THE EXAMINER IS THE OFFICIAL PAPER OF LAKE COUNTY

VOL. XXXII

LAKEVIEW, LAKE COUNTY, OREGON, NOVEMBER 9, 1911.

NO. 45

TRIP TO PAISLEY AND SUMMER LAKE

Two Days Spent With Northern Neighbors In Chewaucan

Mr. and Mrs. J. N. Watson and Mr. and Mrs. F. P. Cronmiller spent Saturday afternoon and Sunday on a visit to Paisley and the lower end of Summer Lake, returning home by way of Valley Falls and Crooked Creek. The start was made at noon in Mr. Watson's auto and lunch was had some 10 miles out. The trip was made over the mountain road to Paisley, where the night was spent. That town, which has just voted to incorporate, shows many signs of prosperity, the most noticeable of which are the new hotel, recently completed at a cost of \$45,000, the large livery and feed barn of V. O. Moran, which cost \$30,000, and the hall and garage owned by Mr. Hartle, which will cost when completed \$5,000. All of these buildings would be a credit to a town much larger than Paisley, and certainly reflect much credit for the progressive spirit of the owners.

Most of the residences and business houses are well kept, while the public buildings, such as the church, schoolhouse and Masonic hall are equally creditable to the town. The wiring for the electric light system installed by Withers Bros. was about completed last week, and it was expected that the juice would be turned on this week. The business houses carry large stocks of goods and are carefully arranged so that they have no appearance of the average country store but are thoroughly up-to-date.

Leaving Paisley Sunday morning the party went as far as C. W. Withers' place where they met a most cordial welcome. The trip was made during a high wind and therefore it was decided not to proceed farther. On reaching the Withers farm the party was ushered

BIG DIPPING VAT AT WHITE HOUSE

Efforts Being Made to Quickly Eradicate Cattle Scab

Every effort is now being made to efface the cattle scab in the infected districts of this county. At this time of year the effects of the scab in cattle is not easily discernable to the ordinary individual, but it is in the Spring that its ravages can be noticed, and more especially when the cattle are in poor condition. Preparations have been made to dip all the cattle in the infected districts, including milch cows and calves as well as the range cattle. To that end a large dipping vat has been built at the White House on the ZX ranch in the Chewaucan. It is estimated that about 15,000 head will be dipped this month, from 500 to 800 head being the daily average.

Corralls, shutes, etc., have been arranged so that the cattle can be handled most expeditiously and there is a continuous line of cattle passing through the vat. The vat is about 80 feet long and 8 feet deep and divided into pens by means of swinging gates. The cattle are kept in the solution for two minutes, and it is necessary to keep them separated in the vat in order that they will not drown each other. Men are stationed along the vat so that in case of accident they can catch a "critter" by a horn or under the neck and thus prevent their drowning. Occasionally two will get into the vat together resulting in the drowning of one on infrequent occasions.

The solution is kept hot by steam heat supplied by a traction engine, steam pipes being placed in the vat. Vats for preparing the mixture with furnaces underneath are close at hand, and men are constantly at work keeping things moving.

The work is well worth seeing, and the trip can easily be made in three hours by way of Valley Falls. So long as the roads are dry the trip would be ideal, but a light rain would put

them on the "bum" as there is more or less alkali to be passed over between the Hotchkiss place and the White House.

New Townsite

The new townsite on the V. L. Snelling ranch is to be named Wendell, and it will some day be a trading point to the large country to the west side of the Lake when good roads are built along that part of the valley where now the marsh and overflow lands are impassable a part of the year. In addition that section of the valley will draw considerable trade from the many orchards that are to be developed on the east side of the lake.

A Busy Man

Frank Gunther is now the busiest man in seven states, with places of business at Lakeview, Paisley, Summer Lake and Silver Lake, not to mention between stations. He repairs anything from a watch to a sawmill, and incidentally carries a few automobile supplies. He is dead set on buying an auto and expects to have one in the near future.

