

A BUNGALOW FOR ANY CLIMATE.

Design 977, by Glenn L. Saxton, Architect, Minneapolis, Minn.

Copyright, 1912, by Glenn L. Saxton.
PERSPECTIVE VIEW—FROM A PHOTOGRAPH.

This design is adapted to the climate of southern California, Canada or the Atlantic coast. Living room across the entire front, with beamed ceiling and open fireplace; circular bay in the dining room, with large kitchen, pantry and abundance of cupboard space. Two bedrooms in the first story, besides the bathroom; in the second story three chambers, bathroom and sleeping porch. The house is brick veneer with pressed brick that cost \$25 per thousand. The gables are treated with English half timber effect, rough cast in the panels; wide projecting cornice supported on sawed brackets. Full basement. First story ten feet, second story eight feet. Size 32 feet by 48 feet. First story in red oak, birch or Washington fir, second story pine to paint. The sun room in Washington fir. Cost to build, exclusive of heating and plumbing, \$8,400.

Upon receipt of \$1 the publisher of this paper will supply Saxton's book of plans, entitled "American Dwellings." It contains 254 new and up to date designs of cottages, bungalows and residences costing from \$1,000 to \$7,000.

IF IT COSTS MORE TO LIVE
IT COSTS MORE TO
OVERLOOK THE
ADVERTISEMENTS

WHEN Things cost more, opportunities to buy economically are worth more. No housewife in this city, who feels and knows the slightest hardship on account of high prices, can afford to remain blind to the weekly opportunities of saving offered to her by the advertising merchants. These alive merchants are often able, through effecting quick and large sales of an article, to cut the selling price to very nearly cost price. The housewife should see that when they do this the volume of quick sales will always repay them. Watch Examiner Ads week by week. It pays.

Lake County Examiner

CREMENT.
If you are a taxpayer, why do you spend your money on paving and grading country highways so often fall to put on the finishing touches necessary to make the roads passable. We refer to the practice so often followed of scraping to the center of the road clods, sod and weeds and leaving them there in a rough and unsightly ridge, when a little work with a disk pulverizer or common drag would do much toward inviting traffic. The writer is well acquainted with the aversion of the average man to hauling any kind of a load over soft and newly made roads, but the condition in which lots of roads are left is taken as sufficient ground for steering shy of them even with an empty wagon.

A NEW METHOD.
A Minnesota farmer in a discussion of the problem of quack grass eradication recommends a plan that he has found entirely successful, one in which he did not find it necessary to lose a year's use of the land. He began his campaign of eradication the latter part of August following the removal of a crop of small grain. He first used a deep tilling machine, plowing the soil to a depth of sixteen to eighteen inches. He harrowed immediately after and double disked three times at intervals during the fall. In the spring he harrowed thoroughly, seeded to wheat, and on harvesting it not a spear of the quack grass was to be seen. This method is different from those usually recommended, but the results obtained seem to furnish strong argument in its favor.

FARM MACHINERY.
Very satisfactory machines have been perfected for the harvesting of small grain, picking corn and digging and sorting potatoes, but as yet no machine has been devised which will pull and top beets. To meet this need the Great Western Sugar company of Denver has offered a prize for a practical sugar beet puller and topper. The motive power for the machine must not exceed four horsepower per beet row. The machine must pull and top all the beets, separate the beets from the tops and leave both convenient for loading. The awarding of the prize by the company does not entitle it to any interest in the invention or machines of the successful contestants.

ABOUT ANGLEWORMS.
The appearance of angleworms in large numbers after a heavy rain is not to be taken as conclusive evidence that they have "rained down." The fact of the matter is that angleworms can't live under water any more than can other land creatures and show up in large numbers following rains in an effort to get needed air, their places of retreat being full of water. In proof of this theory the writer well remembers some years ago the appearance of thousands of dead angleworms on a flat that was suddenly flooded with a freshet. The worms succeeded in getting out of the earth, but were not able to escape from the relatively large body of water above.

KILLING THE CORN WORM.
At the Kansas agricultural experiment station they have been conducting some experiments along the line of dusting the silks of sweet corn ears with equal parts of lead arsenate and lime to kill the worms that eat in the ends of the ears. In one plot of corn thus treated worms were found in but 25 per cent of the ears, while on a tract of like size untreated they were found in 75 per cent of the ears. The silks were kept covered with a light dusty coat. No harm comes from the poison, as it washes off readily.

THE SPARROW PEST.
The writer does not advocate the practice of a boy in his early teens monkeying around with target rifles that use powder and bullet, but believes this same small boy could satisfy his hunting instinct and render a real service if he were provided with one of the latest type of air guns and would start a campaign against the English sparrows that throng the place. The head of the house might encourage the enterprise by offering a bounty of 2 or 3 cents apiece for every sparrow killed.

