THE EXAMINER IS THE OFFICIAL PAPER OF LAKE COUNTY

VOL. XXXIII

LAKEVIEW, LAKE COUNTY, OREGON, SEPTEMBER 12, 1912.

NO. 37

## STATE ELECTIONS ARE BIG SURPRISE

### California Goes Progressive; Maine, Republican; Democrats Gain in Vt.

The results of the elections held in different states in the Union last week indicate many complications at the final election for president of the United States.

The progressive party captured California with an overwhelming vote and President Taft was repudiated. It is said that Taft leaders have already begun a discussion of plans for placing their candidates on the November ballot. By the ruling of Attorney-General Webb, their only recourse is to launch special petitions, each of which must bear the names of 11,000 voters who did not participate in the primaries.

The republicans sustained a loss of 43 per cent of the vote in Vermont which elected Prouty as governor of that state four years ago. The democrats gained 27 per cent.

The republicans gained victory in the struggle for the main control of Maine. One of its four congressional districts went democratic.

In all the states the most bitter fights for electoral votes between the new progressive party and the republican party.

## NEW SYSTEM FOR IRRIGATING LAND

### Man in Northern Lake Digs Large Cistern and Uses Pump

Silver Lake Leader: How to obtain from a reliable source a sufficient amount of water to irrigate the so-called desert and insure good crops, without depending upon rain, has been the one great serious problem which has confronted the homesteader in that part of the Fort Rock valley which can not be watered from living stream or lakes at a cost which would be profitable. Mr. F. C. Eickemire has successfully solved the proposition by digging a cistern 27x32, 17 feet deep, then boring a ten-inch hole till he struck living water which raised up and stood eight feet in the cistern. With a 6-horse power Old's gasoline engine and a 4-inch centrifugal pump, with a capacity of 400 gallons per minute, he raises the water about 20 feet to the top of a ridge, from which it can be distributed to any part of the ranch. Mr. Eickemire estimates that he will have sufficient water to irrigate 50 acres of land during the summer, but by flooding the land during the winter will be able to increase to 100 acres. The plant was not installed in time to be of much service this year but will surely do good service next season.

E. R. Patch has been called East to attend his mother who is reported ill.

## RUNAWAY TEAM INJURES TWO MEN

### P. C. Coon and Jack Miller Thrown From Wagon Near Paisley

The following is from the Chewaucan Press in regard to the accident that occurred near Paisley, a brief account of which was in last week's Examiner: Monday P. C. Coon and Jack Miller met with an accident on the road to Little Chewaucan, which might have proven fatal to both.

They were taking a load of supplies to the round-up camp, and had just crossed the mountain and started down on the other side when the team they were driving broke away and ran down the mountain side. They left the road and started off through the mahogany. The hill is very steep at this point, and the horses had not run far before Coon and Miller were both thrown from the back.

When John Elder and A. E. Banister, who were following in another wagon, saw the accident, arrived upon the

scene, they found Coon lying in the road and Miller sitting on the hillside a few rods farther. Coon had evidently been dragged about 100 yards. Both were in a semi-conscious condition and badly bruised up.

The wagon was lying against a juniper tree on farther down the mountain, side up, with part of the wheels entirely missing, and the team had continued its journey alone.

Elder and Banister loaded the cripples in their wagons and brought them to Paisley as quickly as possible, arriving about three o'clock in the afternoon. Dr. Thayer was summoned at once, and an examination revealed that Coon had broken a bone in his arm and several ribs, beside several minor bruises. Miller was but little more fortunate, and received a dislocated shoulder and a deep gash on the side of his head. Both at this writing are pretty stiff and sore, but a week or two will probably see them well again.

## BODIES TAKEN UP FOR RE-INTERMENT

### Remains of Frank Bauers Taken to Ashland--E. H. Loftus Moved Here

Last Sunday Undertakers Wallace & Son went to Crane Lake and disinterred the remains of E. H. Loftus, father of John, Henry and C. C. Loftus, who had been buried there for twelve years.

The body of Frank Bauers, who died about six months ago and was buried in the I. O. O. F. Cemetery, Lakeview, was taken up Monday and removed to Ashland for reburial. Mrs. Mary Bauers and son Frank accompanied the body, they leaving Tuesday morning by way of Reno and Sacramento. The casket containing the remains of Mr. Loftus was reburied in the Bauers grave Monday afternoon. Mr. E. H. Loftus was the father of Mrs. Bauers.

