NOTICE FOR PUBLICATION (Not Coal Lands)

Department of the Interior, United States Land Office at Lakeview, Oregon, May 15, 1913.

Notice is hereby given that Henry O'Keefe, whose post-office address is Lakeview, Oregon, did, on the 27th day of July 1912 file in this office Sworn Statement and application, No. 35985 to purchase the SW 1/4, NE 1/4, SE 1/4 NW 1/4 and Lots 2 and 3, Section 5, Township 40 S., Range 21 E., Willamette Meridian, and the timber thereon, under the provisions of the act of June 3, 1878, and acts amendatory, known as the "Timber and Stone Law", at such value as might be fixed by appraisal, and that pursuant to such application, the land and timber thereon have been appraised \$448.62 the timber estimated 340,000 board feet at \$1.00 per M. and the land \$108.62; that said applicant will offer final proof in support of his application and sworn statement on the 25th day of July 1913, before Register and Receiver, United States Land Office, at Lakeview, Oregon.

Any person is at liberty to protest this purchase before entry, or initiate a contest at any time before patent issues, by filing a corroborated affidavit in this office alleging facts which would defeat the entry.

A. W. ORTON, Register.

### NOTICE TO CREDITORS

Eugene D. Smith Estate.

Notice is hereby given that the undersigned was by the Honorable B. Daly, County Judge of Lake County, Oregon, on the 25th day of April, 1913 duly appointed Administrator of the Estate of Eugene D. Smith, deceased, and his qualified as such.

Therefore all persons having claims against said estate are hereby notified and required to present the same, duly verified to this administrator at the law office of Herbert P. Welch, in Lakeview, Oregon, within six months from this date.

Dated May 1, 1913. HERBERT P. WELCH, Administrator of the estate of Eugene D. Smith, deceased.

### NOTICE OF FINAL ACCOUNT

In the County Court of the State of Oregon for Lake County.

In the matter of the estate of J. Q. Adams, deceased

Notice is hereby given that M. D. Hopkins, administrator with the Will Annexed of the estate of J. Q. Adams, deceased, has filed his final account in said estate; that June 4th, 1913, at the hour of ten o'clock A. M., at the court room of the County Judge of Lake County, State of Oregon, at Lakeview, Oregon, has been set by the Judge of said Court as the time and the place for settling said account and hearing objections thereto, if any there be, and all persons interested in said estate are hereby notified.

### LEGAL ADVERTISING

Notice to file their objections to said final account, if any there be, on or before said 4th day of June, 1913. Date of first publication May 15, 1913. M. D. HOPKINS, Administrator with the Will Annexed of the estate of J. Q. Adams, deceased.

## BULLETIN RELATES STOCK POISONING

An interesting bulletin published recently by the Department of Agriculture has this to say on the subject of Stock Poisoning:

It is generally recognized that the heaviest losses of live stock from poisonous plants occur in seasons when feed is short, but the intimate relation between such losses and the food supply does not seem to be appreciated at its full value. If it were understood and acted upon intelligently there would be much less complaint of harm done by poisonous plants.

Stock seldom eat poisonous plants when good feed is available. This is, in general, true even for the loco weeds, although it is well known that some animals have a loco habit and will eat these weeds in preference to anything else. This habit, however, is usually acquired during a season of short feed, when the loco weeds are the most attractive form of vegetation. If the stock can be prevented from acquiring the habit during this period of scarcity, there will be very few locoed animals. Larkspur poisoning is most likely to occur either during the season of short feed or on an overgrazed area; in either case the larkspur is the most conspicuous form of vegetation to attract the animals and is eaten in lieu of anything better.

The roots of water hemlock (Cicuta) are picked up when there is little else to eat and with disastrous results.

Successive bands of sheep are driven over the same trail until everything suitable for feed disappears, and then there follow cases of poisoning from wild cherry. On some trails there is an almost continuous hedge of wild cherry, and the leaves are eaten as high as the sheep can reach. We may assume that in such cases the first to pass over the trail are not poisoned, because there is something else to eat, and the last are not poisoned, because at that time even the poisonous plants have been consumed.

