

HOW TO DECIDE FOR BOY'S FUTURE

Just two kinds of boys attend college—those who come and those who are sent." So spoke the president of an agricultural college. "With the former the faculty have no trouble. Such boys mean business and as a rule, they make their mark in the world."

"This thought should be of great assistance to the farmer confronted with the question: Shall I send my son to college? College may be the making of the making of a character—so may staying upon the farm. Every normal father desires the welfare of his children. How decide? Watch the boy! Give him a chance in the direction his taste naturally lies. Many a boy cut out to be a merchant fails because his parents won't give him a chance. Many a boy fails as a farmer because he should have been a blacksmith or a lawyer. Every normal boy is by nature better equipped for some one thing than for anything else. Here is the father's cue. If the son has a mania for making things, cultivate and educate that mania.

"The boy will largely train himself up to a certain point. Then if he wants a college education enough to work his way more or less he may safely be trusted to make a start. If he is half-hearted about being sent, it is not safe to send him. The safest college for such a boy is the agricultural college, because he will there be associated largely with farmers' sons, and be in contact with farm subjects. Should he return to the farm he will not have departed so far from the farmers' line of work as he would had he been sent to a different kind of a college."

At the Oregon Agricultural College last year there were 283 students who earned every cent of their expenses, 160 more who worked for half the money they spent, and 23 others who earned some part of the money for their college course.

For the boy who wishes to go into the business world, there are both two and four year courses in the school of commerce; for the boy who would like to become a blacksmith or a carpenter there are special courses in forge work and carpentry in the school of engineering; for the boy who has an attitude for electricity, surveying, mining, or road building there are also special engineering courses.

Farmers' sons and those from the fruit and cattle lands, however, are offered a wide choice of agricultural branches of training, in which they can prepare themselves either for special work in some one line, or for general farming, either under the condition of the most western part of the state or those of the dry farming regions of the east.

BOOSTERS MAKE OTHERS BOOST

If you want to become a booster in your community begin in a small way. Just do the little things you know should be done, and you will be surprised to see how quickly they will take root and grow into big things. We believe that more people would be boosters if they understood the word rightly. To be a real booster one must believe in one-self. Further, he must believe in his town, his community, the people about him and above everything else he must see the best in everything.

Do you know that we grow by actually doing something? Another thing we grow in the direction in which we act. If you are a tumbler by nature, you will help the town build. If you think in a constructive manner, it's a fact that others about you will begin to think and act in the same way. So that your being a real booster actually creates other boosters. In a community of people all think one way, and that way is toward development, it is certain that community will grow. If you help others you help yourself. It's to your own interest that your town, the community in which you make your home, should be progressive. You are the man that reaps the results of your own boosting. Are you a real booster? —Exchange.

ANOTHER PRODUCT FOR THE FARMER

As accidental discovery made recently by a Missouri agriculturist, is calculated to do more harm for the "back-to-the-farm" movement than anything that has happened in rural life since some genius converted barbed wire fences into a complete telephone service, and put every gossip loving farmer's wife on a party line.

This Missouri corn king, through one of those fatalities such as have given to the world the telegraph, and gun powder, and steam engines, and other great inventions, fell into his silo while pottering around the barnyard one afternoon, and before he could scramble out and swallow a tremendous gulp of the liquid at the bottom, which had been produced by fermented encilage.

Inclined at first to rage his sputterings of distress were quickly turned to ejaculations of delight, as there swept over his countenance a realization that he had discovered a way to beat the local option laws and the city liquor man who sold him bottled prussic acid and prune juice with a deceptive label on it. The silo had been a stillhouse, and he hadn't known it!

Quickly the news spread among the neighbors. It crossed Missouri in a night, and swept Kansas like a prairie fire. In a couple of days it was up in Iowa, and the news had become the sole topic of conversation at every crossroad general store in Nebraska. In a week the Saturday night importation of "red-eye" from town had fallen off 50 per cent in half a hundred counties in the corn belt, and the St. Paul and Chicago supply houses were deluged with orders for silos.

The Agricultural Department experts had been trying for years to induce the farmer of the West to adopt the silo, and save the 60 per cent of food values in cornstalks which now go to waste, and when Tampa Jim Wilson heard the news about the sudden demand for these modern necessities of the farm he prepared to get out a bulletin. Meanwhile the silo jags are spreading through red bandanna land like an epidemic of mumps at a prep school, and farmers are making ensilage, now who used to plow their cornstalks under and buy feed for the stock. Great is science!—Washington Post.

for Railroad Commissioner from the second district.