REBEKAHS VISIT NEW PINE CREEK

Tea Cup Club Entertained Friday by Mrs. F. M. Green

On last Friday morning a merry party left Lakeview for an old-fashioned visit to the country. Mrs. F. M. Green, of New Pine Creek, had invited the Rebekah Tea Cup Club for the day. The ride down the valley in autos was a delightful beginning and good things followed thick and fast through the entire day. A fried chicken dinner was served with all sorts of delicious accompaniments and the elder press was on duty. In the afternoon Mr. Green, who had the conveyance, a hay wagon, which carried the party to the lake and gave the members their first ride on the new railroad grade. Those attending were: Mrs. L. J. Mairlin, Mrs. Eva Jackson, Mrs. J. P. Morgan, Mrs. S. B. Chandler, Mrs. E. M. Taylor, Mrs. F. O. Bunting, Mrs. Eob Miller, Mrs. R. M. Corbett, Mrs. L. Bailey, Mrs. D. H. Bemis, Mrs. W. P. Hervford, Mrs. Storkman, Mrs. W. Z. Moss, Mrs. J. N. Watson, Mrs. J. Q. Willis, Mrs. A. E. Cheney, Mrs. M. Barnes, Mrs. W. H. Shirk, Mrs. F. Reynolds, Mrs. F. Fisher and Miss Decia Willis of Lakeview and Mrs. Conrad and Mrs. Tyree of New Pine Creek.

Divorce Granted

Mrs. Sadie Drumm secured a divorce from George Drumm of Paisley last week. Mrs. Drumm was given the custody of her little daughter, Emma, by Judge Henry L. Benson, who heard the testimony. L. F. Conn appeared for the plaintiff.

BRYAN'S SAWMILL GOES UP IN SMOKE

Fire Destroyed the Entire Plant Early Sunday Morning

Fire destroyed the sawmill, shingle mill and planing mill of A. W. Bryan in Clover Flat early Sunday morning. Outside of a few hundred feet of lumber everything was inflammable in that vicinity, including a wagon belonging to Andy Hotchkiss of Valley Falls, which together with a load of lumber went up in smoke. The origin of the fire is unknown, though a smoldering spark is supposed to have been the cause when it was fanned into a flame by the gentle night breeze. There was no insurance on the outfit and it comes hard on both the owner and the large number of people that want lumber for building purposes in that part of the county.

Stock Meeting

The Central Fremont Horse and Cattle Association will meet at Paisley on November 20. A large attendance of the members is hoped for at that time when matters of importance will be discussed by the stockmen.

END OF FOLLETT TRIAL

Noted Case Will Probably Be Submitted to the Jury Tomorrow

Attorneys Make Hard Fight and the Court Room Is Daily Thronged By Men and Women Who Take Much Interest In Proceedings

The Follett trial is still under way before Circuit Judge Benson, but it is expected that the case will be submitted to the jury tomorrow. Yesterday attorneys for the prosecution and defense with Court Reporter Richardson went to New Pine Creek to take the deposition of Dr. Amaden, who is ill and unable to appear before the court. L. F. Conn for the defense is making a hard fight, and the trial is attracting much attention.

Busy At Fandango

The Fandango saw mill has a fine supply of lumber of all kinds on hand at their well equipped plant and there is no doubt that any person intending to build can secure what they want there without any trouble, especially in the line of seasoned lumber. The plant is rushed in anticipation of the heavy demands that are being made on it on account of the New Pine Creek fire recently, as they feel that in order to keep abreast of the times they will have to have a large supply ahead. The mill grounds resemble a small village with their equipment that takes in everything from the log to the finished product and include bunk houses, cook houses, blacksmith shop, dwellings, stables and a large yard with tramways and other features of the modern mill. The plant is a credit to the owners who take pride in their output.

Neighbors Worth While

This is not a bad old World after all, is it? When men and women make some little effort to lighten the burden of their neighbors they feel better and the outsider looks on and is glad that they are glad because some one else has been made glad. It was this sort of real unselfishness that actuated those West Side residents that went out to Mrs. Mollie Bolton's place where her home was destroyed by fire last week and when the bunch of good fellows left for home that night, they had built a new home for the lady that brought tears of joy and much thankfulness from her heart. She thinks more of that little home that has been erected through thoughtfulness than though it was a stone mansion on Capitol Hill in Denver, and there is no doubt that every one that helped in the good work is a lot better for having done so. Pass the good work along.

WORK ON N.-C.-O. IS BEING PUSHED

Rails Will Reach New Pine Creek in the Next Few Days

The railroad is expected to arrive at New Pine Creek within the next few days when rails will be laid to that point. The tracklayers are laying about one mile per day of steel and at that rate it is not a long time before Lakeview will be on the railroad map. The grading crew is at work on the edge of town and will have the grade to the new depot site in short order. Maney Brothers have a large crew of men at work and with the grading finished and the depot commenced there is going to be a lot of work ahead for local people in the building line.

