

# Lake County Examiner

HAS THE CIRCULATION—PRINTS THE NEWS—REACHES THE PEOPLE

THE EXAMINER IS THE OFFICIAL PAPER OF LAKE COUNTY

VOL. XXXII

LAKEVIEW, LAKE COUNTY, OREGON, NOVEMBER 23, 1911.

NO. 47

## NEW HOSPITAL TO BE BUILT SOON

**Enterprising Drug Firm to Establish Much Needed Institution Here**

A hospital—an institution that will take care of the sick and injured that we are not to have with us at any time is the new enterprise that is underway and which Hall & Reynolds the popular firm of druggists will build in the near future. This has long been a want that has been apparent to every one that gave the matter the slightest consideration. Numerous times there have been some spasmodic attempts to stir into activity this need and bring it to fruition, but nothing definite has been done until this firm with their enterprise and familiarity with local conditions brought into being the work of actually going ahead and building a structure that will take care of every case that is brought to their attention. There is perhaps no institution that is needed more than this one, for when it is needed there is no doubt about it being necessary and at the exact moment. There are dozens of times when such an institution is the means of saving life and at a time when the slightest delay or the lack of care that is often met with, is the means of seeing a life snuffed out that could have been saved otherwise. The new building will be in the residence district apart from the business section and sufficiently large to handle any reasonable number of patients that may be taken to it in the future. Hall and Reynolds deserve success with their new venture.

## Settlers Want Law

Senator Borah last week conferred with Secretary of the Interior Fisher on the three year homestead law. They virtually agreed that the homestead period should be reduced to three years and a bill to that end will be introduced at the coming session of congress. However, the details as to the passing of titles are not entirely settled. It is understood that if any final disagreement comes it will be due to the fact that Borah desires to make the title passed at the end of the three year period unconditional, whereas the interior department may want other conditions attached.

## EXAMPLE WORTHY OF EMULATION

**J. N. Watson Gives Largest Individual Sum Raised Toward Railroad**

There has perhaps never been a greater example in Lakeview of public enterprise and loyalty to the community in which he lives, than shown by J. N. Watson when he donated \$500 cash to the fund to pay for the right of way and grounds of the N.-C.-O. Railway which the citizens had pledged themselves to pay. This is the largest individual donation and coming unsolicited shows the spirit of the men that are behind Lakeview. Its a fine asset for any community to have and there is not a man or woman in Lakeview but appreciates the spirit of the donor coming at a time when money talks louder than words. "What constitutes a state?" Men! high minded men, men as far above dull brutes endowed, as beasts excel brambles rude in forest, brake or den. The citizenship of Lake County can be depended upon to come to the scratch in any emergency when they have men of the J. N. Watson type to help them over the rough places.

## Thanksgiving Dinner

The Ladies Aid Society of the Methodist Church is making elaborate preparations to serve an old fashioned turkey dinner at the Masonic Hall on Thanksgiving day, beginning at 2 p. m. It will be 50 cents a plate. In connection with the dinner there will be a bazaar. Both fancy and useful articles will be on sale during the afternoon and evening.

J. L. Chandler and Sam Cogburn, of the ZX were in town this week.

## Thanksgiving Dance

Ready to open Thanksgiving Day, when a Free Hop will be given to celebrate the enterprise of re-building after the fire, eighteen men have been at work on the Henry Wendt building in New Pine Creek and when the date for the opening rolls around the happy couples will trip the light fantastic to the sweet strains of music that will make them forget that there ever was a disaster until they go outside and view the ashes where other buildings formerly stood. Mr. Wendt was a Lakeview visitor Monday and says that there will be a good time assured to every one from Lakeview that attends the Thanksgiving Day affair. There is no doubt that the gentleman is alive to the spirit of progress and that he has done a grand work in making the headway that he has to eliminate the results of the fire.