## Some Plum Tree

Alturas Plumber: We visited New Pine Creek last week and stopped at the Bonner ranch on Sugar Hill to inspect a plum tree growing in the orchard. The tree was planted many years ago by the father of the Bonner brothers and is a Wisconsin wild plum tree. It is estimated that the tree bore this year fully a ton of fruit and judging by the number of boxes gathered and the amount still on the tree we are satisfied the amount was not over estimated. The fruit was sweet and juicy, and found ready sale. Now just figure a little. A ton of fruit produced on one tree, what would an acre produce? It will give one an idea of the value of fruit lands, once we have a railroad to carry fruit to market.

Eugene Bayless and Miss Mina Smith, of Bly, were last Friday evening united in marriage by Rev. Melville T. Wire at the Green Garden House. Mr. Bayless came to Bly quite recently, while the bride has lived there for some time. They left on the western stage and will probably make their home at Bly. The Examiner joins their friends in extending congratulations.

## LAKEVIEW TO GET CREAMERY PLANT

### Rumored That Outside People Will Equip 500-Cow Creamery

Rumors have it that Lakeview is to get a creamery within a period of a few months. It is said that the men behind the deal are from Reno and California and it is their intention to equip the creamery to use the product of 300 to 500 cows. The company expects to spend \$20,000 for cows alone, to be sold to the farmers. It is also said that some of the prominent sheepmen of the county have signified their intention to sell their sheep and take up the dairy business.

A creamery is a sadly needed enterprise in this section, as considerable money is sent out of the country every year for butter. The range conditions and winter feed are the best for cows and it is to be hoped the promoters of this scheme will meet with sufficient encouragement to make their plans carry.

## STOCK RATES DECREASE

### N.-C.-O. TO ESTABLISH COMPETITIVE SCALE AFTER OCTOBER 4

### Sixty Cars of Sheep Will Be Shipped Out of Lakeview This Month--New Rate Same as From Klamath Falls

The following letter from H. V. McNamara, of Reno, to V. L. Snelling, local livestock agent, regarding shipments from Lakeview over the N.-C.-O. Ry., is self explanatory. The fact that these rates are to be established will be a revelation to the Lake county stockmen. Mr. Snelling informs us that he expects the market to take a decided upturn within the next few weeks and says there are now about 60 cars of sheep that will be ready for shipment by Sept. 18.

The letter follows: "Reno, Nevada, Sept. 3, 1912. "Mr. V. L. Snelling, "Lakeview, Oregon.

"Dear Sir: Confirming my conversation with you yesterday:

"I wish to advise that competitive rates will be put in from Lakeview and published about October 4th, making the same rate on sheep to San Francisco as now carried from Klamath Falls. In making this rate we used the following basis:

"Sheep from Klamath Falls, Oregon, to San Francisco is \$75.00 per 30 foot car, or \$89.09 for a 36 foot 6 inch single deck car. We figure that 135 sheep can be loaded in each single deck 36 foot 6 inch car, and 90 in each one of the 30 foot cars. This would make

three of our cars equal in carrying capacity to two single deck standard 36 foot 6 inch cars. On this basis three of our 36 foot cars at \$44.00 to Doyle, equals \$132. Two standard 36 foot 6 inch cars at \$44.25 to San Francisco equals \$88.50 or a through rate of \$22.50 Lakeview to San Francisco for 270 sheep. The rate for two 36 foot 6 inch cars from Klamath is \$178.18 for the same number of sheep—a difference against us of \$42.32 for 20 sheep or about 15-2 cents per head. However, you can use double deck cars out of Doyle or Reno, which will reduce the difference to about 10 cents per head per sheep. The double deck rate for 36 foot 6 inch cars is 10 per cent of the single deck rate, or \$75.23 for 270 sheep. By using three of our cars to Doyle at \$132.00 makes a through rate on a double deck car Lakeview, Oregon to San Francisco of \$207.23. Basing this against Klamath rate for two single decks of \$178.18 it means a difference of 29.05 or about 10 cents per head higher from Lakeview than from Klamath. This will be absorbed and published, as I stated above on October 7th.

"Yours truly, "H. V. McNamara, Traffic Manager. N.-C.-O. Ry."