Electric Farm Plant

The Summer Lake correspondent of the Silver Lake Leader writes as follows: Electricity from barn to basement is what C. C. Harris has just installed on his up-to-date farm at Summer Lake. Mr. Harris generates the power by water on his own place. Last Sunday electricians were busy all day stringing the wires, testing the machinery and arranging other details in readiness for turning on "the juice." The Harris family have just moved into their new dwelling, which is one of the best in Summer Lake. Chester Withers, of Paisley, installed the electric lights. At night the place is brilliantly illuminated and reminds one of a real city. Other farmers in Summer Lake valley contemplate following the example of Mr. Harris.

Buccaroos Do Eat

Sam Coghurn was down from the ZX this week after supplies and the way that he took things back with him would make a casual observer think that the bunch of fellows out there were able to get enough to eat at any rate. The way that Sam piled up a wagon load of choice apples of every variety for which the Goose Lake Valley is famous would suggest that at any rate. There were three wagons in the string and the driver stated that there were many other trips ahead for him before he got the store-house full of "big eats."

NORTHERN LAKE PROBABLY "WET"

Reports Indicate that Dry Precincts Are Dry No More

Reports that have come over the telephone from Paisley and Summer Lake show that the "Wets" have carried those precincts by about sixty-two votes. The Silver Lake, Fort Rock, and Lake precincts are yet to be heard from but there seems to be no doubt but that Northern Lake county will go "Wet" this time and remain that way for some time, as people are tired of the "Near beer joints" that have been so troublesome without any recompense to the people or county.

Salt Creek Potatoes

The Salt Creek section promises to become famous for its fine potatoes, and if other sections of Goose Lake Valley are to keep in line they will have to go some. This week L. C. Emerson of that section brought to the Examiner office some of the finest potatoes it would seem possible to grow. While perhaps they are unusually large yet at the same time they have no deep eyes or warty protuberances, are perfectly solid and free from blemishes of any sort. Undoubtedly they would command fancy prices in any market.

As a sort of side issue Mr. Emerson also brought in a 9 1/2 pound turnip—not a rutabaga—but just a plain ordinary turnip. It is a fair sample of what may be expected in the way of results in root crops when properly planted and cultivated here in Goose Lake Valley.

Lights For Paisley

Chewaucan Press: Before this paper again goes to press Paisley will be supplied with electric lights. The wiring from the power plant at the Spring Grove Flour Mill to town is almost completed; the dynamo is in place and practically all that remains to be done is to secure contracts for the lights, install them and turn on the current. The wiring is being done in a most workmanlike manner, two heavy copper wires being strung along a line of tall, stout poles. The dynamo

is very efficient, being capable of veloping power for about 700 lights of 16 candle power each. Water furnishes the power, so the running expenses will be very light once it gets started. The company promises a very moderate charge for lights and we may expect to see many business houses and residences lighted by electricity this winter.

"The Last West"

Silver Lake Leader: Every stage and every automobile licensed to carry passengers that reaches Silver Lake from the end of the Oregon Trunk road brings its quota of new settlers who are hurrying to file on a piece of government land before it is too late. Central Oregon has never seen, and after next summer will never see, another such rush, for by that time the land will be virtually all gone.

In addition to those arriving by auto and stage, there's a procession of covered wagons from Silver Lake to the Columbia river. These wagons are reminders of the old prairie schooner days when the motto was "Kansas or bust."

HANDSOME HOME FOR THE WHORTONS

Modern Dwelling a Credit to Residence District of Lakeview

The new home of George B. Whorton on Water street is about completed and shows to much advantage both as regards the interior and exterior. In every particular from cellar to garret the appointments are such as reflect credit not only for the rare taste of Mr. and Mrs. Whorton, but on the workmanship and skill of the contractors employed. The carpenter work was done by N. T. Corey, while Sam Bailey handled the plastering in such a manner that there is no doubt of its being as good as there is to be found anywhere. Wm. Barrety, the artistic decorator, did the finishing work in a manner that does him credit. The rooms down stairs are finished in natural wood and consist of a living room, dining room, two bedrooms, kitchen and a fine bath room. The doors of the three larger rooms are so arranged that they slide out of sight and allow the three to be made into one in case that George has more than the ordinary number of guests. The upper story is divided into three rooms that are finished and each is roomy, light and well ventilated. The foundation of the building is of Malam stone which is brought from just below town and is of the same quality and coloring as that used on the new high school. The fine lawn that will be completed soon is to be in keeping with the other appointments that go to make this comfortable home one of the most desirable residences in the thriving town of Lakeview.

