

# Lake County Examiner

HAS THE CIRCULATION—PRINTS THE NEWS—REACHES THE PEOPLE

VOL. XXXII

LAKEVIEW, LAKE COUNTY, OREGON, MAY 18, 1911.

NO. 20

THE EXAMINER IS THE OFFICIAL PAPER OF LAKE COUNTY

## DUNAWAY BOOSTS LAKE

General Manager of N.-C.-O. Highly Pleased With This Section

## HALL OUTFIT GOES ON RAILROAD WORK

All Railroad Supplies and Freight in Carload Lots Will Be Delivered in Goose Lake Valley Early in June, Says Supt. Hanson

"Lakeview is destined to become the commercial center of Southern Oregon and Northern California, and has agricultural resources in the adjacent country to maintain such position," writes T. F. Dunaway, general manager of the Nevada-California-Oregon Railway after having visited Goose Lake Valley. Being thus favorably impressed with our resources it is not surprising that he should order construction work on the Lakeview extension pushed as rapidly as possible, as is indicated in his letter to the Board of Trade which appears on this page.

As evidence of the fact that the N.-C.-O. Ry. is to be extended to Lakeview at the earliest possible moment, the Hall Construction Company this week started its outfit down to Pitt River canyon to complete a small section of road bed at a point some 10 or 12 miles this side of Alturas. It was expected that other contractors would complete that work, but there was too much delay, and consequently Superintendent Hanson hurried the outfit down

so that trains could be operated into Goose Lake Valley at an early date. A station will be established at the Page ranch, a few miles south of Davis Creek, where supplies for contractors will be delivered, as well as freight in carload lots for merchants and business men. It is expected to have trains in operation within 30 days, and while this will not quite meet Chief Engineer Oliver's expectations, yet weather conditions of the past several weeks would knock prophecies of almost any nature into a cocked hat, as it were.

J. F. Hansen, superintendent of construction for the N.-C.-O., stated to an Examiner representative that he expected to commence construction work at this end of the line just as soon as the engineering department had the necessary data prepared, which he presumed would be in the very near future. Chief Engineer Oliver is very busy with the work recently let, and it will probably be several days before he will be ready to take up the work at this end of the line.

## WAR DECLARED ON HOUSE-FLY PEST

Suggestions as to Proper Method of Abating Nuisance

A special bulletin, issued by the fly-fighting committee of the American Civic Association of Washington, D.C., declares that "war to the death" should be declared upon the little pest.

"Either man must kill the fly or the fly will kill the man," it asserts in bold black headlines. The following "don'ts" and summary of advice are given in the bulletin.

1. Don't allow flies in your house.

2. Don't permit them near your food, especially milk.

3. Don't buy foodstuff where flies are tolerated.

4. Don't have feeding places where the flies can load themselves with ejections from typhoid or dysenteric persons.

5. Don't allow your fruits and confections to be exposed to the swarms of flies.

6. Don't let flies crawl over the baby's face and swarm upon the nipple of its nursing bottle.

7. Clean up your premises, inside and out, and then, as much as you can, see that others do the same.

8. Strike at the root of the evil. The housefly breeds in horse manure, kitchen offal and the like. Dispose of these materials in such a way that the house fly cannot propagate. Screen all windows and doors and insist that your grocer, butcher, baker and everyone from whom you buy foodstuffs does the same.

9. There is more in a well screened house than in many a doctor's visit.

10. After you have cleaned up your own premises inspect the neighborhood for fly-breeding places. Call the attention of the owner to them, and if he does not remove them, complain to the Board of Health.

## Road Improvements

The road between town and Warner Canyon is now being put in first-class condition, and the road scrapers are at present busy north of the cemetery. This thoroughfare is a much traveled one, and the fact that it is being fixed up will be thoroughly appreciated by all who have occasion to use it.

