WANTED

Farm or Business
For sale. Not parting with location. Wish to hear from OWNER only who will sell direct to buyer. Give price, description and state when possession can be had. Address: L. BARRYMORE, Box 228, Rochester, N. Y.

The Victorian English.

The English which spoke the language which was already dying in the eighteenth century was before all things a world of the country. The sights and sounds of nature played a far greater part in the lives of the mass of the people than they do today. This is reflected, for instance, in the way in which birds and animals were spoken of and the names given them. I have myself once or twice heard old people in the country speak of the hen as "Dame Bartlett." One is familiar with the phrase from books of course—it is Chaucer's "Priolette"—but once or twice as a child I actually heard it. I suppose it would be impossible to hear it anywhere now.—London Outlook.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a colloidal blood disease, requires a constitutional treatment. Hall's Catarrh Cure, taken internally, acts directly upon the blood and imparts to it a new force, thereby destroying the foundation of the disease, and giving it a patient strength by restoring the constitution and assisting nature in doing its work. The physicians have so much faith in its curative powers, that they have offered \$100,000 for any case that it fails to cure. Send for list of testimonials.
Address: J. C. CHENEY & CO., Toledo, O. Sold by all druggists. Take Hall's Family Pills for constipation.

Those Dear Friends.

Nan—This is Jack's latest picture. Don't you think he looks better in profile than in a front view?
Fan—Much better, dear. It doesn't show his bald spot.

In His Element.

Greasy Grimes—You look as if you'd managed to get in de swim somehow.
Tuffold Knutt—Yep, I'm a First Ward fluster now.—Chicago Tribune.

The General Demand

of the Well-Informed of the World has always been for a simple, pleasant and efficient liquid laxative remedy of known value; a laxative which physicians could sanction for family use because its component parts are known to them to be wholesome and truly beneficial in effect, acceptable to the system and gentle, yet prompt, in action.

In supplying that demand with its excellent combination of Syrup of Figs and Elixir of Senna, the California Fig Syrup Co. proceeds along ethical lines and relies on the merits of the laxative for its remarkable success.

That is one of many reasons why Syrup of Figs and Elixir of Senna is given the preference by the Well-Informed. To get its beneficial effects always buy the genuine—manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists. Price fifty cents per bottle.

Doesn't Faze Him.

"That new preacher you have is a pretty wide-awake young man, isn't he?"
"Yep. Keeps right on preachin' when everybody else is asleep."—Cleveland Leader.

For the Children

To succeed these days you must have plenty of grit, courage, strength. How is it with the children? Are they thin, pale, delicate? Do not forget Ayer's Sarsaparilla. You know it makes the blood pure and rich, and builds up the general health in every way.

The children cannot possibly have good health unless the bowels are in proper condition. A sluggish liver gives a coated tongue, bad breath, constipated bowels. Correct all these by giving small laxative doses of Ayer's Pills. All vegetable, sugar coated.

Made by J. C. Ayer Co., Lowell, Mass. Also manufacturers of HAIR VIGOR, HAIR RESTORATIVE, AGUE CURE, CHERRY PECTORAL.

POPULAR SCIENCE

DAIRYING IN DENMARK.

Land Worked for Hundreds of Years Still Bears Ours.

That American farmers and promoters of agricultural industries are rather lax in grasping their opportunities, and are in danger of being outgeneraled in the markets of the world, unless they improve their methods, is the belief of Dean James E. Russell, of Columbia University, New York. Dean Russell was recently a visitor at the state college, and during his stay there addressed an assembly of the teachers of the Island Empire, who were attending the teachers' institute in Pullman. Relative to the problems just mentioned, he said:

"Thirty years ago New York was sending butter and cheese to the London markets. New York butter and cheese were ruling out similar products from Ontario and other parts of the world. Just thirty years ago Denmark began to think she could make butter and put it in the London market. The question was, How could she overcome the lead that New York already had in the London market? She sent men to London to study out the ground; to find what London wanted. Then she set about to give them the required product.