## INDUSTRIOUS RESIDENT STRICKEN

**Chewaucan Citizen Down With Serious Disease-- May Result Fatally**

J. F. Landon, well known in Lakeview, where he has sold a large quantity of wood during the past couple of years, and now living on a homestead in the Chewaucan Valley near the school house twelve miles south of Paisley, is very ill with cancer of the liver and hope of his recovery is very slight. To make sure of the character of the disease, Dr. Hall performed an operation to expose the liver and after seeing what it was, in consultation, decided that to operate on the organ would mean immediate death so had to abandon the case. Mr. Landon will receive the sympathy of all who have known his industry and thrift since coming to Lake County. After being in the wood business for some time he finally took a fine 320 acre homestead and through his industry had begun to see daylight ahead when the unfortunate disease overtook him. There is perhaps no piece of land in the country that has had more work done on it for the short time he has owned it that his homestead and this year he produced many things that were new to his section of the valley. His illness at this time is a distinct loss to the community and is deeply felt by all.

## YOUNG TROUT FOR OREGON STREAMS

**Large Number of New Species To Be Planted In Anglers' Paradise**

Six hundred and twenty five thousand black spotted trout are being held at the Honneville hatchery, all of which will be released in the various waters of the state as soon as the special tanks that are being constructed are completed and the little fish are old enough to care for themselves. These trout eggs were secured from the Yellowstone country, where they were taken by the Government. This release of trout is especially designated to assist in the re-stocking of several of the streams of the State. Under authority of the State Fish and Game Commission, Warden Finley has been instructed to designate the waters into which the trout will be liberated. Under the State law, any stream may be closed by the commission for a period, for the purpose of re-stocking or protecting the fish.

To entail as little hardship as possible upon the anglers of the state, the State Game Warden believes that some of the upper tributaries of the rivers of the state would be the best grounds for the trout. These tributaries will then be closed for two or three years, and at the expiration of that time opened again, when the fishing in the main streams will be unexcelled. It is believed that in that time, the trout will be able to propagate and mature sufficiently to amply restock the main river.

Arzner Brothers have had a new roof placed on their blacksmith shop during the past week and the building is now rainproof.

## CREDIT TO COMMUNITY

**High School Nearing Completion-- Well Lighted Throughout**

**Few Towns in State or Country Can Show Better Building Regardless of Their Size--Every Part Built in a Workmanship Manner, Reflecting Great Credit**

Every resident of Lakeview can look with pride on the magnificent structure that is being erected for use as a High School. There are few sections of the country that appreciate more the importance of learning than here and the building will be a credit to the judgement of the populace. Built in a desirable location, with over eight acres of ground that has a gradual slope to the West, within a few blocks of the center of town, and yet giving one of the finest views of the beautiful valley that stretches beyond it, there is probably no place where the pupil could gaze over more country each day and realize better, that this is indeed a lovely spot to have a home.

What strikes the eye of the beholder when within a short distance from the structure is the ample manner in which it has been lighted by windows. There

are few buildings anywhere, unless they are constructed entirely of glass and iron that can excel in this feature of vast importance to the health and general comfort of those that go there for instruction. There are 138 large windows on the outside of the building that give the light necessary to enable those in the building to see almost as well as though they were on the outside. The beauty of these windows is their depth and lighting capacity while they lend dignity to the building in keeping with its object.

The construction has progressed under the direction of Superintendent Andrew Underwood who has given the workmanship the same thoroughness that has characterized all his building since coming to Lakeview. Every detail is looked after in a manner that

## CONTRIBUTE MONEY TO WORTHY CAUSE

**Committee Raising Money to Bring Railroad Last Seven Miles**

A meeting of citizens was called at the court house Monday when means were devised to raise the sum of \$5,000 for the new railroad. Speeches were made by A. Bieber, A. L. Thornton, E. L. Britten, Bernard Daly, Frank Light, V. L. Snelling, J. N. Watson and J. B. Auten. It seems to be the consensus of opinion that now was the time to act and that the less talking done the better off all concerned would be. The town has awaited the road for upwards of thirty years and now when it is almost here there should be no hesitancy on the part of any one to contribute their pro rata share, for every piece of property in town would get the same benefits proportionately. J. N. Watson announced that he would contribute \$500, while Dr. Daly speaking for the Lakeview bank and Mercantile Co. with allied interests, stated that they would contribute 20 per cent of the remainder or \$900. The assessed valuation of the firms represented in this contribution is about \$300,000. The total sum on the tax rolls of the town is about \$900,000. A committee consisting of J. B. Auten, A. Bieber and V. L. Snelling was appointed by Chairman Harry Bailey to make an assessment on the business men and others to raise the balance of the amount required. This is an object that is most worthy and there is not a progressive man or woman in the community that can afford to hesitate in a matter of such importance. There are some forgers that sit back and say that they won't give a cent but they are vastly in the minority and the public spirited men and women of the town are going to do more than their share as is always the case. The committee is meeting with much success and will soon raise the money.