## NEW SCHOOL HAS MANY ADVANTAGES

The installation of Domestic Science and Art into our schools up until the last few years has been confined chiefly to city schools. But as the views and principles of educators broaden, it is found that mind and hand must be trained together in order to produce a practical person when school life is over the life's duties begin. So it is that now, nearly all of our schools are, to some extent, teaching industrial work.

The girls of the Public Schools of Lakeview are very fortunate in being able to have a thorough course in Cooking and Sewing, and an equipment sufficient for its promotion.

This work may be and should be correlated with Reading, Language, Spelling and Geography in the grades, and English, Physics, Chemistry, and Botany in the High School. One may help the other, and to some extent, will be made to do so. Also the home work of the girls should be given recognition, and it is hoped that each may prove an incentive to the other.

In making out a Course of Study for this school, this beginning year, much thought has been given to make it cover the object of the course, and at the same time be of practical use in this particular section.

The work actually begins with the first grader, who under the supervision of his teacher learns to use his hands in paper cutting, folding, weaving, etc. In fact, the first three grades bring out the capabilities of the child in a strong degree, so that when the fourth and fifth grades are reached quite effective work is done, and the foundation for sewing proper, well laid.

The State Course of Study gives a suggestive course in sewing, which we have followed to some extent. The following outline shows some of the problems we hope to work out this year:

- 4th Simple Ruffia and Reed.
- Beginning stitches on Java Canvas, Burlap Articles.
- By the assistance of the teacher we expect the boys of this grade to do some of this work also.
- 5th Aim:—Introductory Work.
- Articles:—Chrocheting and Weaving.
- 6th Aim:—Simple stitches.
- Art:—Towel, dust cloth and bag,

- iron holder and button bag.
- 7th Aim:—Same on more advanced articles.
- Art:—Towel, apron, patching, hem-stitched towel, stocking darning, mending.
- 8th Aim:—Review stitches, decorative stitches simple pattern cutting.
- Art:—Napery, patching and darning, petticoat, laundry bag, kimona.
- 9th Aim:—Use of machine and simple garment making.
- Art:—Easy machine-sewed articles, underwear.
- 10th Aim:—Drafting, simple dress-making.
- Art:—Shirt waist, lawn or dimity dress, white lawn or linen waist.
- 11th and 12th. Optional.
- Aim:—Hand embroidery on garments. Advanced sewing—hand and machine.
- As this class will be optional, full details cannot be given until the class is organized. Any of the above problems may be changed should circumstances so advise.
- An exhibition will be given at the end of each semester and the work of the pupil will be kept by the school until that time.

Cookery A very complete laboratory has been equipped for this work, also a dining room service provided, and it is expected that this department will be one of the most interesting features of the school. It must be understood that this first year course will not be like the years which follow. Some of our girls, we hope, will complete the High School this year, therefore, for their benefit a course has been arranged which will include 11th and 12th grade girls. Another year, it can be placed in the years of the High School where it more properly belongs. This may apply to sewing as well.

An optional class of the 9th and 10th grade girls will be formed in which the course will be planned with a thought to future classes. It is also hoped that a boys class in cookery can be organized.

Special attention will be given to the preparing and serving of meals. The members of these classes will be required to wear a uniform during laboratory hours. This will be fully explained at organization.

In planning for the year's work in sewing and cooking, care has been taken not to add a heavy burden to the parents in supplying the materials, etc., and we earnestly solicit your cooperation, hoping that you will be free to converse with the instructors on any phase of the subject not made clear.

O. U. Metcalf, of the freight and passenger department of the S. P. arrived the first of the week from Reno and spent several days in this section on business connected with his line. He brought with him a beautiful painting of Del Monte that was presented by his company to the Ladies Civic Improvement Society. The ladies have several other pictures and a large map that were presented them by the Southern Pacific. This is a kindness that is greatly appreciated by the ladies as well as all the citizens of Lakeview.

## THRASHING OUTFIT FOR NORTH END

### F. M. Chrisman and Gus Schroder Invest in Rus-sle Machine

Silver Lake Leader: F. M. Chrisman and A. B. Schroder have closed a deal for a brand new threshing outfit. Both engine and separator are the Russel & Co. make and the engine being a ten horse traction and the separator a 24-inch cylinder. The outfit will be in Bend by the 10th of September and it is the intention of the owners to bring it in at once. On the way in they will stop at Fremont and Fort Rock and thresh, if the people so desire. This part of the country has needed a thresher for some time and no doubt the investment will prove to be a profitable one.

