MAY RILMA, GREAT BUTTER PRODUCER

May Rilma, 22701, queen of the dairy world, was dropped Dec. 15, 1900, and is therefore in her eighth year. She was sired by Mars of Woodcross, and her dam was Rilma of Paxtang.

May Rilma is American bred. When first entered for advanced registry under the rules of the American Guernsey Cattle club she produced in twelve months 12,145.6 pounds of milk, the test showing 589.07 pounds of butter fat. This led to her re-entry for the test just completed.

Profit in the careful treatment of May Rilma is shown by the following figures, compiled by Mr. Cassatt:

May Rilma furnished 19,630.5 pounds of milk during 365 days of the test.

The Guernsey cow, May Rilma, owned by Captain Edward B. Cassatt, proprietor of the famous Chesterbrook farm at Berwyn, Pa., has given in 365 days 19,630.5 pounds of milk, which contained 1,099.56 pounds of butter fat. This cow was bred and raised at the farm, and her year's work has been carefully supervised under the regulations for the advanced register of Guernsey cattle conducted by the American Guernsey Cattle club. While officially supervised by the representatives of the Pennsylvania experiment station, her work has also been checked by six similar institutions in other states and by a representative of the dairy division of the United States department of agriculture. This record surpasses that of any cow of all the dairy breeds in the world.

This was sold at 6 cents a pound, so the cow brought in \$1,178.37.

The daily feed of the cow was eighteen pounds of mixed grain ration, three pounds of beet pulp, three pounds of molasses, thirty pounds of ensilage and ten pounds of hay.

This sixty-four pounds of feed per day cost \$6.065, a total of \$255.31 for 365 days. During ninety-seven days of the test May Rilma was fed some carrots, the cost being altogether \$15.52. So the cost of feeding the cow was \$270.83.

CARE OF RUNTY PIGS.

Animals May Do Fairly Well if Carefully Looked After.

The hog man, no matter how careful he may be, always finds a few runty pigs on his hands when the time comes for weaning the litters in the early summer, says the Kansas Farmer. The number will depend to some extent upon the condition of the breeding herd, but perhaps more largely upon the care the sows and pigs have received during the suckling period. Every good hog man dislikes to see these runty pigs running around among the other pigs, and even though they are few in number they always seem more prominent than the good pigs of the litters.

The pig which is runty at weaning time will likely remain runty through the season unless he is given some extra care and attention. These pigs should be all means be culled out from the rest of the bunch and placed in a pasture or lot by themselves. They can then be given a little better feed and care and may possibly develop into fairly decent pigs. The rest of the bunch will look better at any rate, and this is no small matter to the breeder of pure bred hogs who oftentimes wishes to show visitors his stock. Giving the runts a little better chance will push them along so that they oftentimes can be disposed of on the market early and thus be out of the way.

Hog Pasture Question.

Experiments at the Iowa station indicate that rye furnishes very good hog pasture, but that the vetch is not worth much. For some reason the hogs do not seem to take to it. Oats and Canada field peas furnish very good hog pasture, but everything considered, rape alone is by far the best of all the annual hog pasture plants. Iowa experiments indicate conclusively that it is not worth while to use cowpeas, sorghum or soy beans as hog pasture when such a good plant as rape is available. Rape seeded in the spring and properly pastured will furnish good forage for hogs during June, July, August, September, October and part of November.

Drying Off the Sow.

Good judgment will have to be used in handling the sows after the pigs get to be seven or eight weeks old, and it is a sensible thing to cut down after that time on the milk making part of the ration. In other words, feed corn a little heavier and cut down the concentrates. This will tend to automatically wean the pigs and incidentally it will keep the sows in better condition than if they are forced along with a heavy milk making ration.

Guard Against Blemishes.

A big scar in a prominent place on the body of a horse will take a good many dollars off his market price. For that reason do your best to guard against all such things.

FREAKISH WEATHER

PECULIAR CONDITION OF ELEMENTS OVER COUNTRY

Hail, Rain, Snow, Heat and Wind Cause Deaths and Damages At many places

That the damaging weather here last week was quite general in extent over the country is shown in the following press dispatches:

Chicago, June 4.—"Freak" weather conditions extended from Pennsylvania to the Pacific Coast today.