Denmark is a country of poor soil, which has been tilled and overworked for a thousand years. Nevertheless, the Danish population annually sells in the markets of London \$35,000,000 worth of butter. In 1903 the entire United States exported only \$1,004,000 worth of butter. In addition to the vast quantity of butter mentioned, Denmark sends out one fifth as much pork as we do, and just as many horses; and certainly we should lead the world in the breeding of horses. In the meantime the Danish nation has taught the hens how to work. Four hundred and fifty thousand dollars worth of eggs were exported by this country in 1875, and in 1903 this export had reached a value of \$8,092,000. In the last ten years Denmark has taken \$8,000,000 worth of corn from Iowa and Nebraska, via New York, which she has fed to Danish cows and pigs, and then placed the latter in the European markets in successful competition with similar products from America.

"I said a moment ago that twenty years ago the competitor of Denmark was the State of New York. In these twenty years the Danish people have increased their exports from \$1,000,000 to \$40,000,000. In the same twenty years farm values in the State of New York have decreased \$200,000,000. In the last fifteen years Ontario has outbid New York in the same way in the cheese market. Twenty years ago New York companies received Canadian cheese and put the New York stamp on it to get one cent more in the English market. Today the New York farmers are sending their cheese over the Canadian boundaries, and paying two cents per pound in order to sell it at all."

Showing the superiority of European methods of education in comparison with American education, Dean Russell said: "Wurtemberg is a small German state, a little larger than the Island Empire of Eastern Washington, and having a population of about two million persons. Thirty years ago Wurtemberg began to realize that her population was beginning to dwindle; that something had to be done to maintain her integrity as a state. So she set about building up a system of schools for all the people; that would help the boy who wished to be a carpenter, a plumber, or a farmer, in the same degree, according to his needs, as they would assist the youth who desired to be a lawyer, an engineer, or a physician. Today Wurtemberg has a university giving courses of world-wide fame; technical schools, weaving and manufacturing schools; two hundred and thirty industrial schools in towns and villages; schools for metal workers, and workers in the textile trades; schools of art, of agriculture, of preparation for household management; and numerous farm schools, and high schools throughout the state.

"Wurtemberg, a state but little larger than the Inland Empire of Eastern Washington, supports all these institutions, with an income of ten dollars per head of population. What would American citizens think, if in addition to supporting agricultural colleges, they were asked to support five hundred technical and industrial schools for every two million of population? This is what is being done in the small state of Wurtemberg, and from the point of view of American citizens today, it is almost inconceivable; the contemplation of which must lead any American citizen to infer that his country has much to do and learn before it can successfully compete with the old country in the products of industrial education."

Answers to Queries.

By J. L. Ashlock, Washington Experiment Station, Pullman.

Haverford, Pa.—Is it considered that hog raising is practicable in the northwestern part of the United States?
H. W.

"It is probable that there is no place in the United States where the prices for pork products average as high as in the Pacific Northwest. A condition of significance, too, is that the people of this region are not sufficiently alive to the necessity of their meeting the demand for pork products. Those who are in the business are making money. Conditions are improving, however, for at the present time we note a growing tendency among farmers to pay more attention to this business. The Berkshire breed is preferable, in my opinion, although the Duroc Jerseys are making some headway. At the experiment station we have about concluded that a cross of these two breeds would be better than either one by itself."

Eventually.

Reporter—Do you ever contribute anything to foreign papers?
Comic Bard—Why—yes; on looking over the miscellany columns of the papers I find that I contribute lots of stuff to the London Tit-Bits.

In Melodrama.

Knightly Hero—I say, old chap, that lady's glove episode makes a great hit. Admiring Super—Yes, sir, you're always sure of a hand on that.—Baltimore American.

The Gentle Rebel.

"Immeasurable are the rebuffs that the helpers of the poor, the seekers after charity for their suffering brothers undergo," said a New York charity organization official. "A friend of mine a Methodist minister in a small western town, told me the other day of his last rebuff, a not unkind one. Entering the office of the local weekly, the minister said to the editor:

"I am soliciting aid for a gentleman of refinement and intelligence who is in dire need of a little ready money, but who is far too proud a man to make his sufferings known."
"Why," exclaimed the editor, pushing up his eyeglasses, "I'm the only chap in the village who answers that description. What's this gentleman's name?"