## LIVELY TIMES AT NEW N.-C.-O. DEPOT

Scenes Likely to Be Duplicated Regularly In Near Future

The Ladies Aid Society of the Methodist Church pleased a very large audience Friday evening when they rendered a play entitled "Scenes at the Union Depot." Every seat in the house was sold, the reserved ones being disposed of early in the afternoon. The various scenes presented were unique and represented some which one would be liable to see in any railroad depot. The parts were taken by the members of the church and it is needless to say that all were well presented. Among those who took part were Mr. and Mrs. Harris, Mr. and Mrs. Keene, Mr. and Mrs. Amick, Mr. and Mrs. G. Angstead, Mr. and Mrs. H. Angstead, Mrs. T. H. Cloud, Mrs. J. C. Biglow, Mrs. W. R. Bernard, Mrs. Elden Woodcock, Mrs. J. N. Watson, the Misses Vernon, Mayfield, Storkman, Bosworth, McVey, Vandervort, Fisher, Willits, Corbett, Snelling, and Swenson, and Messrs. Wire, Isehart, C. Dykeman, Archer, J. Burgess, Cannon, W. Dykeman, J. C. Burgess, H. Cannon, Bunting, Brattain, Bailey, Beall, Campbell, Striplin, and G. Angstead. The entertainment netted \$115 clear, which was very pleasing to the society.

## Creditable to Lakeview

One of the most extensive advertisers, if not the largest on the Pacific Coast, writes as follows to the Examiner:

"In connection with this advertisement, permit me to compliment you on the composition. It is one of the neatest ads. that has appeared in any of the publications in which we advertise."

And so it goes all along the line. Lakeview can boast of the best equipped country newspaper office in the State, and the fact that it is such is due solely to the liberal patronage received from the people themselves.

With its new press the Examiner can execute a class of job work that is not excelled in the large cities, the press being equipped with the latest improvements for printing half tones and color work.

## WEED ASTONISHES SAN FRANCISCO

Hauled Up By Police For Speeding His New Franklin

Abner Weed, founder of the metropolis of Siskiyou county which bears his name, and the real thing in "live wires," has been arrested in San Francisco for failing to comply in some way with auto regulations. We were informed that when Abner was booked for the alleged infraction of the law, an old charge of speeding was brought to light, and that he will have to answer both charges. If we know Dad Weed, he will answer them, all right, and in well-chosen words, too, that won't sound like childish prattle. He has demanded a jury trial, and it looks as if the police department of the Naughty City was in trouble, and not Dad at all.

The incident has swelled us up a bit. Think of it! A citizen of Weed arrested in San Francisco for speeding! Guess that's going some, eh? There isn't another town in Siskiyou county that can produce a man who can "go" fast enough to even attract attention in Pat Calhoun's old village by the Golden Gate. Oh! We're on the map, Eh, what?—Summit Outlook.

## "BILL" HAMERSLEY NOW IN WALLOWA

Writes Concerning Coyote --Proof Fence In National Forest

W. R. Hamersley, the noted Government hunter who was called to the Wallowa country to exterminate the coyotes that were afflicted with rabies, under date of May 4 writes the following interesting letter to the Examiner: "The Forest Service has a wolf-proof fence in the Wallowa Forest. The fence is 6 feet high with wire netting 5 feet on the bottom with 2 barb wires on the top. The pasture is two miles square and located in the best range in Wallowa county. It will turn anything excepting the great grizzly. There was a grizzly went through it last summer. They turn 1000 head of ewes in for the season July 1 to October 15. The lambs weigh from 10 to 12 pounds more than range lambs. There is no grazing fee on those in pasture. Just before they turn sheep in the Supervisor has hunters clear the pasture of animals such as bear, wolves, coyotes, cats, etc. This country is very rough, steep, and with the best outside range I ever saw, but not near as good as Lake. My time is up the first of June and you will see me soon."

NEVADA-CALIFORNIA-OREGON RY.  
AND  
SIERRA VALLEYS RY. CO.  
T. F. DUNAWAY  
VICE PRES. AND GEN. MGR.  
RENO, NEVADA, May 8, 1911.  
Mr. V. L. Snelling,  
Secretary Lakeview Board of Trade,  
Lakeview, Ore.

