PRICE 5 CENTS

THE MARATHON FOLD OIL STRUCTURE CONFIRMED

Mammoth Companies Eager For Leases--- Available Territory Quietly Absorbed By Most Experienced Officials of Great- est Oil Concern in Industry

**DO YOU WANT TO MAKE MONEY IN OIL?
IF SO, FOLLOW ME. I AM OFFERING
LEASES ON A SECTION, 640 ACRES,
\$10 PER ACRE—PROVIDED
THAT YOU ACT QUICK.
QUICK RICHES.**

Money is being made so fast in Oil lease investments, that the accomplishment in this line makes one dizzy. Poor men of yesterday become rich men of today. Simply by owning a small oil lease near a well.

Recently 2½ acres in El Dorado field sold for \$250,000.00 cash. A half interest in another 2½ acres owned by Fred Clark of Oklahoma City sold for \$700,000.00 cash plus a half interest in the well to be drilled on the tract.

The leases on this land could have been purchased a short time ago for less than \$10 per acre.

Twenty men down at Haynesville, Louisiana, just across the Arkansas-Louisiana state lines, near Junction City field, were made millionaires in one day when the Smitherman well came booming along with a few thousand barrels of oil per day. These men owned cheap leases prior to production.

GET THIS

Big fortunes in oil are made from oil leases purchased prior to production. Oil speculators who have not learned this fact from observation or experience have missed the fundamental lesson of the oil age.

Your location does not lessen your chances for profits, nor do you have to live in Texas or go there, it don't matter if you lived at the North Pole and your lease located in the swamps of Panama, when oil is struck near your lease, you receive just as much as though you were living on or near your lease.

I am captain of this fortune-making ship and if you let me be your pilot I will land you on some valuable ground, just as I have done hundreds of people in the State of Washington and many other States.

Buy Crockett County Oil Leases and you are right in line for the 1924 crop of millionaires. The writer sells Crockett County Oil leases, but it don't matter whether you buy from me or who you buy from, make it your business to get in there. The results which will follow in a short time will be most gratifying. I make this statement with no regard for the danger of saying too much.

FRENZIED TRADE IN LEASES

Already the following towns in Crockett County district: Big Lake, El Dorado, Bradford, Rock Spring, Renkin, Stilles, Ozone, and Ft. Stockton are full of oil scouts, lease speculators, drilling contractors and field workers, the herd that gathers overnight wherever the rumor of oil originates. Many of these men, old and seasoned campaigners in search of oil and gas, admit that the biggest oil operations ever seen in the entire history are now sharpened up right in Crockett County, Texas.

Speculators at a distance who invested small sums in leases along the Marathon Fold in the early stages have since visited the field and found wells drilling right adjoining their lease and value has been boosted in consequence to anywhere from ten to one hundred times the original price.

You have read of the quick fortunes made in the oil business, you are eager for the touch of thrill which success brings. The only way to be a man or woman of reality is to be a man or woman of action.

THE MARLAND OIL COMPANY, KNOWN CHIEFLY FOR ITS OPERATIONS IN OKLAHOMA, WHICH INCLUDED DRILLING ON SOME OF THE RICHEST OF THE OSAGE INDIAN ACREAGE, HAS STEPPED ASIDE FROM THIS ADMITTED MILLION DOLLAR POOL AND PURCHASED MORE THAN TEN THOUSAND ACRES IN SHEFFIELD TERRACE ALONG THE MARATHON FOLD. THIS GIGANTIC COMPANY, ENTERING INTO THE FIELD HAS INCREASED OUR LEASES NEARLY A HUNDRED PER CENT.

A desire means nothing without action.

Actions mean nothing without a foundation. There is no one making money in oil but people who are dealing in it. If you are desirous of making money in this gigantic business, you have first got to get into it.

When you pass up such opportunities as I am offering with the hopes of tomorrow bringing a better one, you are allowing your hopefulness to run away with your judgment.

A timid man or woman never accomplishes anything worth while. The man of action is the man of the hour.

I know thin-blooded men who have gone out on top of mountains of wealth and returned to camp single handed, while men of action, full of red blood and iron, in the deepest gutters of poverty and despair, made valuable gems from worthless pebbles.

Who is the man who succeeds? The man who thinks clearly and plans wisely, executes promptly with untrained energy.

You are getting the facts wholesale at retail prices. Of course, I realize many men do not want facts, and it is as difficult to convince them of their error as it is to convince a cat it is wrong to lick mice.

Come into this office and learn how to judge when an oil speculation is justified.

I am an oil man, no pretender, no shadow, no passing fad; don't take my sign down for anybody and will pitch camp anywhere. Full of red blood and iron, accuracy, ambition, courtesy, loyalty, discretion, integrity, stamina, promptitude, truthfulness, built from the ground up.

Oil land leases is my specialty, not stocks or units but am thoroughly versed on both issues. This statement can best be verified by those who have heretofore dealt with me.

Examining into the merits of oil investments is the greater part of my business.

I first satisfy myself that the district I offer leases in has every thing out of which to build success.