"I regret," said the minister, "that I am not at liberty to disclose it."
"Why, it must be me," said the editor. "It is me. It's me, sure. Heaven prosper you, person, in your good work."

What Makes the Heart Beat?

Prof. Jacques Loeb, the celebrated biologist in his book, "Dynamics of Living Matter," has shown that a strip cut from the ventricle of the heart put in a solution of chloride of sodium will continue to beat for a number of days, until putrefaction sets in. He says that can be done with an ordinary muscle after it has been extirpated from the body. This would tend to prove that the heart is a chemical machine and that it is all due to chemical action. The muscular contraction is probably due to the substitution of sodium for calcium salts in the cells of the muscles.

Discovering Writers.

The rejection of a manuscript often left a pang, but the acceptable manuscript, especially from an unknown hand, brought a glow of joy which richly compensated me for all I suffered from the others. To feel the touch never felt before, to be the first to find the planet unimagined in the illimitable heaven of art, to be in the dawn of a new talent, with the light that seems to mantle the written page, who would not be an editor for such a privilege? I do not know how it is with other editors who are also authors, but I can truly say for myself that nothing of my own which I thought fresh and true ever gave me more pleasure than that I got from the like qualities in the work of some young writer revealing his power.—W. D. Howells in Atlantic.

Calling His Attention.

Mr. Lingerling—I had a queer adventure this afternoon—
Miss de Muir (with a swift glance at the clock)—You mean yesterday afternoon, I presume.

Shop Talk Barred.

Friend (at wedding)—Where are you going to spend your honeymoon, dear?
Blushing Bride—Oh! You mustn't let my husband hear you ask that question. Don't you know he's a beekeeper?

The Master's Title.

Prof. Key when head master of a large London school was one of the most genial gentlemen that ever filled that position. He was fond of encouraging fun in his boys and was not unwilling to recount occasionally during class time when anything prompted it the manners and customs of countries he had visited. On one occasion he was telling his class about Spain and said: "Do you know, boys, that when a man attains to eminence there he is not called 'sir,' but is given the title of 'don'?"

One of the boys here called out:

"Then, I suppose, sir, they would call you Don Key?"
The gravity of the class was completely upset for the remainder of the afternoon.—Strand Magazine.

Considerate.

In a country church one Sabbath, as the congregation were rising for the first hymn, an old lady entered the church at the same time. She held up her hand, exclaiming: "Keep your seats. Losh, ye needna arise, though I have come in!"—London Express.

PUTNAM FADELESS DYES

Color more goods brighter and faster colors than any other dye. One 10c package colors silk, wool and cotton equally well and is guaranteed to give perfect results. How to dye, bleach and mix colors.

What is Pe-ru-na?

Is it a Catarrh Remedy, or a Tonic, or is it Both?

Some people call Peruna a great tonic. Others refer to Peruna as a great catarrh remedy.

Which of these people are right? Is it more proper to call Peruna a catarrh remedy than to call it a tonic?

Our reply is, that Peruna is both a tonic and a catarrh remedy. Indeed, there can be no effectual catarrh remedy that is not also a tonic.

In order to thoroughly relieve any case of catarrh, a remedy must not only have a specific action on the mucous membranes affected by the catarrh, but it must have a general tonic action on the nervous system.

Catarrh, even in persons who are otherwise strong, is a weakened condition of some mucous membrane. There must be something to strengthen the circulation, to give tone to the arteries, and to raise the vital forces.

Perhaps no vegetable remedy in the world has attracted so much attention from medical writers as HYDRASTIS CANADENSIS. The wonderful efficacy of this herb has been recognized many years, and is growing in its hold upon the medical profession. When joined with CUBEES and COPAIBA a trio of medical agents is formed in Peruna which constitutes a specific remedy for catarrh that in the present state of medical progress cannot be improved upon. This action, reinforced by such renowned tonics as COLLINSONIA CANADENSIS, CORYDALIS FORMOSA and CEDRON SEED, ought to make this compound an ideal remedy for catarrh in all its stages and locations in the body.