Oregon reported hail, snow and heavy winds that gave the state an appearance of December rather than June, while St. Louis was suffering from the hottest day of the year, street thermometers there registered 100 degrees. Schools were dismissed in the afternoon because of the intense heat.

At Somerset, Pa., one person is reported dead and six injured, and a number of buildings destroyed by a terrific storm of wind, rain and lightning. Many towns are cut off from all communication tonight.

At Green Bay, Wis., scores of families were driven from their homes and many others were held prisoner as a result of an electric storm that later struck Chicago, which was accompanied by a heavy rainfall.

Missouri, Kansas and Oklahoma report a heat wave accompanied by the highest temperatures of the year. Many prostrations are reported from three states.

Reports from northern Ohio show two dead and two injured in a storm that swept that portion of the state.

Rain is Salty

Ogden, Utah, June 4.—With the rain heavily loaded with salt as a result of a heavy wind across Great Salt Lake, a storm broke over Ogden about 11:30 o'clock and the atmosphere changed to a briny smell while pedestrians hurried to cover to protect their clothing from the spots that result from such a phenomenon. An electric storm preceded the rain but did no damage.

Snow in Leadville

Leadville, Colo., June 4.—Snow fell in this district today. The minimum temperature was 36.

Cold in Nevada

Reno, Nevada, June 5.—With the thermometer below the freezing point in many places in and near Reno last night, tender young vegetables and fruit crops had a narrow escape from destruction. It is believed however, that no material damage has resulted as yet. This is considered due to the sharp breeze which blew during the night and the clouds which overhung the valley most of the time.

Snow fell in Reno last night at about 12:30 o'clock and a light covering of new snow was seen upon the mountains this morning. Winnemucca had snow this morning and

Tonopah was the coldest spot in the country, reporting 30 degrees. The cold snap was peculiar to Nevada, all other states reporting the usual temperatures, except that the middle west suffered from excessive heat.

Section Director Cole of the weather bureau spent several hours last night in warning farmers of Reno to look out for frost. On his advice many of them irrigated throughout the night in order that the water, in being cooled, might give an sufficient heat to combat the frost.

The Old Home Town Paper

Showing his appreciation for the home town paper an Examiner subscriber and formerly a resident of Lakeview, in renewing his subscription enclosed the following poem, stating that this expressed the family's feelings toward the home town paper:

"When the evening shade is fallin' at the end o' the day,
An' a feller rests from labor, smokin' in' at his pipe o' clay,
There's nothin' does him so much good, be fortune up or down,
As the little country paper from his Old Home Town.

"It tain't a thing of beauty and its print ain't always clean,
But it straightens out his temper when a fellow's feeling mean,
It takes the wrinkles off his face an' brushes off the frown,
That little country paper from his Old Home Town.

"It tells of all the parties an' the balls on Pumpkin Row,
'Bout who spent the Sunday with who's girl, an' how the crops'll grow,
An' how it keeps a feller posted About who's up and who's down,
That little country paper from his Old Home Town.

"Now I like to read the dailies an' the story papers, too;
An' at times the yaller novels an' some other trash—don't you?
But when I want some readin' that'll brush away a frown,
I want the little country paper from my Old Home Town."
—Denver Post.

Poisoning Rabbits

Burns Times-Herald: Dave Miller was in the other day and says he has been doing more or less experimenting with poisoning rabbits and finds it is quite effective; he finds that he can dissolve strychnine more readily by placing it in vinegar and leaving it over night, as thus it is dissolved and may at once be mixed with grain or whatever it is intended to bait with. He finds even now with plenty of green stuff that rabbits will eat grain.

For an Impaired Appetite

To improve the appetite and strengthen the digestion try a few doses of Chamberlain's Tablets. Mr. J. H. Seltz, of Detroit, Mich., says: "They restored my appetite when impaired, relieved me of a bloated feeling and caused of pleasant and satisfactory movement of the bowels." For sale by all dealers.