Sheep are sometimes bedded in the same place for several successive days. Under such circumstances everything near the bedding ground is eaten, and if there are any poisonous plants some of the sheep are pretty sure to get them.

## Fair Exchange

A New Back for an Old One—How it Can be Done in Lakeview

The backaches at times with a dull, indescribable feeling, making you feel weary and restless; piercing pains shoot across the region of the kidneys, and again the loins are so lame that to stoop is agony. No use to rub or apply a plaster to the back if the kidneys are weak. You cannot reach the cause. Lakeview residents would do well to profit by the following example.

C. C. Kribe, 33 North Grove St., Medford, Oregon, says: "From personal experience with Doan's Kidney Pills, I feel justified in recommending them. I suffered from a dull ache in the small of my back for months. The kidney secretions were also unnatural and at times retention existed. Upon learning of Doan's Kidney Pills I obtained a supply and began using them. Two or three boxes entirely rid me of the trouble and improved my health. I know that Doan's Kidney Pills can be relied upon to give relief if taken as directed."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States. Remember the name—Doan's—and take no other.

Jay Billings, Deputy Supervisor on the local Fremont National Forest, expects to leave the forepart of this week for Silver Lake, enroute to Wallawa, Oregon. At the latter place he will be employed in a similar position on the Wallawa Forest. The many local friends of Jay are sorry to hear of his departure, and his loss will be felt by stockmen herabouts with all of whom he is well acquainted.

## POTATOES TESTED FOR HOG RATIONS

Tubers Prove Valuable Feed When Mixed With Grain

An experiment to test the feeding value of raw or steamed potatoes as supplementary feed with a grain ration, has been carried on by Robt. Withycomb at the Eastern Oregon experiment station, with interesting results, which will be of special value this year on account of the superabundant potato crop.

The hogs in the experiment were divided into eight lots and records of the different feed rations given each and the proportionate gain made kept carefully. Each hog in lots 1 and 2 ate an average of 170.18 pounds of barley and 509.53 pounds of raw potatoes, making a gain in weight of 60.70 pounds. Those in lots 3 and 4 ate 110.30 pounds of barley and 663.75 pounds steamed potatoes, and made a gain of 70.60 pounds while those in lots 5 and 6 ate 188.60 pounds barley and 564.80 pounds steamed potatoes and made a gain of 78.10 pounds. Lots 7 and 8 ate 300.10 pounds barley without potatoes and made a gain of 69.5 pounds.

The last 2 lots, fed barley alone, were used as a check on the others to show more definitely the proportionate value of the potatoes. At the present market value of \$0.7 a pound live weight, the hogs fed barley made a \$4.87 gain, which makes the barley feeding value \$1.62 to the hundred.

Lots 1 and 2 fed barley and raw potatoes at the rate of 3 pounds of potatoes to a pound of barley, made a \$4.25 gain, which gives the raw potatoes a feeding value of \$2.25 to the hundred. Lots 3 and 4 receiving 6 times as much steamed potatoes as barley, made a \$4.94 gain, giving the steamed potatoes a feeding value of \$4.47 to the hundred. Lots 5 and 6 fed three times as much steamed potatoes as barley, made a \$5.47 gain making the feeding value of potatoes \$4.42 to the hundred. It is noticeable that those fed six times as much potatoes as grain did not make quite the gain made by the other, but it required 85.25 pounds less barley to make this gain, so the difference in feeding value is accounted for.

It is also noteworthy that the steam potatoes are worth \$13 more to the hundred than raw for feeding, as shown in the comparison of the gains of animals fed the 3 to 1 ration.

### Irish Coins Used

By a curious course of circumstances some of the St. Patrick's Pennies which were struck off during the short reign of the Confederacy of Kilkenny in Ireland, became current coin in the colony of New Jersey. Smith, the historian of that province, tells us that Mark Newby brought over from Ireland a great quantity of these coins which were legalized in 1682. The Act then passed declared that "for the more convenient payment of small sums of money, Mark Newby's coppers, called Patrick's half-pence, should pass as half-pence current pay." Thus it will be seen that a coin so associated with national independence in Ireland, proscribed by England, became legal tender in America.

