**NEW PINE CREEK DEPARTMENT**

**DEVOTED TO LIVE NEWS NOTES OF THE STATE LINE TOWN SPECIAL CORRESPONDENCE**

Robert Smith brother of our townsman Joe Smith is here on a visit.

Grand Harvest Ball, Oct. 23, music by Darnell's full band of Lakeview.

Several Indians are camped here and it is reported several will come later.

Born October 14, to Mr. and Mrs. Ray Kirkpatrick of Willow Ranch, Cal., a baby boy.

N. A. McCurdy is building an ice house and wood shed in back of his place of business.

Free moving pictures and illustrated lecture at Opera House this Friday night. Everybody welcome.

We notice several improvements going on about town: new porches, fences, ice house and wood sheds.

Miss Madden who had charge of the hospital here for the past year Monday departed for San Francisco where she will spend the winter.

Geo. Miller and Carl Simmons who left for Reno a short time ago returned last Tuesday. George says New Pine Creek is good enough for him.

Quite a pleasant party spent Sunday over on the West Side of the lake. They were: Mr. and Mrs. J. Moffitt and son, Miss DeLong, Miss Dora Colvin, Mr. E. Follett and Walter Fleming.

Dr. E. H. Amsden sold out his practice here in New Pine Creek to Dr. G. J. Garner, who comes to us highly recommended as a first class physician and surgeon. Dr. Amsden has gone to Nevada to seek a new location.

Miss DeLong who has been visiting at the home of Mr. and Mrs. J. C. Miller for the past few weeks expects to depart for the east Tuesday. Miss DeLong has won many friends by her charming manner while here and we hope she may decide to return soon.

Teachers Institute will be held at Fairport and New Pine Creek this Friday, at Fairport through the day and evenings the ladies of New Pine Creek will entertain the visitors. There will also be free illustrated lectures and moving pictures at the Opera House.

Never in the history of our city have the people shown a better public spirit than they did at the clean-up day last Saturday. They have awakened to the fact that people are coming to our beautiful valley, and as New Pine Creek is located about 1 1/4 miles from one of the most beautiful lakes and only a few miles from the new gold camp, we are bound to build up. Let every citizen keep up the good work and make this one of the neatest towns in the state.

**AUTO LIVERY TO HAVE NEW HOME**

**Hankins & Rinehart Will Erect Modern Building on Present Site.**

Hankins & Rinehart proprietor of the Auto Livery garage on south Main street have completed arrangements with Contractor I. A. Underwood to erect a new building on the present site of the garage. The specifications call for a steel, concrete and brick structure and will be thoroughly modern and built specially for garage purpose. No inflammable materials will be used and the outside of the building will be covered with corrugated iron. While it is too late to begin work this Fall, all details will be completed for construction to begin just as soon in the Spring as the weather will permit. Aside from having a first class and fire proof building Hankins & Rinehart will thoroughly equip their work shops and establish one of the best and most modern garages in Southern Oregon.

**Chautauqua Circle**

The Lakeview C.L.S.C. will meet with Miss Hall October 20. Roll call—current events: "Rambles and Studies in Greece"—Introduction, Miss Knight; Chapter I, First Impressions, Mrs. J. D. Venator; Chapter II, General Impressions of Athens and Attics, Miss Vernon; Chapter III, Athens, the Museums; the Tombs, Miss Minnie Vernon; Chapter IV, The Acropolis of Athens, Miss York.

**Scotts Heavily Involved**

The following press dispatch appeared recently in the Sacramento Bee: Like a thunderbolt from a clear sky has come the failure and departure from Eagleville, Modoc county, of Gabriel J. Scott and wife.

Scott came from a well known and prominent family of Red Bluff. His wife was the youngest daughter of the late J. M. Hornback, in his life time the wealthiest citizen in the lower end of Surprise Valley and a companion of the late John H. Bonner of Cedarville in the same overland company crossing the plains to California.

The indebtedness so far as known against the Scotts totals nearly \$120,000, and among those caught come the Bonner and other families which have known the Scotts since their birth, and their parents before that.

The neaviest creditors are the banks at Bridwell, Cedarville, Alturas, Susanville and Reno. Smaller amounts are scattered all over the country.

cancel and set aside deed.

Chewaucan Land & Cattle Co. vs. James C. Porter, suit in equity for injunction.

Albert A. Crandall vs. Margaret C. Crandall, suit in equity for divorce.

Minnie D. Metzker vs. John O. Metzker, suit in equity for divorce.

Lottie E. Cogburn vs. John W. Cogburn, suit for divorce.

H. M. Fleming vs. The Rounsevell Corporation and C. D. Oliver, suit in equity for strict foreclosure.

A. H. Mulkey vs. Jacob Worthington, James Faulkerson, Esther Houdhammer, Mrs. Nellie McKee, Fannie Ramer, et al., suit in equity to foreclose mortgage.

