"The LIFE of a wagon is what counts—that's why I buy a Studebaker"

"That's reasonable, isn't it?"

"A wagon that doesn't last is expensive no matter what price you pay for it."

"Suppose you buy three wagons, one after the other, and the three of them don't last as long as one Studebaker—which is the best bargain?"

"I didn't find this out myself. I heard my grandfather say it a good many years ago. He said he had proved that it paid to buy a Studebaker. I followed his advice to my own satisfaction."

"A wagon can't have life in it unless it has the material and work and finish in it. The Studebaker people have been making vehicles for sixty years. They ought to know how to make wagons right—and they do. They have the reputation because they've produced the goods. They don't put the name Studebaker on until the wagon's right, and when you see the name Studebaker on a vehicle of any kind it is your insurance of quality."

"That's why I buy a Studebaker. I trust a Studebaker wagon because I trust the people that make them. It's good business."

"A Studebaker promise is always made good."

AUTO TRUCKS TO REPLACE WAGONS

Twenty-six Car Loads Are Shipped to Pacific Coast from Chicago

That the automobile as a commercial vehicle has come to stay is evidenced by a special train of twenty-six cars loaded with 154 auto trucks now en route from Chicago to the Pacific Coast. They were valued at \$80,000.

Solid cars will be sent to San Francisco, Los Angeles, Portland, Seattle and Vancouver, B. C., from where they will be distributed throughout California, Nevada, Oregon, Washington and British Columbia. They are routed via the Rock Island, El Paso and Southwestern and Southern Pacific lines.

This shipment is the largest ever made of purely commercial power driven machines. There have been carloads of auto trucks before and trains of pleasure automobiles, but this is the first train of its kind ever sent to the Coast. It is freely predicted that this movement and others of its kind to follow mean a general replacement of horse-drawn wagons and trucks throughout the West.

EASY METHOD FOR PRESERVING EGGS

"Eggs may be preserved for several months by different methods," says Prof. James Dryden of the poultry department of the Oregon Agricultural College. "If put up right in the spring they may be kept till the following fall or winter. They will not be as good, however, as fresh-laid eggs."

"A method that will preserve the original quality of the eggs for an indefinite period has not yet been discovered. By cold storage, eggs are put up in large quantities during the spring season when prices are low, but where it is desired to preserve a small quantity for home use the cold storage method is not practicable."

"Eggs intended for storage should be fresh and clean. March or April eggs will keep better than May or June eggs. The sooner they are put into storage after being laid the better they will keep."

Dissolve a pound of lime in five gallons of water. The water should be boiled previously to sterilize it, and then cooled. Stir thoroughly, and let settle. Then pour off the clear liquid into a wooden or earthen jar or tub. Fill with eggs to within an inch of the top of the liquid. This will allow for evaporation. The liquid should not be allowed to get lower than the top of the eggs. When the vessel is filled with eggs, cover it with coarse muslin or factory, over which spread a paste of lime to exclude the air.

"Water-glass (sodium silicate) may be purchased at the drug stores. Use the liquid form and the commercial grade in the proportions of one part water-glass to eight parts water. Use earthen jars or wooden tubs or barrels that are perfectly clean, and store in a clean, cool place. The material used will cost about a cent for each dozen eggs stored."

Cause and Effect

Surprise Valley Record: A good many people are wondering why money is scarcer in Surprise than for many years, and are laying it to the change in the administration. The answer is easy. During the last two years at least \$150,000 has been sent from Surprise for automobiles, to say nothing of the consumption of oil, gasoline, accessories and auto supplies. Also another \$150,000 has been sent out of the valley in investments in fire and life insurance. Companies that are not yet paying any returns. Also about \$75,000 has been sent out from here for stallions from which as yet but little returns have been received. Again several thousands of dollars made in Surprise Valley each year have been spent in the "sun-kissed south" where our people go to spend the winter, and where some of our residents have invested thousands of dollars in property. In fact it is a continual stream of money that is going out of Surprise Valley to enrich other places without any corresponding returns. According to the above we had two years ago about \$400,000 in Surprise that was loaned out in small lots to our residents and kept in circulation through business channels, which made times good and lent an air of prosperity to the valley. And if Surprise Valley had not been a veritable gold mine she would be swamped to day. But the valley will recover in a short time. It is too rich a valley to be caught in the whirl pool of poverty. The development of the farms and the subdivision of the large tracts of land, and with an increased population she is, and will be still the richest and best valley in the State.