OREGON CENTER OF THE COUNTRY LIFE

Centering his attention on the school industrial exhibition at the state fair and on the work of State Superintendent Alderman in general, E. A. Smith, who is connected with the editorial department of the Twice-a-Week Spokesman-R view, is in the city, says the Salem Statesman.

Mr. Smith declares that Oregon is the center of the country life movement in the northwest at the present time. He believes that Superintendent Alderman, the commercial clubs of the cities, the livestock people and Oregon Agricultural college, working together as they are, are giving Oregon a leading place in the nationwide movement.

Mr. Smith speaks highly of L. J. Chapin, who has come to Salem to assume the management of the farm survey which the farm management department of the government agricultural department has established in Marion and Polk counties. He has been acquainted with Mr. Chapin for some years and says that he is one of a very few men who are qualified to hold such a position. Mr. Smith thinks that the biggest opportunities for young men at the present time lie in fitting themselves to become agricultural experts. He says that the supply does not begin to meet the demand.

PUBLICITY WORK FOR NORTHWEST

Lewiston, Idaho: Permanent organization of the Columbia Cello-Panama Waterways Celebration has been perfected at a general meeting of the provisional committee of One Hundred held in the Commercial Club room. The meeting was largely attended, and the discussions disclosed the unanimous view that the proposed celebration would constitute the most effective publicity campaign in the history of the Columbia Snake basin and one which would exert a most beneficial influence in bringing to the people of the Inland Empire and the Pacific Northwest a proper appreciation of the influence of open waterways on the future of this section of the United States.

The Oregonian, in commenting on this matter, said: "The events which Lewiston proposes to celebrate will open a new epoch in transportation throughout the northwest. The celebration should, therefore, be an occasion of rejoicing in which the people on both sides of the international boundary from the Rockies to the Pacific ocean will assemble."

"The promotion of this celebration will justify us in exploiting to the world at large the great resources of the territory of which we are a part, the importance and value of which are obvious."

To provide temporary funds for immediate preliminary work, the members of the Board of Directors have subscribed the sum of \$1,000.

GRAIN SHOULD BE KEPT IN STATE

That Oregon is making a great mistake in exporting its grain instead of feeding it to livestock, is the belief of Dr. James Withycombe, director of the experiment station at the Oregon Agricultural College, expressed strongly in a recent address before the Portland Advertising Club.

He pointed out the fact that there are ten million acres of dairy land in Oregon, and that two acres can support a cow. Thus five million cows, each worth a \$100 profit annually, or five hundred million dollars altogether in profit each year to the state could be fed on this land.

By feeding the grain instead of exporting it, Dr. Withycombe estimates that the farmer could get 50 cents more a bushel, or on a crop of fifteen million bushels for the state, \$7,500,000. The export of \$101,000,000 worth of dairy produce, bacon and eggs from Denmark, which supports a population of 2,600,000, under trying climatic conditions, proves conclusively what can be done under right management. Oregon, with its fine climate and rich variety of soils should be able to do even better.

Will Become Citizen
Washington, Sept. 9.—Acting Attorney-General Harr has instructed the United States Attorney at Seattle, Wash., to agree to a reversal by the Circuit Court of Appeals of former Judge Hanford's decision concerning the citizenship of Leonard Olsson, a Socialist, which resulted in impeachment proceedings against Judge Hanford and his resignation.

The United States Attorney will file a stipulation which practically will be a confession of error. This is expected to cause the Circuit Court to restore Olsson's citizenship.

MORE RAILROADS FOR THE INTERIOR

Madras Pioneer: Last Thursday Chairman L. W. Hill of the Great Northern and associated lines slipped into Portland and out again very unexpectedly, and that night arrived in Redmond, in company with Mrs. Hill and Messrs. W. S. Davidson and Lloyd McDowell, the party leaving Redmond, by auto, early Friday morning for Albany, having as its purpose and inspection of the company's timber holdings in that section—timber for which the markets are evidently calling.

"We made the trip to the interior of the state at this time to consider carefully several propositions we have in mind," said Mr. Hill after his return to Portland early in the week.

