**Rabbit Bounty Needed**

In the opinion of Geo. Conn, as well as many others of this section, it is necessary that the present Legislature place a bounty on rabbits. Otherwise the country will be overwhelmed with the pests inside of two years. At present this whole section of the state is literally alive with rabbits, and the wonderful increase during the past year is attributed to the killing of coyotes, on which there is a bounty of \$1.50. Mr. Conn will fence his crops with wire netting this year, as he considers it practically certain that unless he does the rabbits will take everything. It is a question that should be seriously considered by our lawmakers, as a bounty of a few cents for each scalp would have a tendency to keep the scourge down, at least.