### Law Affects Banks

In an opinion rendered to State Bank Commissioner Will Wright, the attorney general has held that no bank can use the word "trust" in its name unless it complies with the regulations imposed by a new law passed by the last legislature. This applies to banks now existing as well as those to be organized.

Among other things the new law requires that banks doing a trust company business must have not less than \$100,000 capital and must deposit with the state treasurer \$50,000 in cash or securities approved by the bank commissioner. The smaller bank and trust companies will be affected the most by the new law.

### Public Wool Sale

The second wool sale of the season in Eastern Oregon was held at Echo recently. Regardless of the fact that the duty on raw wool seems doomed to go, the bidding was as high as that of last year, in fact, a higher price was paid for the same grade of wool than was received for the 1912 clip. The sales totaled 318,000 pounds at prices ranging from 12 cents to 14 1-2 cents a pound, as follows:

Antone Vay, 100,000 pounds, to Crimmins & Pierce, at 14 cents; William Pedro, 48,000 pounds, to Hallowell, Jones & Donald, at 14 1-4 cents; John Kilkenny, 100,000 pounds, to Dufour, at 14 cents; B. Doherty, 70,000 pounds, to Green, at 12 cents; Joseph Cunda, who has 80,000 pounds, and William Slusher, who has 112,000 pounds were offered 14 cents and 12 3-4 cents, respectively, but refused the offer.

Rainier on draught or in bottles at the brewery. 2t

### LIVE STOCK NOTES.

A disinfectant should be used in the barn from time to time. Remember that cleaning the stable means more now than it used to.

No matter how well bred a cow may be she cannot produce milk at a profit when given only a maintenance ration.

Dirty stalls cause much sickness among the calves.

Make your stock reach maturity without being stunted. If an animal is worth keeping at all it is worth keeping well.

The silo is a time saver when it comes to feeding a large number of animals.

Many farmers will let the steer trample \$100 worth of feed into the mud rather than spend \$25 for a feed rack.

### BROOD SOW MANAGEMENT.

Feeding Methods That Result in Strong and Healthy Litters.

To produce strong, healthy litters it is not only necessary that the sows be fed correctly upon feeds that furnish sufficient muscle, bone and energy making materials, but that they be handled wisely during the period of gestation.

The mother sow needs food for three important purposes—first, for her own maintenance; second, for growth on her own body and, third, for the nourishment of the fetal pigs. Corn lacks muscle and bone formers and in addition is too concentrated—not bulky enough for breeding sows. Tankage, meat meal, linseed oil meal, skim milk, buttermilk, bran, oats, middlings, shorts, soy beans, clover and alfalfa are the logical supplements to corn in the middle west. At the Iowa station we have found that most excellent rations for gilts carrying litters are:

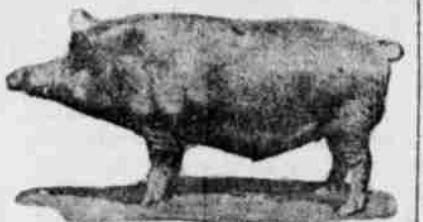

First.—Corn, 88 to 90 per cent; meat meal or tankage containing 60 per cent protein, 10 to 12 per cent.

Second.—Corn, 75 per cent; finely cut clover or alfalfa, 25 per cent.

Third.—Corn, 80 per cent; oats, chopped clover or alfalfa, 10 per cent; meat meal or tankage, 10 per cent.

For old sows the proportion of meat meal or tankage can be cut down practically one-third to two-fifths and still get excellent results. Stronger, healthier litters having more hair, more color and more bone have been the result whenever we added a suitable protein and ash supplement to corn. When we selected our supplements wisely we also got cheaper pigs. At present prices for purchased protein and ash supplements, meat meal and tankage are our cheapest sources.