## Weather Was General

What was to have been the grand Labor Day celebration for the organized laborers of Portland at Crystal Lake Park, near Milwaukie, was partially abandoned because of the inclement weather.

The above from the Oregonian would indicate that Lakeview was not alone in experiencing bad weather on Labor day, and that it was not so bad here as elsewhere. The inclement weather was not sufficient to dampen the ardour of Lakeview's picnic goers and especially that of the Irish boys and ladies who gave it. And it is some consolation to know that other celebrations were abandoned while ours was such a success.

The Teachers' Institute this year promises to be the most instructive one ever held in Lake county. All who can possibly attend the day session should do so and hear Dr. Winship. Dr. Winship is preeminently one of the best educational men, always drawing large crowds in the largest cities. Word has been received that C. H. Jones, editor of the Oregon Teachers Monthly, will be here for the institute.

## FILINGS INCREASE SINCE NEW LAW

### Commissioner Dennett Making Tour of West Aiding Local Offices

Of the 300,000 homestead entries on file with the Interior Department, Commissioner of the General Land Office, Fred Dennett estimates that the number of final proofs led in the next 12 months will increase 50,000 due to the Borah three-year homestead law.

"Already applications for final proof are pouring into the General Land Office," says Dennett, "and expect the proportion will grow rapidly, because the settlers are learning of the new provision, and a large number of them who already have spent three years or more on their land, will hasten to take advantage of the new privilege."

Commissioner Dennett is making a tour of the West, aiding the local offices to adapt their work forces to the reduced appropriation made by Congress, the total having been reduced for field work from \$650,000 to \$500,000.

## INTEREST IN GUN CLUB IS REVIVED

### New Members Are Being Taken In and Preserve Will Be Protected

A meeting of the Goose Lake Gun Club was held in the Forest Office Friday night. At this meeting promoters of the club decided to increase the membership and employ a man to look after the grounds. They own 120 acres of land at the head of the lake and have considerable ground under lease.

The choicest bird haunts on the lake have been acquired and if properly secured will afford splendid hunting for its members for all time.

Mr. Bernard was appointed at the first meeting to make a canvass of the town in the interest of increasing the club's membership and at another meeting held Tuesday night, reported that he had secured several new members and that many more had signified intentions of joining. All the grounds of the club owned and under lease at the head of the lake will this week be posted with trespass notices, warning all non members from hunting on the lands. The gun club has been to considerable expense in getting their property and in erecting a club house and with their holdings will have plenty of shooting for all the desirable local members who care to join.

## LAKE STILL LEADS IN LAND ENTRIES

### Land Office Report for Aug. Shows Much Land Was Taken

The Examiner is indebted to Hon. A. W. Orton, register of the U. S. land office for the following lists of lands in acres entered and relinquished in Lakeview Land District for the month of August 1912:

Land entered: Lake county, 11,177.32; Klamath county, 1,762.84; Crook county, 1,994.31.

Land relinquished: Lake county 2,673.58; Klamath county, 603.47; Crook county, 1,181.56.

While Lake county is ahead in both entries and relinquishments the above shows that it leads the other two counties in this district in entries by over 7000 acres, while it is only ahead about 900 acres in relinquishments over that in Klamath and Crook counties.

A party consisting of A. M. Davis, Jr., George A. Davis, George T. Rud-dock and L. T. Blanding last week motored up from Berkeley, Calif., and went over to Warner Valley to inspect some land. The Davis brothers are said to be interested in the large Emporium store of San Francisco. They stayed in this section several days but nothing was given out in regard to their plans of making any purchases in the Warner Valley.

## RAILROAD MEN MAKE BRIEF VISIT

### Amadee Moran and General Manager Dunaway Came Up in "Special"

Amadee Moran or Moran Brothers, principal stockholders of the Nevada-California-Oregon railway, who came to Reno to attend a meeting of the board of directors of the road, and Vice-president and General Manager T. F. Dunaway, Tuesday came up from Reno on a special arriving in Lakeview at 7:30 in the evening.

It is said that extensive improvements and betterments are contemplated by the management, which will include the building of several depots at different stations along the line. Their visit in Lakeview, however, was very brief and no information was given out, other than in the lines of regular business. They returned to Reno the following morning.

J. T. Flock, of Rock Creek is registered at Hotel Lakeview this week.