Lillie Harris vs. Farnham E. Harris, suit for divorce.

M. E. Brant Lane vs. B. F. Lane, suit in equity for divorce.

**Crawford Pressing Suit**

Circuit Judge Kelly having sustained the demurrer to the suit of Attorney General Crawford against Governor West, Secretary of State Olcott and State Treasurer Kay for alleged wrongful expenditure of about \$16,000 of the penitentiary revolving fund, the Attorney-General has filed an amended complaint, charging that the state had been damaged in that amount.

Attorney-General Crawford is confident he has a cause of action against the defendants. It is the intention of to appeal to the Supreme Court; no matter which side wins in the Circuit Court.

**Complicates Affairs**

Provisional President Huerta's coup last Saturday to rid himself in a spectacular manner of the legislative bodies of the government and constitute himself dictator of the Mexican republic has left Mexico City in a state of tense expectancy as well as a further complicated condition for the republic. It is stated that the discussion of the national congress was not wholly unexpected in political circles, but the manner of its sudden and forcible accomplishment served to demonstrate the lengths to which Huerta was prepared to go to maintain his grasp on the administrative affairs of the nation.

It is also announced from Washington that Germany has decided to dispatch a warship to Mexico which has attracted considerable attention in this country. Significance was attached to this action by official Washington, because it was accepted as indicating that European powers, which had previously recognized the Huerta government, among which were Germany and Great Britain, now saw evidences of Huerta's inability to dominate the situation.

**Fighting Timber Beetle**

Klamath Northwestern: W. E. Glendenning has returned from Ashland after an absence of some time and expects to go to Lake county, in the vicinity of Silver Lake, where he, in company with other timber experts, will make further study of the timber beetle said to be doing injury there.

Mr. Glendenning is connected with the Federal Forest Service. He spent several weeks in the Silver Lake region last summer trying to devise some plan for combatting the timber beetle that would be less expensive than to have to cut, peel and burn the bark from effected trees. He is working in conjunction with private timber owners and expects to make an exhaustive study of this destructive bug before ending his labors.

**Pleased With Fair**

In concluding a mention of the Lake County Fair and of the number of premiums awarded exhibits from the Paisley and Summer Lake districts, the Chewaucan Press of last week says:

"Those who exhibited have nothing but praise to offer for their treatment from the fair management."

**REHART PREDICTS RAIN**

Continued from first page editorial comment:

S. V. Rehart, the long-distance weather prophet of Lakeview, Or., predicts that, while we may expect a deficiency of rain up to midwinter, we can count upon a very wet time thereafter.

Mr. Rehart holds that the winter can be correctly foretold from the summer, extreme summer heat being

The Remington Cubs get them with the center of the lead

**REMINGTON-UMC**  
**ARROW SHOT SHELLS**

**SPEED—SPEED—and again, SPEED**

YOUR object in shooting is to get your bird with the center of your lead. Of course! Then shoot these Steel Lined Speed Shells.

They are the fastest shells in the market. Their speed is demonstrated beyond question by the one sure test in all ballistic matters—the Electric Chronograph.

Then, too, there is the experience of thousands of seasoned gunners who have been shooting the Remington-UMC Steel Lined Shells ever since they came out.

The steel lining is the thing. It grips the powder—holds it in compression—puts all the drive of the explosion behind the shot.

Your load travels quicker—you shorten up your lead. You cut down the guess work on lead and angles—you get more birds.

Your dealer carries these speed shells. Get them. Use them. Find the Red Ball mark on every box of shells and metalics you buy.

Remington Arms-Union Metallic Cartridge Co.  
299 Broadway New York

regularly followed by excessive winter rain, the increased precipitation usually beginning about six months after the beginning of the more than average heat, which in this case would bring the beginning of heavy rains about February 1st.

Undoubtedly spring rains properly distributed are the most valuable rains by reason of the increasing heat, which contributes to the growth of plants, but it is very desirable that we have enough autumn rains to be able to plow the land and get the sown grain germinated, so as to be ready for the late rains, which are to make the crop.

Mr. Rehart's theory is very simple and may be easily tested by anyone who has the time to do it. The weather tables for many years past

are in print, and all that is required for the test is to add the number of heat units registered during the summer months of each year and compare them with the recorded rainfall of the following winter.

Mr. Rehart is not what is known as a scientist and does not, we believe, profess to explain the physical processes by which a hot summer is followed by a wet winter. He has only observed that such has been the case, and therefore predicts that it will be the same in the future. And if the mathematical computation shows that Mr. Rehart is correct as to his facts, it may be useful in directing scientific inquiry into causes.

Meanwhile we may rejoice in anticipation of an adequate rainfall some time during the winter.