SAVING FERTILITY.
Virgin soil was never so richly endowed with fertilizing elements that continued abuse in the shape of cropping and making no return in the shape of legumes and fertilizers would not wreck and prostitute it. Many an eastern farmer has learned this fact to his sorrow, but too late to save himself. The owner of the fat farms of the Mississippi and Missouri valleys should heed the warning of the abandoned New England farm before it is too late.

REWARD UNCLAIMED.
The reward is still unclaimed that was put up some time ago for a nesting pair of passenger pigeons, the species that forty years ago in migratory flights of many millions used to shade the sun. Along with the Indian and some other creatures the pigeon could not stand the iron rods of the white man's civilization (perhaps it were better called inhumanity) and is now practically but a fact of natural history.

BERYFORDS BUILD SPLENDID EDIFICE

From The Irish News
The new Beryford building is now practically completed and already several of the tenants have moved in, including the Government Land Office, Snyder & Reynolds and the Post Office. We have met many people who have seen through and examined the details of the building and have yet to find one who has not been impressed with the conveniences which it contains, or will have when finished, in the way of steam heat, electric lights, elevators, etc. The Mercantile Company expect soon to occupy the entire south east corner of the first and second floors, both of which are spacious and well lighted. The third floor contains many rooms which will be fitted up for office purposes, each to have running water, steam heat and electric lights. Although not of the sky scraper type, the new building will compare favorably with any modern business block as one finds in San Francisco, Portland or other big cities along the coast.

The Beryford Brothers, William, or "Doc" as he is familiarly known hereabouts, and Jim, are to be thanked by the people of this community for the interest which they have shown in its welfare, as evidenced by the construction of the above mentioned building and other local improvements. Unlike many others who have made money in this section of Oregon, they prefer to spend at least a part of it in the upbuilding of the community in which this money was made instead of removing to California or some other state and there spending much money in the construction of costly residences or investments in real estate.

A Better Offer
"We want you to confess" said the captain of the police.
"To whom?"
"To us. There's \$50 in it."
"G'wan," said the New York gunman.
"I've already arranged to confess to the magazines at that much per chapter."

Pleasant Card Party
From The Irish News
On Wednesday evening last a card party was given at the Parochial residence here for the purpose of raising money to help defray some of the expenses of the church. Tickets had been sold in advance by several of the local parishioners, Patrick Larkin alone selling thirty five, and it is needless to say that the efforts of all who assisted in any way were rewarded by the large number in attendance. Progressive Whist was the main feature of the evening and when the game had finally been completed it was found that Miss Bride Flynn had won the ladies' prize, while Patrick Larkin had a walkover with the gentleman's trophy. Songs and recitations were also rendered by several of the guests, followed by refreshments—of which all partook heartily. It is needless to say that a good time was enjoyed by all present.

BEST COUGH MEDICINE FOR CHILDREN
"I am very glad to say a few words in praise of Chamberlain's Cough Remedy," writes Mrs. Lida Dewey, Milwaukee, Wis. "I have used it for years both for my children and myself and it never fails to relieve and cure a cough and cold. No family with children should be without it as it gives almost immediate relief in cases of croup." Chamberlain's Cough Remedy is pleasant and safe to take, which is of great importance when a medicine must be given to young children. For sale by all dealers.

WHAT THE KIDNEYS DO
Their Unceasing Work Keeps Us Strong and Healthy

All the blood in the body passes through the kidneys once every three minutes. The kidneys filter the blood. They work night and day. When healthy they remove about 500 grains of impure matter daily, when unhealthy some part of this impure matter is left in the blood. This brings on many diseases and symptoms—pain in the back, headache, nervousness, hot dry skin, rheumatic pains, gout, gravel, disorders of the eyesight and hearing, dizziness, irregular heart, debility, drowsiness, dropsy, deposits in the urine, etc. But if you keep the filters right you will have no trouble with your kidneys.

A. B. Schofield, Ashland, Ore., says: "It gives me pleasure to endorse Doan's Kidney Pills. They brought me great relief from a severe attack of kidney complaint and I am now entirely free from the trouble. Doan's Kidney Pills can be relied upon to dispose of backache and difficulty with the kidney secretions."
For sale by all dealers. Price 50 cents. Foster-McBarn Co., Buffalo, N. Y., sole agents for the United States.

THE INCREASED COST OF LIVING
is a complicated problem, but many are solving it by eliminating from their diet list all foods of doubtful nutritive value.
Remember, Quality Counts
It is not the amount of food you eat but the energy value received that gives results, and it is the non-recognition of this fact that causes so much dyspepsia and other forms of stomach trouble today. To those seeking a complete, easily digested food, suitable for all ages and conditions,
BORDEN'S Malted Milk
IN THE SQUARE PACKAGE
consisting of rich, creamy milk, with extracts of wheat and barley malt (in powder form and non-alcoholic), with all waste matter eliminated, comes as a revelation.
Write for a practical Recipe Book, which will show you how a very little money, properly expended, can be made to produce the best results.
