors, but were dismissed Monday morning on account of the Judge not being present. The N.-C.-O. being blockaded was the cause of the Judge not being present. The jurors were dismissed until April 3d.

Flour, \$1.75 sack or \$3.50 per 100 at Bieber's Cash Store

### Portland Wins

After spending much time getting the evidence of the famous "Hetting case" that caused a war in the Pacific Coast League between the Oakland and Portland clubs, the National Commission, the highest court of appeals in baseball, reversed the decision of President Graham and gave the three games in dispute to the McCredies. The Commission took away the three games that were given to Oakland by Judge Graham. However, Portland and Spokane were fined \$1000 each for "farming" Hetting.

Chamberlain's Cough Remedy is a very valuable medicine for throat and lung troubles, quickly relieves and cures painful breathing and a dangerously sounding cough which indicates congested lungs. Sold by all good dealers.

## MEASURE TO CHECK ANIMAL DISEASES

### Bill Introduced to Better Protect Livestock Industry

STATE CAPITOL, Salem, Or., Jan. 17.—(Special.)—Sens. Ota Burgess and Hawley have jointly introduced a bill covering eradication and suppression of contagious, infectious and communicable diseases of animals, providing for the appointment of a State Livestock Sanitary Board and for the appointment of a State Veterinarian and fixing the powers, duties and compensations of such.

Under the provisions of the bill the sanitary board proposed shall include the secretary of the State Board of Health, as an ex-officio member, the remaining six members of the board to be appointed by the Governor, all of these to be actively engaged in the breeding of livestock in the state and must be qualified electors. At least two members of this board must live east of the Cascade Mountains and two members west of the same range. They shall be appointed by the governor only on the written recommendation and nomination by the following organizations: Two recommended by the executive committee of the Oregon Woolgrowers' Association, two by the executive committee of the Oregon Purebred Livestock Association and two by the executive committee of the Oregon State Dairy-men's Association. Members of this board shall hold office for four years, except the first two appointed, who shall be appointed for two years. They shall receive \$2 a day for the time actually served in connection with their duties and shall also receive actual traveling expenses.

The board shall make investigations and exercise a sanitary supervision over livestock and poultry. It is also given the power to publish bulletins, prevent the sale of animals afflicted with infectious, contagious or communicable disease and to pass rules and regulations affecting the same.

The board shall appoint the State Veterinarian who shall also be ex-officio State Sheep Inspector. The veterinarian is to receive \$2000 a year. The board is empowered to appoint deputies to the State Veterinarian when such are deemed necessary. If it is further believed necessary, the board may empower the County Courts to name county veterinarians.

### Silver Lake Items

Frank Powers arrived in town last Friday with 7500 pounds of freight for Jas. Wakefield.

The family of P. D. Reeder has been on the sick list for the past week, but are now on the road to recovery.

Royal W. Davenport, of Portland, a government hydrographer, was in this vicinity a few days ago looking after work in this line.

Mrs. M. Sults of Summer Lake, has been here the past week caring for her daughter, Mrs. C. R. Kiger, who has been ill, but who is now reported much better.

J. B. Bonham received word last Saturday from his daughter, Nevada, to the effect that she arrived safely at Klamath Falls. She stood the trip well and was feeling much better than when she left here.

James Wakefield, H. Adams and Andy Foster have returned from the lava beds where they went to catch all the congars that roam Lake county, and today fur and hides are so scarce from the effects of these hunters, that common people from now on, will not be able to buy a rug large enough to put their feet on.

Alex. Davis, a prosperous stockman, came up from Klamath marsh country last Saturday and was shaking hands with old friends. He reports a three and a half foot fall of snow early in the winter, which mostly disappeared soon after it fell. A snowfall of about a foot fell later, however, which has stayed with them. He reports a that stock of all kinds are doing well.

### Valley Falls News

L. B. Moss stopped last Friday enroute to the desert with a load of freight. He encountered some difficulty in getting this far on account of snow drifts.

U. A. Utley, game warden, has gone over to Gunnison way on business connected with his office.

John Pfinger, who left Lakeview one night in a storm on foot, reached this place the following noon in a demented condition. His feet had been frozen slightly and he had evidently suffered considerably from the exposure. The Sheriff was notified and sent for him at once.

The storms during the past ten days have been about as fierce as we have ever seen, the wind attaining an enormous velocity and piling the snow up in huge drifts, that are practically impassable on the roads.

"Bud" Graves paid us a short visit recently while on his way to the desert with Geo. Chandler. "Bud" says he is enjoying himself immensely.

Flour, \$1.75 sack or \$3.50 per 100 at Bieber's Cash Store

### Sheep in Danger

Alturas Plaindealer: Sheriff Smith and the editor of this paper returned Tuesday from Tule Lake. They report about 20 inches of snow from Canby to Dry Lake. From there to Dalton's place on Tule Lake the snow gradually decreases to about 10 inches. Horses and cattle are everywhere being driven to feed, but the snow is too deep for sheep to break a way and unless there is a change in conditions within two or three weeks the loss will be heavy. In fact, every animal that is not fed must perish. It is to be hoped that a thaw will relieve conditions soon.

### SOLVES A DEEP MYSTERY.

"I want to thank you from the bottom of my heart," wrote C. B. Rader, of Lewisburg, W. Va., "for the wonderful double benefit I got from Electric Bitters, in curing me of both a severe case of stomach trouble and of rheumatism, from which I had been an almost helpless sufferer for ten years. It suited my case as though made just for me." For dyspepsia, indigestion, jaundice and to rid the system of kidney poisons that cause rheumatism, Electric Bitters has no equal. Try them. Every bottle is guaranteed to satisfy. Only 50c at A. L. Thornton's.
