Dwarf Essex rape is usually sown where a maximum forage yield is desired.

Rubbing warts that appear on cattle and young stock with pure castor oil several times will rid the animals of the trouble.

There is nothing that becomes "second-hand" in a shorter time than a new automobile that has been through a smashup or ditch experience.

Chemically, the refuse of acetylene gas plants is about the same as slack lime, but it is worth about twice as much as the latter for sweetening soil.

Stomach worms in sheep may be guarded against by keeping before them in low boxes, where they can get at it handily, a mixture of cheap tobacco and salt.

An excellent soil crop for plowing under is made by sowing a mixture of oats and Canada field peas. It sowed the 1st of May it will be ready to cut about the middle of July.

The cement hog wallow, fed by a source of pure water, has much to commend it. By stopping up inlet and outlet the same pool may also be made to serve as a dipping tank.

The question of whether it is worth while to have shade in the pasture is pretty clearly indicated by the fact that animals at pasture invariably seek such shelter when hot weather and flies come on.

In breaking the colt it is well to have it walk beside an older horse that is a fast walker. While guilt is doubtless to some extent a matter of inheritance, it is probably more true that it is a matter of habit.

If a cup of moderately strong coffee keeps a grown person as wide awake as an owl when drunk within three or four hours of going to bed, it is pretty safe to assume that it is entirely unfit as a beverage for little children.

With horses as high priced as they are, it is mighty poor economy to use a cheap or ill fitting collar that needs a heavy sweat pad or other padding to make it fit. The collar should fit, and its wearing surface should be hard and firm.

A nagging man is just as big a nuisance and pest as a nagging woman, and this makes no difference whether he nags his wife and children or nags his team. Both folks and horses get mighty tired of it and would be justified in locking him up or kicking him down.

The new parcel post system is being used by a number these days for the shipping of nursery stock. Not only is the charge less than the express, but the new system has this distinct advantage over the old—that the package is delivered at the farmer's place instead of his having to go to town for it.

While the first week or two in August are considered the best time for sowing alfalfa in the territory east of the one hundredth meridian, the spring sowing is recommended in all that area usually known as the dry belt, and the best results are had if the tract on which the seed is sowed was summer fallowed the year before.

In Ireland the co-operative idea has taken firm root. Since the beginning of the movement twenty-four years ago it has grown until today there are 505 societies, with a total membership of 97,000. In 1911 the volume of business transacted amounted to about \$12,539,107, while the amount of business done since the movement started reaches the total of \$138,080,000.

If one wishes to keep any of the flowering bulbs for another season, it is well to let them stay in the pots in which they blossomed or in the ground until fall or until the tops are dead and dry. They should then be taken up, dried gradually, but thoroughly, and be stored where they will keep dry. As a rule, the new bulbs which form on the roots of the tulips will be the larger in size and number if the plant is not allowed to blossom.

The two English pens of White Leghorns entered in the Connecticut International egg laying contest still maintain their lead. Thomas Barron's pen having 466 eggs to their credit and Edward Chin's pen having a score of 425 eggs. None of the American pens had reached a score of 400 at the end of the twenty-first week. For the week referred to the 500 hens and pullets entered laid in all 2,339 eggs, which was 98.8 per cent of a possible total.

DOG LAKE CAN BE REACHED BY AUTO

Fremont Forest Builds a Good Road From Drews Dam to Lake

A new road has been constructed from Drews Dam to Dog Lake, the work having been under the superintendency of R. A. Bradley, who is chief of trail and highway construction in the Fremont Forest. In this particular piece of road Chief Bradley has shown what could be done with a small amount of money, for while the total cost has been but about \$500, yet he has constructed a road that will be not only passable for autos but will enable them to make good time all the way to the Ranger Station. Chief Engineer Rice, of the Irrigation Co., and others have put the road to the Dam in excellent shape, and the drive to Dog Lake during the Summer promises to be one of the most enjoyable in this whole section of country.

CALIFORNIA AUTO LAW HAS CHANGE

License Must Now be Acquired From the State Engineer

The session of the California Legislature just ended created in addition to the widely discussed alien land bill, a measure completely remodeling the automobile laws of the state. As the second stage in the Union in the number of automobiles owned, this action assumes more than ordinary importance.

Under a new law when has just been signed by Gov. Johnson a new license system is established, new rules of the road created and a radical departure made, at least so far as western states are concerned, by transferring the issuing of licenses from the Secretary of State to the State Engineer.

Another notable feature of the new law is its provision regarding the automobile warning signal. By its enactment California becomes the first state to legally define what constitutes an adequate signal, and also to make unlawful the use of all signals "for any purpose except as warnings of danger."

The law provides that every motor vehicle shall be equipped with a signalling device "capable of emitting an abrupt sound, adequate in quality and volume to give warning of the approach of such vehicle."

It is interesting to note that only a small minority of the state legislature are automobile owners.

ATTACK MADE ON SPECIAL ELECTION

Declared Unconstitutional to Invoke Referendum This Fall

Circuit Judge Galloway of the Marion County Circuit Court has held that the act passed by the last legislature calling for a special referendum election for next November was unconstitutional. The decision was given in a mandamus suit brought to compel the secretary of state to file a referendum petition against the dentistry bill.

In defense of the refusal of the secretary of state to file the petition, which called for the measure to be submitted at the regular election in 1914, Attorney General Crawford raised the question of the constitutionality of the Day bill providing for a special election.

"The act is not only special, but restrictive, as it confines the power of the people under the referendum and initiative provision of our constitution to the referendum of measures passed by the legislature of 1913, but denies them the right to institute such initiative measures as they may deem advisable and for the welfare of the whole people," said Judge Galloway in handing down his decision.

"At the date of passage of the said act, there was no measure referred, there was no exigency or cause for such an act and no existing conditions for such an act, and no demand for same, there was no authority for appropriating \$120,000 or any other sum and no cause for proclaiming an emergency."

He said the constitution gives the executive department the power to call special elections, but in all cases the elections must be called for special existing purposes and no designated in the call.

"Nowhere does the constitution confer more power upon the legislative department than upon the executive department," he said.