WHEAT COSTS LARGE

FARMERS IN CANADIAN COUNTRY GET SMALL PROFITS

Conditions Cause Farmers to Return to United States—Interesting Report Given

American wheat growers and farmers will be interested in a report of a commission appointed by the government of Saskatchewan "to examine into ways and means for bettering the position of Saskatchewan grain in the European markets."

Incident to this investigation, the commission looked into the cost of producing wheat under present conditions in that province of Canada. The wheat producers of various sections of the United States will be interested to know that under present conditions the cost of producing wheat as determined by the commission is reported to be 55 cents per bushel on the farm and 62 cents a bushel f. o. b. cars at country points. According to the report, the cost of production has increased 12.15 per cent since 1909, while, on the other price of wheat to the Saskatchewan farmer has decreased from \$1.2 cts. per bushel in 1909 to 66 1-8 cts. a bushel in 1913, leaving a net return, on this basis of 4 1-8 cents a bushel to the farmer.

It is possible that the interesting figures which have been developed by the grain commission will account for the fact that a large number of American farmers, who have in recent years, left the states to engage in farming in this territory are now asking for a certificate which will permit them to return their household effects to the United States. If the economic situation suggested in the above statement is not the cause, perhaps it may be found in the long and rigorous winters characteristic of this section as compared with those of the leading farming districts of the states.

Newspaper at Stauffer

It is reported that the latest newspaper to be launched in Lake County will be at Stauffer, in the Rolyat voting district in the extreme northeastern part of the county. Stauffer is the postoffice and is situated in Lost Creek Valley, said to be a very promising agricultural district. C. J. Stauffer, of the postoffice which bears his name, is organizing the new project which will be known as the Stauffer Enterprise. Equipment has been ordered for the little plant and the paper is expected to be started some time in June. Mr. Stauffer is U. S. Land Commissioner and was a recent business visitor in Lakeview.

Only One Entirely Satisfactory

"I have tried various colic and diarrhoea remedies, but the only one that has given me entire satisfaction and cured me when I was afflicted is Chamberlain's Colic, Cholera and Diarrhoea Remedy. I recommend it to my friends at all times," writes S. N. Galloway, Stewart, S. C. For sale by all dealers.

"606"

Salvarsan

Prof. Ehrlich's Wonderful Remedy for Blood Poison
Symptoms Begin to Vanish in Two Days

"914"

Noe-Salvarsan

IMPURE BLOOD

I use the latest and best treatment for blood diseases—Professor Ehrlich's "606" or Salvarsan, and "914," or Neo-Salvarsan. They are absolutely safe. Their curative properties have been thoroughly tested throughout the civilized world. They have been accepted by the United States Army and Navy as the only treatment for blood disorders.

I administer this treatment in my office, painlessly, and will only detain you from your work from six to twelve hours. The symptoms begin to disappear in from twenty-four to forty-eight hours. If you have now, or have ever had this disease, do not fail to take this treatment.

VARICOCELE—One of the most common of the noninfective conditions and the condition that is responsible for a great many of the so-called nervous conditions, is a weakened and dilated condition of the veins in the scrotum. This condition can only be cured by direct local treatment; these conditions can be absolutely cured in a few days.

BLADDER and Kidney diseases, swelling of the feet and legs, painful and scalding urination, pain in back and sediment in urine all respond quickly to my system of treatment.

PROSTATIC enlargement, re-

sulting in the stoppage of the flow of urine, and pain, treated with operation.

My treatment removes this inflammation reduces the enlargement, normal condition is quickly restored.

RHEUMATISM treated in all its forms by both Electricity and Medicine.

I will positively not accept incurable diseases. I am permanently located in Reno, occupy one whole upper floor consisting of six completely equipped rooms.

My offices have private entrance. My business is conducted with all the privacy possible.

STOMACH conditions. Coated Tongue, perverted Appetite, Gases causing a fullness and distress after eating, Heartburn, Palpitation, Dizziness and all other conditions of the stomach, show signs of improvement at once by my system of treatment.

ACUTE DISEASES—itching, burning, scalding, painful passages of water. Strong injections, strong remedies seldom benefit—They cause obstruction of the urinary canal.

My treatment stops every symptom and relieves in a few days.