ELIMINATE LANDS IN CRATER FOREST

More Lands in Private Ownership "Restored" To Settlement

Another restoration to entry of land from the Crater National Forest will become effective February 14 next. Practically all of the lands are already in private ownership, and the restoration is of no special significance. The lands lie along the east boundary line of the forest and are meadow and swamp lands. A list of the lands to be restored follows:

T. 33 S., R. 6 E.—E₁ Secs. 12 and 13, Secs. 24 and 25, E₄ Sec. 35, Sec. 36.

T. 34 S. 6 E.—Secs. 1 and 12, N₁ Sec. 13, Sec. 25, E₁ Secs. 26 and 35, Sec. 36.

T. 35 S., R. 6 E.—Sec. 1, E₁ Sec. 2, Secs. 12, 13, 24, 25 and 36, E₂ Sec. 3, T. 36 S., R. 6 E.—Sec. 12, E₁ Sec. 3, N E₁ and S₁ Sec. 11, Secs. 12, 13, 14.

The lands will be subject to settlement January 15 according to the notice, but inasmuch as nearly all the lands are already in private ownership it is not likely that there will be any great rush to get possession of the same.

SURPRISES SPRUNG IN CITY ELECTION

Unexpected Heavy Vote Poller' and Large Majorities Result

Tuesday was election day and while it was quiet in the extreme the citizens went and polled a large vote and elected E. E. Rinehart Mayor over Harry Bailey by a vote of 125 to 77. Wm. Wallace was elected recorder over E. H. Clark by a vote of 149 to 54. Treasurer A. Bieber had no opposition and polled the full voting strength of 202 votes. The new councilmen are J. F. Mayfield with 134, F. M. Duke, 123; Dr. E. H. Smith, 136 and E. F. Cheney 130. There is every reason to believe that the new Mayor and Councilmen will favor the better sanitation of the town and sewerage system that will be bonded in the near future. The regular meeting of the council was to have been held Tuesday evening but on account of lack of a quorum there was no business transacted and the last meeting of the old council will be held next Tuesday.

Mayor-elect E. E. Rinehart was at his store the morning after election as usual and expressed himself grateful to the people of Lakeview for the handsome vote given him at the election Tuesday. While Mr. Rinehart was in no position to outline any particular policy he expressed himself as interested in the welfare of Lakeview as a whole and that every resident of the town can do a lot to help in the good work of rebuilding the community. The mayor and councilmen have much to do in the work of taking care of the needs of a rapidly growing town, but the citizen is a most important factor in the work and the new members as well as those that have held over from the former council have a desire to keep in touch with the best interests of every individual, where the interest of one person do not conflict with the welfare of the majority.

NEW PINE CREEK STATION LOCATED

Will Be On Lake Shore—250 Feet South of State Line

The New Pine Creek station on the N.-C.-O. has been located on the Hervford lands along the lake shore. The railroad grade borders the lake, and the station will be located 250 feet south of the State line.

Plans are being perfected for plating a townsite at the station, and it is possible that there will be a "new" and an "old" town, as the present town of Pine Creek is about one and a quarter miles distant from the railroad station. It is quite possible that in the near future the Hervford holdings will be cut up into small tracts and placed upon the market, and with that end in view a road is being planned that will practically parallel the railroad grade for a distance of several miles, connecting with the present wagon road at points north and south of New Pine Creek.

Well-Driller in Demand

George Ede, the well driller, had the misfortune to have a hose take a kick at him. Mr. Ede says he don't mind the kick but it's the sudden stop when it reached his anatomy that hurt. Warner Valley people are asking that he take his well outfit to that section of the county and have guaranteed him several contracts to drill there, but on account of the number of people that are asking him to put down wells here it will be some time before he will be able to make the trip to that portion of the county. The importance of artesian wells to a community will never be in better evidence than here where people are able to afford this necessity for their welfare.

Traded for a Homestead
J. A. Rey, of the Upper Chewaucan, has traded the same to N. E. Steinhilber, recently of Oakland, Cal. M. Reynolds last week left for San Francisco to remain permanently.
