RAILROAD WANTS FARM EXHIBITS

Great Northern Will At- tend To All Displays of Samples

E. C. Leedy, general immigration agent of the Great Northern Railway is sending out thousands of letters urging the farmers to take advantage of the free exhibits that are to be made this fall by that line. In a long letter giving directions for gathering grains, grasses, fruits, etc., together with shipping instructions, we copy the following in part:

In collecting an exhibit of grains, grasses, vegetables and fruits for exhibition purposes, it is not only important to have good material but it is equally as important to have the same carefully selected and properly prepared. The best exhibition material may be entirely ruined by being poorly put up and improperly packed and as a result, arriving at destination worthless.

It is necessary to permit the grain to get ripe in order that it may show the natural color of maturity. Grain which is selected before it is ripe never loses the greenish cast and never makes an attractive exhibit. It is of equal importance that the grain be not allowed to become too ripe so that it shells out in selecting and shipping.

We will arrange for the free handling of all exhibition material intended for Great Northern Railway Exhibits. Do not ship exhibits on without first writing this office and advising what is to be shipped and we will then arrange to have the local Great Northern Railway agent authorized to accept such shipments and forward without expense.

The Great Northern Railway exhibits have taken front rank where ever they have been shown, including the greatest land product shows that have ever been held in the history of agriculture. We have been able to attain this enviable position by reason of the splendid co-operation of the individuals and commercial clubs along our line.

The season of 1912 and 1913 will mark a new epoch in agricultural and horticultural exhibits from the Northwest in the Eastern states and it is only by the continued co-operation of our friends along the line that we will be able to meet and compete successfully with the best that is produced in any part of the world.

"No language, no pictures, will equal a display of the products themselves.—If you have not the goods to show you have no right to advertise."

Blasts Booming (High Grade News)

The big Modoc mine is now becoming one of the big centers of attraction in Camp High Grade.

A force of men are working two shifts sinking the shaft. The vein is one of the largest and best defined in the district. Fully three feet between smooth walls, the entire vein filling mineralized, with handsome high grade streak that proves the intrinsic merit of the property.

The big boiler arrived at the N.-C.-O. depot this week and is now enroute to the mine via New Pine Creek canyon. The entire plant will be installed as rapidly as human ingenuity and skill can accomplish that end.

The plant consists of boiler, engine, hoist and compressor and drills, of the latest patterns.

The holdings of the Modoc company embrace 250 acres in the core of the camp. Many veins intersect the property and mining men generally express the opinion that it will rapidly develop into one of the great mines of the world.

The company is headed by Wm. Wrigley, Jr., the great Spearmint Chewing Gum Magnate of Chicago, whose faith in the district and Camp High Grade has been fully demonstrated by liberal investments of capital in the property.

Associated with Mr. Wrigley in the Modoc are Napoleon E. Guyot, "The Father of High Grade," and S. F. Cutler, one of the active, moving spirits of the camp.

The present encouraging condition of the Modoc pays a splendid tribute to the wisdom, industry, perseverance and integrity of N. E. Guyot, who first presented the story of its wonderful wealth to the outside world.

Guyot has been misunderstood, slandered, misrepresented and vilified for the noble part he has taken in the camp's development from many different sources. He has proven himself a foeman worthy of their steel, and has vindicated himself and the district in a manner that made all the world listen.

Let the blasts boom on, at the Modoc.

More RichRock (High Grade News)

On Monday of this week the miners employed by McFall and Nelson on the Sunshine Tunnel on which they held lease broke into a body of ore four feet across, all of which pans long strings of colors, and eight inches of which assay very high.

Ore from the 8-inch streak is being sacked, and a shipment will be made from same as soon as sufficient amount has been mined to justify.

The lessees are forming the Sunshine Twin Leasing Co., of which they will be members in connection with E. C. Ahlstrom, Post Master at Lakeview, who has been made secretary and treasurer of the company.

Work will progress on the lease with vigor. A few tons of the rich stuff already encountered will place the company on the sunny side of Easy Street.

The Sunshine Twin Leasing Company will continue to add to its holdings by lease, location and purchase.

Tunnel Enterprise (High Grade News)

The atmosphere is full of ring, pluck, push and enterprise these days. One movement follows another, and everything is astir.

Among the latest of the interesting developments is a project to drive a deep, drainage and transportation tunnel into Sunshine Hill from the vicinity of Cave Lake.

This movement is backed by Wm. L. Shell and others who have carefully considered the situation, both from the standpoint of feasibility, and ultimate profit.

That such a tunnel will very soon be an absolute necessity for drainage purposes, owing to the vast amount of water annually precipitated on the Warner Range, is equally patent to over one who has studied the matter.

Mr. Shell is a practical mining engineer of Cripple Creek, who had charge of some of the great mines of the great, old Colorado camp, and who is thoroughly familiar with tunnel enterprises and their value in the operations of deep mining. He has satisfied himself that with depth Camp High Grade will develop many record breaking rich mines, and that this can only be done through a deep tunnel.