## Teachers' Institute Meet

A Local Institute for the teachers of Goose Lake Valley will be held in Lakeview at the Court House on Saturday, December 2, commencing at 9 o'clock a. m. Besides a general discussion of the Course of Study, a Query Box will be ready for the reception of questions relating to school work, and these questions will be open for general discussion. Not only teachers but all who are interested in the welfare of the schools are invited to attend. J. Q. WILLIAMS, Co. Supt.

## WEST SIDE MEN GET PAYING CROPS

**Grain Yield from 80 Acres Shows Nice Margin of Profit**

1984 from 80 acres of grain on new land is the result that Clarence and Meredith Anderson secured from a crop of grain that they planted last spring on the Miles G. Anderson homestead, four miles from Anderson Gap, in the W½ of the NE¼ and the E½ of the NW¼ section 6, township 40 S, range 19 E, W. M., containing 160 acres, half of which was in the above mentioned crop which threshed 1,300 bushels of grain. This was first and second crop sage brush land and shows what is possible in this part of the country as the two men did not pretend to give the land the care that they believed it justified. There is no doubt in their minds that the land can be made to do much better when it is in shape and the crop that they produced was without any irrigation of any kind more than the natural rainfall. This is no record breaking crop for any part of the world but is the average as is shown by the figures on another page of this issue and was grown on land that can be purchased here for about twenty dollars per acre. With proper cultivation there is little doubt but that this crop could be doubled. The prices mentioned is the actual sum obtained for that sold and is no exaggeration as the 1,300 bushels of grain sold for less money this year than has been obtained by the growers for several years. This crop with the ordinary diversified farm products essential to successful farming in the Eastern and Southern country, is profitable if no more than shown is grown on the land. The balance of the 160 acres or 80 acres is either in pasture or other crops.

## Thanksgiving Service

A union Thanksgiving service will be held next Thursday, the 30th, in the Baptist church at 11 A. M. Besides the sermon and usual services there will be special music by the singers of the several churches. The service will not be prolonged beyond the hour. It is earnestly desired that all who possibly can shall attend this service. The call of the President and of the Governor, in accordance with the national custom, that the people meet in their accustomed places of worship to give thanks, should not be disregarded by us. Thanksgiving day without such thanksgiving is not what it is designed to be or should be. Let all meet for this hour of public service.

## Some Real Champion

The Oregonian has an article stating that Charles Morehouse Winkelman is the Champion Eater of the Northwest, but the paper is in error for Charles is the Gastronomic Champion of America. When it comes to a little master like a meal he makes everything that has ever been heard of look like a "Chewed rista" to use the expression of that sterling character Dan Malloy.

## Happy Married

On the 7th Ultimo, at St. Andrews Church, Vancouver, B. C., Harry E. Rolls, of Southsea, B. C., and Alma Russell, of Ashland, Oregon, were united in the bonds of matrimony. Mrs. Rolls was formerly a resident of Lakeview where her late father resided some years and many of her old friends will be glad to learn of her happy marriage.

## NEW LIME KILN NORTH OF TOWN

**Home Product Shows High Quality--Can be Supplied at Low Cost**

Lakeview lime will be on hand next year in sufficient quantities to supply every man that contemplates building. The best part of it is that the quality of the home product will be the equal of any lime manufactured anywhere in America. The product comes from a ledge of pure calcite rock 20 feet in width that dips into another ledge running Northwest and Southeast seven to fifteen feet in width, that sets in true ledge formation. The former ledge is black calcite while the latter is white and amber. Loftus Brothers, the owners of the property will build another kiln in the Spring and will handle all the orders that can come to them from this part of the country. The new industry will mean much to local people that have been troubled at times on account of having to wait for imported lime to be shipped in and the new plant will eliminate the need of this delay. While some lime has been handled from the plant and the owners have on hand about forty barrels of the manufactured product, the rest will be nothing to the improving that this firm of well known men will do in the future.