I am familiar with the activities of every oil district in the South and know the paying possibilities of every investment offered therein; have personal knowledge of the exceptional opportunities for quick riches from a small investment in Crockett County leases with unlimited possibilities for a large return. This is my reason for urging you to buy.

If what I have said fails to express to you the sincerity and esteem which I retain for your success, and only can be looked upon as inconsiderate, stop right here. If you are open to a reasonable conviction and are willing to indulge in the chance that must be taken in all ordinary business transactions, read on.

LEARN THE TRUTH

HOW TO WIN SUCCESS IN OIL AND AVOID FAILURES

Failure is a word approved only by the ignorant and lazy. Such persons are not likely to be interested in this wonderful oil land offering.

Thousands of persons fail to succeed in life simply because they remain in ignorance of the riches with which nature has endowed. The key to fortune is foresight, coupled with action and harmonious working with opportunities.

I know what 95 per cent of public sentiment is toward the oil business, but I don't care anything about the skeptics. Ignorance and skepticism only apply their forces freely to any cause which means a hindrance to progress.

Whatever the ignorant is for, I am against and whatever he is against, I am for.

I am a promotor and am recognized among understanding men as a promotor. Every progressive move made since the time Moses went out into the world to seek better ground for his people, the promotor is due credit.

Every luxury and necessity which smiles public approval are the result of a promotor's energy.

A promotor works for private good and public gain; were it not for promoters, success would have difficulty in finding its way through the channels of fear and doubt.

Right fear is constructive, while wrong fear is destructive.

I have no backbone like a jelly-fish, but like pig iron. Give me a lever long enough and a prop strong enough, I believe that I can, single-handed, move the world.

A thought, no doubt occurred to you, has the writer made money from oil. Yes. Just what you can do, if you will only open your eyes and take a fling at fortune.

But in order to make money in oil, you have first got to get into the right place with the right people; just what I'm urging you to do now.

I am offering a lease on 640 acres right in the heart of the greatest oil drilling campaign ever assembled in the South. \$10 per acre is all it will cost, if you act quick. If you are not acquainted with the wonders of a new oil field, naturally it will be hard to grasp the full significance of the location of this lease and the unlimited returns which are sure to follow upon the completion of a near-by gusher well.

If time permitted, before all this acreage is sold, I would refer you to the Texas Oil Ledger, published at Ft. Worth, Texas, for a full report on this area.

The receipt of this, I am sure, would immediately be followed by your subscription for 20 acres or more.

I have lived throughout the booming days of a good many oil fields of the South and have never seen any new district equal the possibilities of Crockett County.

I know I am justified in recommending this field to you, indications are there will be no half way measures in Crockett County.

This last chapter of the wonderful history of

oil operation is going to be played out in a big way.

Either Crockett County is going to fail utterly or succeed magnificently. Geologists and practical oil men say it cannot fail. In support of this statement it is reliably reported there are already several producing wells, one of which is 2400 barrels, and 15 or 20 more on the sands ready to be brought in just as soon as pipe line facilities are able to handle production.

It does not take the seventh daughter of the seventh daughter or a son of a prophet of old, a second sighter or an Ouija board or even a common old every day dopist to see the future of Crockett County.

The companies now operating in Crockett County district are the same companies who since 1917 placed the following gigantic oil fields on the map: Burkburnett, Breckenridge, Desdemona, Goose Creek, Orange, Ranger, Mineral Wells, Mexia, Barber's Hill, Groesbeck, Humble, Sauer Lake, Saratoga, Luling, Guadalupe, Elective, Petroleum, Wichita, Bull Bayou, Haynesville, Junction City, Homer, El Dorado, Smackover, Powell Pool and many others too numerous to mention.

You buy the lease and leave its maturing future up to me. I am not afraid of placing my future dealings in jeopardy.

Surely the honored title of my being your sponsor in this gigantic business is in no way questionable. I am young in my profession, possess ample energy, enjoy a reputation beyond reproach and my desire for your success is deep and abiding.

Such as will endure through life, gaining strength each hour, from youth's crimson flush of dawn to the gathering twilight of old age.

Come, my people, and join me in this issue. I'll assure you that you will never have just cause to grieve.

You surely could not be so unfair as to brand any of your unprofitable dealings to any loquacity on my part. I am a stranger in your city, it is true, but if you are acquainted with strict business ethics, then you are acquainted with me. Ninety-five per cent of my previous dealings have been with organized executors, lawyers, commanders and reformers, preachers, orators, geniuses, statesmen, presidents of corporations, world rulers and professional men from every walk of life.

If you really value a Race man's regards for his people's success, I am asking you to dismiss all distrust of my sincerity from your minds and trust that you will place implicit confidence in what I am saying.

It is fear which is controlling your thoughts and holding you bound, a hopeless captive in its iron-clad grasp.

Decide at once, my friends, summon all the force of your will and with one great titanic effort, fling the monster of fear from you and crush it beneath your heels as you would a venomous reptile eager for your destruction.

Step out from the mass who hesitate and lose, take your place among the few who dare and win. You will have to hurry.

This offer holds good for a short time only. People of the opposite race have already spoken for the entire section.
