VOL. XXXIII

LAKEVIEW, LAKE COUNTY, OREGON MARCH 21, 1912.

NO. 12

PHILIP LYNCH PASSES BEYOND

Was Forty-seven Years Old and Leaves a Large Estate

After a period of several weeks serious illness, Phillip Lynch died Sunday, March 17, at the Lakeview hospital in this city.

Deceased was last week brought over to Lakeview from Plush where he had been suffering for some time. Mr. Lynch was a native of County Cork, Ireland and was 47 years of age at the time of his death. He was a very prominent man in business circles of this section and was a heavy property owner in Lake county, as well as holding a valuable estate in his native country. It is conservatively estimated that his estate will amount to \$160,000. He was a man of charitable nature and is known to have contributed liberal sums toward numerous laudable causes. He gained the respect of a large circle of friends in this county where he and resided for several years. He was one of the most prominent shepherds in this section.

His demise is mourned by a mother, Elizabeth Dalton of Newmarket, Ireland; one son and one daughter of that place, aged 14 and 12 years respectively and one brother, Thomas Lynch, of Lakeview. Two sisters also survive him one of whom resides in New York City. He also had numerous distant relatives among the Irish boys who live in this county.

The funeral ceremony took place Tuesday at 9 o'clock a. m., from the Catholic church, Father Schmitz conducting the services. From the church the body was taken to the I. O. O. F. cemetery for interment, followed by a long procession of mourning relatives and friends. The pall bearers were Wm. Kepple Barry, John Callaghan, David P. Jones, Mike Finucane, Tom Sullivan and John McAuliffe. The ceremony was very impressive and inspired admiration for the stalwart men who were so deeply affected over the loss of a friend and countryman.

NEW HIGH SCHOOL BUILDING FINISHED

Magnificent Structure is Modern in Every Particular

With the exception of a few minor details Lakeview's new High School building was completed last Saturday, and during the afternoon a number of people availed themselves of the opportunity to inspect the new structure. It is one of the finest school buildings in the State outside of the larger cities, and none excel it in plans or workmanship. It is two full stories and basement in size, the upper floor containing a large assembly room. It is well lighted throughout, while the heating and ventilating systems are perfect. The entire work was under the supervision of I. A. Underwood, and while no expense whatever was spared, yet at the same time the cost has been remarkably low for a building of its class. A close inspection of the work will show that nothing whatever has been slighted, from the mixing of the mortar by Jim McShane to the laying of the stone and brick by expert mechanics, as well as the plastering, carpenter, painting and other work, all of which shows the mark of the master hand.

The building was planned by C. H. Burgdorf, of Albany, to whom is due much credit for the design as well as the completeness of the plans. As stated previously, I. A. Underwood was superintendent of construction, which included all work of whatsoever nature. The steam heating, plumbing and drainage system was installed by R. T. Baldwin, and is a perfect success. The plant is known as the single pipe low pressure system, the basement being heated by the condensation returning. A circulating hot water system is also provided which supplies the different lavatories and sinks with hot water.

As an indication of the economy practiced in the erection of the build-

ing it might be stated that the lowest bid submitted for the installation of the heating plant was \$7500, while its actual cost was but \$3500. The Board was saved this amount by the fact that its superintendent knew what such things should cost.

The painting was done by Wm. Barzagay, and the work is fully up to the high standard fixed by Superintendent Underwood. The work on the entire building was done on a per diem basis, no contract work whatever having been employed.

The recitation and study rooms are models of perfection, while the same is true of the rooms provided for the use of the teachers, cloak rooms, lunch rooms, physical culture rooms and the like. The chemistry room is provided with a cement floor, large sink with two sets of hot and cold water faucets, with drainage boards and the like.

The building is also equipped with numerous fire hydrants, sanitary drinking fountains and all modern conveniences, for the protection of the health of the pupils. That the building is properly constructed is evidenced by the fact that the rate of insurance is but 70 cents per \$100, a policy of \$300,000 having been taken out.