"While it was our intention on this trip to attempt to cover the agricultural districts of Central Oregon, since we are making a special trip to look over timber, we found wonderful crops of grain and alfalfa from Eastern Oregon to the foothills of the Willamette in Western Oregon, as well as grain, fruit, and vegetable crops, that I doubt could be excelled anywhere.

"If you want to realize just how much room there is in Oregon for thrifty families, it is but necessary to make a trip similar to the one we have just completed. It is apparent there is room for thousands of new families where they will have little, if any, difficulty in making a prosperous living with an enjoyable and comfortable home.

"The coming fall season of county and state fairs will be an education even to the Coast cities, of what their own resources are, and the Fall and Winter land shows in the east should be taken advantage of to exploit, in a profitable manner, before the people of the East, the wonderful diversity of the resources of this state. We are extremely glad to notice the result of our exploitation, and also that there is a noticeable increase in inquiry for Oregon homes and Oregon lands.

The "several propositions" referred to by Mr. Hill can have but one meaning when sifted down, more railroad mileage for Crook County and Central Oregon. With the Harriman roads definitely heading for the big timber of the upper Des Chutes, and with their own east and west surveys completed and a vast acreage of choice timber already under their ownership, it is not likely that the Hill interests will long remain idle.

The recent trip was the first visit of Mrs. Hill to Central Oregon and she was very enthusiastic and outspoken in her praise of the "new" country, in the development of which the members of her family are playing such an important part.

Religious Publication
The importance of having a good religious periodical in every home cannot be emphasized too strongly. It is just as essential to provide material for the culture of the mind and soul as to furnish food for the body, and to select the right kind of mental and spiritual nourishment demands perhaps greater care and attention than to supply provision for the needs of the body.

The American Messenger, published monthly by the American Tract Society, is an illustrated religious publication. It is a paper for everybody. No other fills its place. Founded in 1843, to meet the demand of a high class, nonsectarian religious paper, at a price within the reach of all, it has filled its purpose so well that today no other paper of its class quite compares with it. It has been the favorite religious periodical of thousands of Christian families since it was founded, seventy years ago.

Party Pledges

President Taft in his keynote speech accepting the nomination of the republican party for re-election, touched on the desire of the party to promote the interests and welfare of the farmers. The democratic party while refusing to repeal the Canadian reciprocity law, still maintains that it is the real friend of the farmer. The Bull Moose party at Chicago on August 5th, asserted in practically so many words, that the farmer's good was its highest ambition. The Prohibition party, the Socialist party, and any other parties claiming recognition of the people, will also claim, without doubt, that if the tenets and beliefs are accepted universally, the farmer will be led gently into ways of peace and happiness and contentment.

\$1,000 REWARD

The Oregon California and Nevada Live Stock Protection Association, of which the undersigned is a member will give \$1,000.00 reward for evidence leading to the rest and conviction of any party or parties stealing horses, cattle or mules belonging to any of its members.

In addition to the above, the undersigned offers on the same condition \$500.00 for all horse branded horse-shoes or a both or either new Brand recorded in any county, Range Harney, Lake and Crook counties. Horses rest when sold.

Some but grown horses sold, and only in large numbers

"OUR CUSTOMERS ARE OUR ADVERTISERS"

LAKE COUNTY ABSTRACT COMPANY

Incorporated.

A Complete Record

We have made an entire transcript of all Records in Lake County which in any way affect Real Property in the county. We have a complete Record of every Mortgage and transfer ever made in Lake County, and ever Deed given.

Errors Found in Titles

In transcribing the records we have found numerous mortgages recorded in the Deed record and indexed; and many deeds are recorded in the Mortgage record and other books. Hundreds of mortgages and deeds are not indexed at all, and most difficult to trace up from the records.

We have notations of all these Errors.

Others cannot find them. We have put hundreds of dollars hunting up these errors, and we can fully guarantee our work.

More People Are Beginning to Think

every day that this question of home-building we've been talking about is really a worthy topic. When they stop to consider the great influence a nice home has on a family and notice particularly the success that comes to those people who pride themselves in their homes, they come to realize that our talk is not based solely on the desire to sell lumber. Of course, we're here to dispose of as much lumber as we can and we urge its use in home-building because we believe it's the best all round building material on earth today. We've been studying home-building for a good many years and we think our stock is pretty good—come in and see what you think of it.