LUCKY-DUTCHMAN GETTING PAY ORE

Spearmint Company Has Several Tons of Rock for Shipment

The Denver Mining Record has the following:

Advices received this week by the Spearmint company operating at High Grade, Cal., are in effect that a find has been made 50 feet east of the shaft, showing a large body of ore which pans freely. Several tons have already been saved for shipment. Fred Schrott, who is in charge of the work at this property, reports that he can get out a lot more of this ore, and that he will make a mill run on it this summer. An average sample of the ore gave 2.6 ounces gold, 2 ounces silver, or \$53.20 a ton. It is believed to be the main ore shoot.

The shaft is down 75 feet and some lateral work has been done. Underground operations have been hindered somewhat by surface water from the melting snow, but this will soon pass. It is expected that the road to the camp will be open to wagon traffic within a couple of weeks.

NORTHWEST GRAIN CROP PROMISING

The grain crops of the Pacific Northwest have now reached a stage of growth where it is safe to predict an excellent yield. The total outturn may not equal that of last year, as the acreage sown to wheat is less, but the yield per acre promises to be equally as good.

Based on present conditions, grain dealers look for a wheat crop of close to 60,000,000 bushels in the states of Oregon, Washington and Idaho. This is within a few million bushels of the crop produced last year, which can be closely estimated on the basis of the shipments during the season, now nearly at an end.

While the wheat crop will be a fine one, it will be later than usual, owing to the backward Spring and the delay in getting in the Spring crop. The delayed harvest will enable farmers and dealers entirely to dispose of the old crop.

In Eastern Oregon, as a whole, the crop likely will be less than that of 1912, as there has been a considerable reduction of acreage.

Umatilla County promises to come through again with 5,000,000 bushels of wheat. For a time the growing crop in that county looked bad, but the recent rains were just in the nick of time, and the prospects are fine. Wasco County has less acres of wheat, but an average crop to the acre, according to present conditions. In the other Oregon river counties the outlook is about the same.

Eastern Washington has for several days past experienced the finest kind of growing weather. From the Palouse country reports agree that the wheat yield will be fully as large as last year's. The Big Bend crop however, will be less than a year ago. Conditions in the Walla Walla country generally are favorable. In this section as elsewhere in Eastern Washington, some of the wheat was blown out in the light sand and had to be reseeded.

Idaho this year will produce the largest wheat crop in the history of the state. In the Clear water country, the Lewiston section and Camas Prairie the crop is looking better than it ever has before, and a 10 per cent increase in acreage is reported.

The farmers of the Northwest are assured again of a year of good prices, owing to the sound condition of the world's wheat markets. The coming crop will net the producers of the three states about \$45,000,000.

The barley crop will also be slightly under that of last year, because of the backwardness of the season and the reduction in acreage. A total yield of 140,000,000 bushels in the three states is looked for by grain men.

It is almost certain that barley prices in the Northwest will be high as California, one of the great barley states of the union, will have only about half a crop this year. The Northwestern barley crop will be worth over \$5,000,000 to the producers.

HEALTH A FACTOR IN SUCCESS

The largest factor contributing to a man's success is undoubtedly health. It has been observed that a man is seldom sick when his bowels are regular—he is never well when they are constipated. For constipation will find nothing quite so good as Chamberlain's Tablets. They do not only move the bowels but improve the appetite and strengthen the digestion.

See the display of Chamberlain's Tablets in the drug store.

C. O. D. PACKAGES BY PARCEL POST

New Regulation Will Be in Effect On and After July First

Instructions to postmasters have been issued for handling C. O. D. parcel post packages. The regulations will be in effect July 1.

Charges on packages will be collected from addressees on and after that date, provided the amount on a single parcel does not exceed \$100. The fee for collection will be 10 cents in parcel post stamps, to be affixed by the sender. This fee also will insure the packages against loss to the actual value of the contents not exceeding \$50.

The sender will get a receipt showing the amount to be collected, the amount also appearing on a tag attached to the package. The addressee will receipt for the package on the tag, which will serve as an application for a money order. C. O. D. parcels may be accepted for mailing by rural carriers and will be delivered by city and rural carriers and special delivery messengers. Such packages will not be mailable either to the Philippines or to the Canal Zone.

KEEPS OUT ALL THE RAIN

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

How to Keep a Boy Healthy and Happy

That is what every mother of a growing boy is anxious to know. We offer the solution to this problem. It is one of the very few absolutely sure ways of making a happy, manly boy.

Put him into overalls and let him live outdoors every possible moment of his life.

The dressed up boy who hardly dares to move for fear of soiling or tearing his clothes is about the most unhappy and peevish individual alive. The boy in overalls (if they are the right kind of overalls) hasn't a care on earth.

Good looking—Long wearing—No ripping—No tearing—Get Him

Two-Horse Brand Overalls

The best that are made. Constructed for comfort and long wear. Saves the good clothes. The boy always looks neat and trim. Ask your dealer for Two-Horse Brand Overalls. Take no others.