BIG INDUCEMENT FOR A CREAMERY

Will Furnish Farmers with Cows on Liberal Terms

In a letter from S. G. Canfield, of Ashland, who was exclusively mentioned in the Examiner as desirous of establishing a creamery at this place, states that he is ready to come over at any time he is assured of the possibility of securing milk or cream from 300 cows. He first offered to sell the farmers cows and take payment in cream. He now states that he will furnish them with any number of cows they are able to take care of properly and they can pay for them with one half of cream. This means that the cows may be supported upon the half cash price and can be paid for with cream, thus requiring no outlay of money. This leaves no excuse for the farmers of this valley for not lending their support toward establishing a creamery here and they should lose not time in getting together for the movement.

S. P. Will Extend

Reno Journal: J. M. Fulton, of the Southern Pacific railroad, stated that he had been authorized by William Sproule, president of the road, to announce that on March 30, bids will be opened for the construction and grading of the new railroad line to run from Fernley to Susanville, a distance of 196 miles; thence to Big Basin in Lassen county, a distance of 17 miles, also a branch line 11 miles in length. The total distance of the road to be constructed will be 136 miles. The work will be commenced at once after the contracts are awarded.

The road will pierce the Pyramid Lake country and will open up an entirely new country rich in agricultural resources. The announcement that a fund has been set aside by the Southern Pacific company to construct the road was exclusively made in the Journal several weeks ago.

M. E. Ladies Aid

The Ladies' Aid Society of the M. E. church met with Mrs. Dan Chandler on Wednesday afternoon. A very large number in attendance. Much enthusiasm was manifested, due to the pleasant rivalry between the two divisions of the society, viz: the Roses and Violets. The Violets will entertain the Roses at an experience meeting to be held April 6th. The "Kiddies" present had a side table at which little Lillian Utley was hostess it being the anniversary of her third birthday. Goodies of all descriptions were enjoyed by the little ones, while their elders enjoyed the fine luncheon prepared by Mrs. Chandler.

John D. Carrol, a real estate man of Klamath Falls, was recently arrested in San Francisco on charges growing out of the sale of property. He is declared to have sold farming implements valued at \$1000 to M. P. Mickler, having given a chattel mortgage on the same to Martin Brothers for a like amount.

IRRIGATION MAPS FILED AT SALEM

Warner Valley Project is Assured of Early Completion

Salem Statesman: Maps and plans of the Warner lake irrigation project were filed yesterday with the state engineer. This project comprises 79,000 acres in Lake and Harney counties and will be financed by the Warner Lake Irrigation company. The land has been temporarily withdrawn for about a year, and the company now seeks final segregation.

The Central Oregon Irrigation company also filed yesterday with the state engineer plans and specifications for the north canal project near Bend. This was the bone of contention for some time with the desert land board. C. M. Redfield, attorney for the company, filed the specifications. The project will now doubtless be hurried through to completion.

WILL CONSUMMATE DEAL APRIL FIRST

J. Dodson Made Arrangements to Buy Lake Shore Lands

James Dodson this week returned home from Portland after having spent several days in Nevada and California. He informs us that he has everything ready for the completion of the deal of the Lake Shore company's holdings at the south end of the lake. The tract will comprise about 5500 acres of agricultural land which will be segregated into small tracts for the farmer. Mr. Dodson says the sale will be consummated about April first and that he has sufficient capital interested to complete his plans.

This will be another step toward the early development of Goose Lake valley lands and with a few more deals of this nature, the large corporation tracts of this section will be a thing of the past.

ELKS SEE RENO SIGHTS

RUN WAS MADE OVER N.-C.-O. IN TWELVE HOURS TIME

Lakeview Delegation Royally Entertained By George Wingfield and Other Parties in the Nevada Metropolis

At a little after the schedule time, 6:30 Friday morning, March 15, the Elk's Lakeview and Reno excursion train on the N.-C.-O. railway pulled out of Lakeview with about forty passengers aboard and this number was later increased through additions at Alturas.

The list of candidates was composed of fourteen of Lakeview's prominent business men who had decided to take a little vacation from their worries and cares and take on something of a different nature by joining the Elks. They were accompanied by some of the fraternity who were indiscreet and foolish enough to think they could hold these would be buck Elks in the bounds of propriety and rectitude, but the train had not reached New Pine Creek before they saw the futility of their effort and they turned the bunch loose and proceeded to get on the band wagon with them, and from that time until they reached Lakeview on their return it was hard to tell just who was the leader of the stampede. It is said that even Dad Hervford's antlers were frequently seen among the foremost

ranks, which he attempted to excuse by saying, "someone had to lead them in a circle or we would lose the whole darn bunch."