## WRECKERS TEARING DOWN LAND MARK

**Will Make Way For New Heryford Business Block in the Spring**

The old barn—that real old barn—the barn that is dogged old, is being torn down to give way to the improvements that are under way in Lakeview. That Sterling character and fine business man "Dad" Heryford is the cause of the trouble and there is not a person in the community but who appreciates the good work he is doing now that he is having the old livery formerly occupied by Mike O'Sullivan and later by Auten & Rinehart as a storage warehouse, razed to the ground. In the Springtime when the birds are with us again and the N.-C.-O. Railway is bringing thousands of tons of freight into town to supply the hundreds of square miles with the goods that they demand and when building material is brought in at a much lower rate than now, this gentleman, "The Grand Old Man of Lake County" is going to build a block—real brick block,—three stories in height and roomy enough to take care of the business of one of the largest firms in Lakeview on the main floor and with two other stories above that will also be used for Commercial purposes. The Heryford Building is going to be a credit to the owner and the good name he bears and will mark another step that Lakeview is making to attain results that will make some of us wonder what we are thinking of when we placed the estimate so low. This is the finest corner in Lakeview and there is no doubt of the wisdom that has been shown in selecting it as a site for a building such as the new block will be.

## N.-C.-O. RY. NEAR NEW PINE CREEK

**Will Probably Cross Line Into Lake County This Week**

The N.-C.-O. Railway track was laid three miles south of New Pine Creek last Sunday and if nothing prevented is now at that place. At that rate the rails should be laid into Lakeview in the next two weeks, though of course there are conditions such as weather, lack of men and other matters that might prevent the completion of the line for a few days longer. The grading has been done and outside of a little work to be done near town there is nothing to do but lay the rails, build the bridges and culverts, and get the first train here so that material can be unloaded for the new depot. When the new line sets here there should be a celebration held that would eclipse that of any town in the entire West.

This could be done easily because of the many advantages that Lakeview enjoys as a location. For instance: the hills east of town could be illuminated with various forms of fireworks and the cost be comparatively small for the display needed, but it will have to be purchased in time to get here for the affair which will be held within a couple of weeks from the time that the first train arrives. The first train, it should be understood, that comes here will not be the regular one or the one that will run daily, but will be the construction outfit and the first regular train is the one to decide all bets. A committee should take charge of this matter at the earliest possible moment for while the people here have awaited that train for twenty to thirty years, they don't want to wait a single moment than necessary for the celebration that is due them. The celebration that is planned will give more advertising to the town than any means that the people here could devise and every important event in Lake County will date from the time that the first train got to Lakeview. It will be remembered as long as the people live and should be celebrated accordingly. Let us get busy.

Mr. and Mrs. George Whorton are now occupying their new home on Water street.

## NEW MINING MEN AT WINDY HOLLOW

**Invest Capital and Will Make Many Changes in Near Future**

Mining men were in town in large numbers last week and there are some large developments looked for in the Windy Hollow Mines in the near future. I. T. McVey, N. R. McVey, J. J. O'Reilly, F. J. O'Reilly and T. S. Burgess, of the Jumbo mine, were among those that were here. The two former gentlemen have secured a controlling interest in the Loftus holdings and will push the development work along new lines from now on. Many people here have failed to recognize the importance of the minerals right at our doors and with the fine showings made in the Hoag and Windy Hollow mines there is going to be an impetus to the growth of this industry that will place us on the mining map with a big display of red ink. There is no doubt but that the opening of these districts to a large amount of capital will be one of the best things that could happen to the mercantile and business interests of Lakeview, for the new mines will be heavy consumers of supplies and bring a large amount of labor into the districts. As mining men are not paupers and noted for their capacity to handle a large amount of cash in a short time the importance of these workings cannot be fully appreciated until such time as they are being worked to their full capacity.

Chris Langset has delivered flat calendar of the coming year and it makes one think that Christmas and New Years are almost here and the slogan "Be Merry Early" appears as very appropriate.
