The following circular letter, which ing the past week by W. J. Proudfoot, the local stock inspector.

"The Fight's Now on For Lower Wool Rates.

"President Gooding, of the National Wool Growers' Association, has employed V. O. Johnson, one of the leading attorneys of Idaho, to present the case of the Western Sheepmen to the Inferstate Commerce Commission, pleading for a reduction of the freight rates on wool from all western, northwestern and southwest era points. Mr. Johnson has gone to Washington to appear before the Commission, and an early hearing is anticipated. President Gooding has had this matter up with the Commission ever since the Portland meeting and while in Washington recently.

called on Commissioner Lane and was assure i of an early hearing.

"The rates on wool shipments from western points to Boston, Philadelphis or New York city are considered confiscatory by the sheepmen. The average car of wool pays from \$500 to \$700 freight. Wool is looked apon by the railroads as an extremely desirable class of freight, is not injured by wrecks, is not injured by delays slow freight, yet it is charged almost 100 per cent more than other commodifies in the same class.

Postmaster General Hitchcock and Bourne have been at daggers drawn for the past four years. Hitchcock has tried to use the postal committee to prevent the parcels post and to impose a heavy tax on the monthly magazines. Through the committees he has also been in a position to work politics for Taft's renomination. If Bourne becomes chairman of the committee, Hitchcock will find the old standpatters gone and insurg-

ent republicans filling their places.

A Great Record

Figures compiled by the railroads show that during 1910 not a single passenger was killed on the Union Pacific, Southern Pacific or Southern Pacific lines in Mexico, a total of 17,800 miles.

During that period there was carri ed on thes lines an aggregate of 49,-491,000 passengers, or, in other words, 3,000,000 passengers were carried one mile.

This is the result of the electric block signals and other safety devices, and is believed to have no parali-

GUARANTEE-The E-M-F Company's one-year guarantee which appears in this ad needs no amplification or explanation. It speaks for itself. Every E-M-F car is backed up by a definite promise-the most liberal in motordom. Not only the car but the equipment as well-aside from tires, which are guaranteed by the manufacturers-are included in its provisions. Don't be misled by trickily-worded promises that warrant cars for indefinite periods. Some of these "guarantees," carefully analyzed really mean nothing. The conventional 90-day guarantee is a relic of antiquity-a legacy of the days when the motor car was an experiment, not a standard, staple article. The E-M-F guarantee is a definite promise for a definite period-ONE WHOLE YEAR. Manufacture of a car like this at a figure that makes possible the quoted selling price is the industrial achievement of the age. It is an achievement possible to no other manufacturer of motor cars.