The run was made to Reno in about 12 hours time and that a more pleasant twelve hours of rail travel was never experienced by any one of the party, was the universal verdict of all. Upon their arrival at the N.-C.-O. depot in Reno, they all congregated on the platform and gave three lusty cheers for the railway, Manager Dunaway, and the employees. Mr. Saddler of the Overland was on hand with autos and conducted the party to his hostelry where all were furnished with splendid accommodations during the stay in Reno. They were also met by a delegation from the Elks of that city who it seems was not notified of the date of the arrival and many apologies were made by the delegation for not being able to carry out the program of receiving the wild band as had been planned. However, the apparent sincerity and whole souled welcome extended by the officers of the lodge was all

PLUSH DEFEATS LAKEVIEW TEAM

Twenty People Attend the Festivities of Neighboring Town

The party that last week attended the Plush football game returned home Monday and all report having spent a very enjoyable time. The game that was held April 6th. The "Kiddies" present proved to be quite an interesting match, but Lakeview can't play football when it comes to competing with the Plush enthusiasts. The game was played with a lineup of fourteen on a side, Lakeview not furnishing a complete team. Plush succeeded in kicking three goals to Lakeview's one and thus easily captured the laurels of the game. The next contest between these two teams is scheduled to take place in Lakeview as soon as the weather will permit. During the festivities, amongst other things, two dances were given which were said to have been attended by large crowds. The party reported the snow about two feet deep at Camas Prairie but that the Plush region had experienced very little storm up to the time they left.

LITERATURE TO BE CIRCULATED

Southern Pacific Agent Wires For 5000 Copies Of Folder

Mr. E. D. Everett, Sec., Lakeview Commercial Club, Lakeview, Oregon.

Dear Sir: I received the fifty small circulars this morning, of which you wrote to me on March 11th.

I would like very much to have 5,000 of these folders. They will not only more than meet my immediate demand, but which I mean to assist in getting people to visit Lakeview, Oregon. I will make use of them in the following manner:

They will be distributed on the counters of the General Ticket Agents of this Company from New Orleans to Boston. This covers almost every city of importance in the United States. There is nothing better than to have a copy of this neat circular handy, and when a homeseeker is purchasing a ticket to the Pacific Coast, for the person selling the ticket in Cleveland, Ohio; Milwaukee, Wisconsin; Chattanooga, Tennessee; Atlanta, Georgia; New Orleans, La., New York City,

Philadelphia, or any large station, at the same time, to hand the purchaser one of your folders.

This will be no expense to you except to get them to me at Reno, and I believe if you will take it up with Mr. McNamara he will bring the package to Reno free of cost and advise me that it is on hand at his depot, when I will send for it and make the distribution as above.

Yours truly,
J. M. FULTON.

The above letter is very significant that the Southern Pacific lines are anxious to assist in the development of this country. The Commercial Club had only ordered 5000 copies of this small folder printed and the secretary immediately sent Mr. Fulton part of the requested amount. The remainder will be sent upon the completion of an additional order of 50,000, which is now on the press. The folder is for use until the regular literature can be gotten out and the call for them by Commercial bodies of the state aside from individuals is exceedingly heavy. Mr. Fulton stated to Lakeview parties in Reno last week that the pamphlet afforded good advertising and a conservative description of this section and he was anxious to put them in circulation.

HOW THINGS GROW AT SILVER LAKE

Views of Industrial Scenes in Northern Lake Received

A number of views giving one an idea of Silver Lake and vicinity have been received by Hon. A. W. Orton from F. M. Chrisman. There are two thrilling scenes besides several of grain fields, which proves conclusively that grain is grown successfully in that section. Views of the Public School, Odd-fellows hall and Leader building are also included, which shows the class of buildings to be good and substantial. One view, bearing the legend "S. A. Lester's Garden," showing a remarkable growth of vegetation leads one to believe that Sam had some one working for him previous to the time the picture was taken.

Mr. Orton will have the views placed in a conspicuous place, where they will attract much attention and give the stranger an idea of what is doing in the northern part of the county.