The News heartily indorses this great enterprise, and sincerely desires to see its successful consummation.

The plan is to form a local company to be capitalized for 100 shares of the par value of \$50.00 each, aggregating a \$50.00 cash capitalization: these shares to be subscribed for and payable, \$25.00 per share in cash, on subscription, and balance in twenty four equal monthly installments.

The parties behind this venture propose to drive tunnels from both the Sunset and Surprise Valley sides of the range, to meet a common point in the center of the district.

As transportation enterprise along this movement will be a great profit producer to its stockholders, if not a single ore body is ever encountered, which is among the things seemingly impossible.

Associated with Mr. Shell are Herbert E. Herschberger the best tunnel man in the West, who received his education in that line in a practical way while overseeing over five thousand feet of work in the big Moffat tunnel in Cripple Creek. Capt. F. L. Evans,

\$50 REWARD.
A REWARD of fifty dollars is hereby offered for information that will lead to the arrest and conviction of any person who has stolen wires or other property from our Company; and the same reward is hereby offered for information that will lead to the arrest and conviction of anyone destroying the property of the Company.
Chas. Umbach,
Secretary, Lake Co. Tel. & Tel. Co. (off.)

a mining man of long and successful experience, J. H. Miller, with an extensive and fine record in Cripple Creek, Chas. E. Taylor one of the best practical mining men in the district, and others.

High Grade Brevities (High Grade News)

"Boom!" "Boom!" "Boom!"
Slowly but surely the miners are tearing asunder the quartz-filled, porphyry coated hills of the High Grade District. And with every blast they are encountering new and startling veins that "Horn" good and assay better.

Softly we hear the booster say "I told you so," and "more softly," much more so in fact, we hear the knocker, that ever present pessimistic nobody stowing away his hammer, and, with pick on shoulder, tramping away toward the golden hills.

N. E. Guyot, "Father of High Grade"; also "Father of All Boosters," is back in camp, from San Francisco. He admits that things are looking good in the hay city and positively states that nothing but the words "High Grade and Boost" ever entered his head, with exception of one time when he was eating chicken salad.

A. B. Perkins was a visitor in camp Saturday last. Mr. Perkins is from Phoenix, Arizona.

A new resident who comes from Fort Bidwell, is Mrs. F. H. Mitnell.

Joe Bruner, left Monday for Pine Creek and Alturas on a business trip.

Very rich ore is said to have been discovered on the Josephine near the Big Four by Harry McConnell. The ore carries free gold.

That jovial Mayor of Brantley, Mr. J. P. Brantley, himself, was in High Grade Sunday. He brought the news of several new strikes on Discovery Hill and Yellow Mountain.

Bruce Glidden has opened law offices in High Grade. Until recently Mr. Glidden has been located in Fort Bidwell.

Peter McDonough has opened a butcher shop and grocery in connection with his "Gold Miner Cafe."

L. D. Southworth of Redman, Oregon had not been in town thirty minutes before he fell in love with the place. He purchased a lot on High Grade Street where he will erect a substantial business block.

Two letters from opposite corners of the world drifted into the Recorder's Office Monday. One was from Nome, Alaska, the other from Rhodesia, So. Africa. Ever and anon the wheels of publicity are grinding out their little messages.

Mail service has been inaugurated between High Grade and Pine Creek. The Junior member of the Middagh family is acting in the capacity of mounted messenger.

Telephone connections with Fort Bidwell and the outside world were established Monday.

Mrs. Peter MacDonough gave an ice cream social Tuesday evening. About thirty were present. The ice cream was frozen in a snow bank. Sandwiches and other delicacies were served.

Word has been received by Postmaster Fairchild that the post-office of High Grade has been accepted as open. All mail addressed to the office will be routed via Pine Creek. The Post Office is rapidly nearing completion.

Bonanza Strike (High Grade News)

A vast deposit of surface deposit running from a few dollars up to tens of thousands of dollars per ton is reported from Camp High Grade by a tenderfoot prospector, who drifted into the district several months ago and who has been carefully studying the geological condition of the district from both a practical and scientific standpoint.

The prospector is operating in the employ of the Great West Mining Company, an embryonic organization, formed here for the purpose of demonstrating and publishing to the world, the story of High Grade's greatness.

The two claims of the company are situated in the center of High Grade Mining District and are considered by the owners to be the key to the situation. The entire surface of the claim is covered with thick mat of yellow flow, which assays picture values.

A company is now forming to operate this deposit, and it is reported that sufficient money has been pledged to place the enterprise on its feet.

The deposit consists of a yellow, decomposed quartz, covering 40 acres of ground to unknown depth, over several eruptive dikes of richer material, which promise sensational developments in the near future. Samples show long strings of colors from the pan, and one assay makes miners dizzy.

The company forming is composed of the best local people in the district, and they are confident that with practical, systematic, and practical operations they will develop one of the great mines of the Northwest.

Whooping cough is not dangerous when the cough is kept loose and expectoration easy by giving Chamberlain's Cough Remedy. It has been used in many epidemics of this disease with perfect success. For sale by all dealers.