Above all things, excepting the food supply only, an abundance of exercise is most important. All classes of pig-

The Tamworth hog is a bacon producer and with the Yorkshire is considered the best breed for that purpose. These breeds are distinguished from the so called lard hog in that they are more prolific, better foragers and, it is said, are less susceptible to cholera and other swine diseases. Bacon breeds are the result of methods of feeding and breeding. They grow rapidly in size, but do not lay on fat like the lard types. Their large size, with long and deep bodies, indicates their bacon producing ability and capacity to easily carry large litters. The boar shown is a good specimen of the Tamworth.

## USE SPIKE TOOTH HARROW ON GRAIN

Cultivation Brings Moisture to Surface of Ground

(By Prof. F. R. Crane.)

Now that the seeding is practically done, the farmers in many sections will await developments for the harvest season.

At the present time, much of the grain region throughout the Northwest needs rain. There was considerable moisture in the soil at seeding time, but continued dry weather will soon exhaust the surface moisture, and unless the ground is stirred for a cultivated crop, there is great danger that we will have reduced yields at harvest time.

If every farmer having grain yields would use a spike-tooth harrow with the teeth turned back, and harrow his grain when it is about one inch above the ground, he will help to hold the moisture in the soil, and he will also kill many weeds already started. This harrowing with the teeth turned back will not hurt the grain; in fact, it will do it good. Harrowing of the grain can be carefully carried on until the grain has grown to three inches in height. This harrowing of grain after seeding, and as it is coming through the soil, should come to be common practice, and it is urgently recommended. Do not, however, use spike-tooth harrow unless the teeth can be slanted back.

This harrowing, as recommended above, is very necessary should our growing season happen to be a dry one. If there is plenty of moisture during the entire growing season it will also be helpful, and the beneficial results will be very noticeable in either a dry or wet season. Do not wait, but do this harrowing of the grain now.

### Bill Reintroduced

From The Irish News

The Home Rule Bill was reintroduced into the House of Commons on Wednesday, May 7, and read a "first time" without debate. On June 2, the motion for the second reading will be taken, after which a time table will probably be passed for the subsequent stages. The Committee stage is to be merely formal and as there can be no amendment of the measure there will be no Report. The Cabinet have decided, however, that before the third reading there is to be a new stage, in which, conformably to the terms of the Parliament Act, the House of Commons, if it so desires, may suggest amendments. If these are adopted by the House of Lords they may be embodied in the Bill. It is said that this stage will occupy several days.

### MOST PROMPT AND EFFECTUAL CURE FOR BAD COLDS

When you have a bad cold you want a remedy that will not only give relief, but effect a prompt and permanent cure, a remedy that is pleasant to take, a remedy that contains nothing injurious. Chamberlain's Cough Remedy meets all these requirements. It acts on nature's plan, relieves the lungs, aids expectoration, opens the secretions and restores the system to a healthy condition. This remedy has a world-wide sale and use, and can always be depended upon. For sale by all dealers.

### Good Bacon and Gravy

From The Irish News

A bacon and gravy recipe for camp use is given as follows in the camp cookery bulletin issued by the Oregon Agricultural College, a new edition of which is in preparation.

Soak three slices of bacon half an hour or more in cold water, and fry until a light brown. Remove the bacon and stir some flour in to the grease in the pan, mixing it thoroughly. The grease and flour should be in about the proportion of two tablespoons of bacon fat and one of flour to a cup of gravy. Allow the flour and grease to brown, and pour in a cup of water gradually, stirring to avoid lumps.

### Challenge Accepted

From The Irish News

Once more Sir Thomas Lipton, the Irish sportsman, will be given an opportunity to try for the yacht "America's" cup, this time in September, 1914. This was assured when the New York Yacht Club sent by cable an acceptance of Sir Thomas' challenge, specifying that the race is to be sailed under the present rules of the Club as to measurements, time allowance and racing conditions. The cable was sent May 20, and Sir Thomas lost no time after its receipt in laying plans for building the new challenger he has ever sent across the Atlantic. It will no doubt be named "Shamrock IV."

### CURE FOR STOMACH DISORDERS

Disorders of the stomach may be avoided by the use of Chamberlain's Tablets. Many very remarkable cures have been effected by these tablets. Sold by all dealers.