To Kill Squirrels

Cedarville Record: The Sunrise Valley Stock Association held a meeting here last Saturday and elected the following officers: President, Wm. Mullins; Vice-President, H. D. Cook; Secretary, F. E. Bush; Treasurer, Geo. C. Turner. The association took up the matter of destroying squirrels, and will obtain Federal assistance for their extermination. The membership of the association is increasing and later on it will take up many things connected with bettering the stock and other interests of the valley, and working as it does with the Federal authorities will be of great benefit to our people, and should be ably maintained by them. The matter of exterminating the squirrels in this valley is a most important thing to be considered, and is now, in a fair way through the Stock Association of being brought about.

Married in Missouri

Frank Schmitz and bride last week returned from Missouri where he went last fall. Mr. Schmitz and Miss Alice Brennan were united in marriage February 12, in St. Joseph, Mo. He is quite well known here having come to Lakeview last summer where he was employed for a time as stenographer for J. D. Venator and book-keeper for Auten & Rinehart. He purchased the old Fuller & Walker ranch on the west side from Mrs. Leslie Vanderool. The bride was an employe in the St. Joseph Times office. They will make their future home on the farm where they have already taken up their residence.

The administration of approximately 92,000 acres, lying southwest of Silver Lake, and locally known as the Yamsey Mountain territory has been transferred from the Paulina National Forest to the Fremont National Forest and is now under the management of Forest Supervisor Gilbert D. Brown, of Lakeview, Oregon, who will attend to all Forest Service matters concerning this territory.

PEOPLE RUSHING TO PINE CREEK

Hotel Man Expresses His Confidence in Future Of District

From the reports of those who have recently visited New Pine Creek, it would seem that the High Grade mining camp as well as the vicinity of the town are indeed dawning upon the era of a great boom.

Numerous people are arriving almost on every train and there is now a large number ready to rush to the mines as soon as the snow clears from the district. It is said that town property has advanced enormously in value and in some instances prices have crept up twenty five per cent in almost as many hours. Options are being given on mining property and some important deals have transpired recently.

In conversation with J. H. Miller who last week purchased the Lake hotel, it was learned that he is an experienced mining man as well as hotel keeper. He came to New Pine Creek immediately after seeing an assay made of some High Grade ore in Denver. Numerous mining people, he said were eagerly watching the analysis of the samples and when the results were obtained, which was an enormous figure, great excitement prevailed. He is thoroughly familiar with conditions of the famous Cripple Creek district and predicts that this has just as bright prospects if not better than the world renowned Colorado districts. He says he knows of numerous mining enthusiasts who contemplate visiting the Pine Creek district just as quick as weather conditions will permit an inspection of the grounds.

"I wrote fifty letters to Colorado people telling them of the wonders of this country," said Mr. Miller while in Lakeview last week, and "I am conscientious in making the statement that the High Grade will make the coming district of the West this summer." He has planned extensive improvements for the Lake hotel and will convert the same into a popular resort. He will be joined by Mrs. Miller about April first when they will take active charge of their property.

FAIR PROSPECTOR VISITS NEW CAMP

Lured to New Pine Creek By Reports of The High Grade

(From Examiner's Regular Correspondent.)

Lillian K. Malcolm who had "Death Valley Scotty" faded as a prospector, during the early days of the Goldfield and Bullfrog excitement, has landed in New Pine Creek, and is getting her outfit ready for a trip to High Grade as soon as possible. She had heard of the good things and rich mines that are being opened in this section and has come to look for the precious metal that in High Grade is known to abound. Miss Malcolm was a considerable factor in the calm Goldfield days, and she has trod the blistering sands of Death Valley and with her small prospector's nick has broken rock from many a croaking in the Funeral and Panamint ranges, that border the great depression that in places is far below the sea level and is the home of the chuckawalls, sidewinder and rattlesnake, and where many a prospector has perished from the ravs of the parching sun. A typical western woman, dressed in pioneer style, with her trusty pistol in her belt she fears neither man nor beast. She goes over the mountain and desert searching for the precious metals. She has climbed the ice capped mountains of Alaska and was one of the first women to reach the goldfields of Dawson City. Miss Malcolm came here from Nevada where she has been for several years and where she has been very successful in her mining ventures. She has now come to New Pine Creek and will remain here as the reports from High Grade have satisfied her that this part of the country is in line for the next great mining movement.