Dear Sir:

I have returned after a very satisfactory trip of inspection over the lines and the projected extension to Lakeview. I desire at this time to thank you, and through you the people of Lakeview and vicinity, for their cordial reception and hearty co-operation for the advancement of our mutual interests.

As a result of this visit, I have ordered our construction department to spare no expense and crowd the work of building northward as fast as possible. Orders for additional freight equipment have been placed to take care of the extra tonnage, and shall also install a refrigerator car to properly care for the fruit, canteloupe and melon crop and dairy products.

The Lakeview country, however, is not well known on the outside as it should be, and to this end I would urge upon your people the need of greater publicity work. Lakeview is destined to become the commercial center of southern Oregon and northern California and has the agricultural resources in the adjacent country to maintain such a position. That the world at large may know this requires advertising and publicity. If in this movement the same results can be obtained at a less expense, or greater results at the same expense, the railroad company will co-operate with you. The advent of a railroad into your section means much for its future, and this fact should be taken full advantage of.

Yours truly,  
(Signed) T. F. DUNAWAY.

## Mill Started

Surprise Valley Record: A. G. Duhme, the rustling Fandango Mill man, was here yesterday, attending to business matters. The summer's work started up the first of the week with a crew of forty men, and the output will be larger this year than ever before. He has 26 horses for logging and hauling purposes, and will haul a large amount of lumber to Surprise this season. The Fandango mill is the largest lumber plant in the northern part of the state and is located in a big body of timber, and is prepared to turn out rough lumber, surfaced lumber, door and window casing lumber, shingles and mouldings at lowest possible prices.

## Nixon Weds

The marriage of W. J. Nixon and Blanch E. Wells was solemnized last Sunday, Winslow Bayley, J. P., officiating. Both parties are well known in Lakview, and their many friends join the Examiner in extending heartfelt congratulations. Mr. and Mrs. Nixon have taken charge of the well known Mud Creek station and will make it more popular than ever.

## Want a Railroad

Cedarville Record: Nearly every stranger that drops into the valley is sized up as a Southern Pacific, Western Pacific, Grand Trunk, Electric or some other railroad man. The wish is probably father to the thought. We need a railroad in the valley. We need it bad, and some of our people are sanguine that we will have it soon. Railroad rumors are in the air, and are getting onto the people's nerves. They are even arguing as to where the depots will be located and the lines will be run. At present we know nothing about it, but along about the first of December next there may be something definite.

## Judge Noland Here

Judge Noland came over from Klamath Falls a few days ago and received a most cordial greeting from his many friends and admirers here in Lake county. The Judge expressed himself as being highly pleased with the very flattering vote received here, and although not successful in being elected yet nevertheless he appreciates the good will shown toward him by the people of Lake county.

## GREATER LAKE COUNTY

Plans Formulated to Inaugurate Big Boosting Campaign

## ALL SECTIONS EXPECTED TO JOIN HANDS

Under Name of "Lake County Development League" Work Can Be Prosecuted In Every Section Which Will Prove Mutually Beneficial

For many moons past the local boosting organization has been on what might be termed the down grade, and all efforts to resuscitate it seemed futile. However, this week an effort has been made to evolve a plan which would have the support of every citizen who has the best interests of the entire county at heart. Briefly outlined the plan is to organize the Lake County Development League with as many members as possible who will agree to pay one dollar each per month for a year. Such payment is simply to meet the running expenses of the organization, and when funds are necessary for publicity work of any kind additional money will be raised by subscription.

The work of the League will be in the hands of a board of five managers who will elect a chairman and select a secretary to attend to the business of the organization. By this method it places the responsibility of the success of the League in a few hands, and they will necessarily have to make good, for they can't put its failure on to

some one else.