From a theoretical standpoint, therefore, Peruna is beyond criticism. The use of Peruna, confirms this opinion. Numberless testimonials from every quarter of the earth furnish ample evidence that this judgment is not over enthusiastic. When practical experience confirms a well-grounded theory the result is a truth that cannot be shaken.

Manufactured by Peruna Drug Manufacturing Co., Columbus, Ohio

Would Ask No Mercy.

Mrs. Virk-Senn—What do you suppose you would do if you were to meet the fool killer?
Her Husband—I'd tell him I was the man he was looking for, all right. I have just given orders to have that new addition to the house torn down and built again exactly as you want it.

Taking No Chances.

"Oh, the sorrow of it!" sobbed the fair maid. "Last night I refused Mr. Blank and this morning his body was found in the river."
"Poor fellow!" murmured her girl friend. "I suppose he was afraid you might change your mind."

RHEUMATISM

Calling His Attention. Mr. Lingerling—I had a queer adventure this afternoon—
Miss de Muir (with a swift glance at the clock)—You mean yesterday afternoon, I presume.

S.S.S. HEALS S.S.S. OLD SORES

No old sore exists merely because the flesh is diseased at that particular spot; if this were true simple cleanliness and local applications would heal them. Whenever a sore or ulcer refuses to heal readily, the blood is at fault; this vital fluid is filled with impurities and poisons which are being constantly discharged into the place, feeding it with noxious matter and irritating and inflaming the nerves and tissues so the sore cannot heal. These impurities in the blood may be the remains of some constitutional trouble, the effect of a debilitating spell of sickness, leaving disease germs in the system, or the absorption by the blood of the fermented refuse matter which the bodily channels of waste have failed to remove. Again the cause may be hereditary, the diseased blood of ancestry being handed down to posterity; but whatever the cause, the fact that the sore will not heal shows the necessity for the very best constitutional treatment. There is nothing that causes more worry and anxiety than an old sore which resists treatment.

Every symptom suggests pollution and disease—the discharge, the red, angry looking flesh, the pain and inflammation, and the discoloration of surrounding parts, all show that deep down in the blood there are morbid and dangerous forces at work, constantly creating poisons which may in the end lead to Cancer. Local applications are valuable only for their cleansing and antiseptic effects; they do not reach the blood, where the real cause is located, and can therefore have no real curative worth. S. S. S. heals old sores by going down to the fountain-head of the trouble and driving out the poison-producing germs and morbid matters which are keeping the ulcer open. It removes every particle of impurity from the circulation and makes this life-stream pure, fresh and health-sustaining. Then as new, rich blood is carried to the place the healing begins, all discharge ceases, the inflammation leaves, new tissue and healthy flesh are formed, and soon the sore or ulcer is well. S. S. S. is the greatest of all blood purifiers and finest of tonics, just what is needed in the treatment, and in addition to curing the sore will build up and strengthen every part of the system. Special book on Sores and Ulcers and any medical advice desired furnished free to all who write. THE SWIFT SPECIFIC CO., ATLANTA, GA.

I want to recommend S. S. S. to any who are in need of a blood purifier, and especially as a remedy for sores and obstinate ulcers. In 1877 I had my leg badly cut on the sharp edge of a barrel, and having on a blue woolen stocking the place was badly poisoned from the dye. A great sore formed and for years no one knows what I suffered with the place. I tried, it seemed to me, everything I had ever heard of, but I got no relief and I thought I would have to go through life with an angry, discharging sore on my leg. At last I began the use of S. S. S., and it was but a short time until I saw that the place was improving. I continued it until it removed all the poison from my blood and made a complete and permanent cure of the sore. JNO. ELLIS. 250 Navy Street, Brooklyn, N. Y.