A very enthusiastic meeting was held at the Court House Tuesday evening, when Judge Daly, Daniel Boone, A. L. Thornton, Dr. E. H. Smith and others spoke pointedly on the question of our need of more and better boosting, and last evening definite steps were taken to carry out the suggestions. Mayor Bailey presides, and after agreeing on the general plan outlined above, A. W. Orton and V. L. Snelling were appointed a committee to solicit membership on the dollar-a-month plan. They are to report tomorrow evening, when it is expected a board of managers will be chosen and the work begun at once.

While it is not presumed that every individual interested will argue that the plan is the best, yet it seems as though it should meet with support, for all concede that such work is absolutely necessary at this time.

Walter Dykeman has now fully recovered from a bad sprain to his ankle, which was injured while playing ball.

## TO SINK FOR MORE ARTESIAN WELLS

Numerous Wells to Be Sunk in Neighborhood of Paisley

Since L. P. Klippel, of Summer Lake succeeded in getting an artesian flow of water, all the people of that section as well as those as far south as the Chewaucan feel positive that the same strata of water can be tapped in their immediate neighborhoods. So confident is W. K. McCormack that he has contracted for the sinking of a well on his place, which is located some 25 miles south of L. P. Klippel's place, and it is understood that work will commence on it in the immediate future. C. E. Robinson, who has a place six or eight miles northeast of Paisley, also contemplates sinking a well, while it is probable that an effort will be made to show the Desert Land Board on the occasion of its visit here next month that all of the lands withdrawn for the Portland Irrigation Company can be successfully irrigated by artesian water.

## Chas. Umbach Injured

Sunday evening a dog-fight resulted rather disastrously to Chas. Umbach. He and Mrs. Nolden were driving into town from the north, when their horse became frightened at the dogs and turned the buggy over the grade at the Hahn place. Mr. Umbach sustained a very severe shock and badly strained one of his legs, while Mrs. Nolden was severely bruised. For a time it was thought that Mr. Umbach was dangerously injured, but he is now getting along nicely.

## Decoration Day

Decoration Day is to be appropriately observed this year in Lakeview and preparations are now being made by members of the G. A. R. and Spanish War Veterans, assisted by a number of citizens. Services will be held in the evening at the M. E. church on Memorial Sunday, when Rev. Melville T. Wire will deliver the sermon, and the regular exercises will be held at the Court House Tuesday afternoon. The address will be delivered by Hon. A. W. Orton, while other features are also being prepared. Further arrangements will be announced next week.

## STALLION KILLS KLAMATH PIONEER

Enraged Animal Fearfully Mutilates The Aged Man

John Simmons, 73 years of age and one of the best known pioneers of the Lost river country, was killed by Harry Gwinn, a racing stallion belonging to the Kinneys at the Kinney place just above the bridge at Olene.

Just how the old man came to arouse the ire of the stallion is not known. He was alone at the time, the boys on the ranch having left him there for the time. About noon a neighbor went to the place and found the old fellow lying in the barn lot in a terribly mutilated condition with life extinct. Appearances are that the old man took the stallion out of his stall to water or exercise him, and the horse either reared and struck him or jerked away and kicked him down. Once down, the animal bit and lacerated both arms badly from the hands to the shoulders; both sides of the head had large bruises where the horse either hit him with his heels or forepaws in striking at him. He also had a very bad bruise over the heart made by the animal's hoof, and one rib is thought to have been broken by this blow.

The horse apparently became terribly enraged at its keeper for some reason unknown. It is also evident that he was biting at and striking at the old fellow after he was down, and in trying to ward off the blows of the animal this was how the horse happened to get chewed up and lacerate the arms so badly.

Uncle Johnnie Simmons, as he was familiarly known, has no known relatives. He formerly owned property out in the valley, but sold this. He was making his home at the Kinney place.

## Jack Will Build

Klamath Herald: J. F. Kimball, the local representative of the Weyerhaeuser Timber company, has purchased a fifty foot lot along the river on Conger avenue, from J. G. Pierce. The property is just south of the Bishop place, and is very choice residence property. Mr. Kimball made the purchase with the intention of later building a home.
