

WHAT WAS TO HAPPEN IN JUNE

By MARGARET WIDEMER

There's something very wonderful going to happen to me this June! said Rosabel happily. "I've felt it—and, besides, a fortune-teller told me so." Gerald had lived next door to Rosabel ten years—ever since she was seven and he was twelve. So he knew her well enough to say, severely: "Don't be a little goose!" before he went off to see the lady he was paying attention to. She could not be called a little goose; she was quite Gerald's own age. She had black eyes and fascinating ways; her only drawback was the way she let Derrick and old James sit all over the place nights Gerald was paying attention.

But he couldn't. Both little hands were in Rosabel's lap. And a blinding thought struck Gerald. It was June—the second of June. And—was it possible that Rosabel, being young and foolish, might take Derrick for a wonderful thing? You never can tell about a woman, even one you've lived next door to for ten years! He and Derrick—it seemed annoyingly customary—went down the porch together. Gerald thought of going back and explaining to Rosabel why she should not let Derrick come to see her. But it seemed more dignified not to.

DAIRY FACTS

SILOS IMPORTANT FOR FEEDING COWS

Business farmers and experiment stations have found that a silo not only increases the yearly profits of the farm but eliminates many uncertainties of live stock raising; and dairy farmers are realizing more and more the place of the silo in the successful feeding of dairy cows. Many products which if fed dry have little feed value are converted into splendid feed by a silo, says W. J. Keegan, extension dairy husbandry man at Clemson college, in discussing the importance of silos in dairying. Sixty per cent of the feeding value of a good corn crop is in the ears and 40 per cent in the stalks and leaves. When the crop is in a partial failure, a much greater percentage of the total nutrients is in the poughage, and in the event of protracted drought, the roughage often contains practically all of the food elements. Putting the corn in the crib, therefore, does not mean that the crop is all harvested. Can the farmer afford to waste 40 cents out of every dollar when by putting his corn crop in the silo, he can get its full value, 100 per cent?

STATE NEWS IN BRIEF

Mill City.—The work of building the new school gymnasium at Gates was completed Friday by contractors and the painting will begin immediately. Albany.—An Italian carnival will be given by the Albany College Women's league October 29 and 30 for the purpose of raising funds for the college library. Albany.—Flax growing in Linn county may be added to the county's list of agricultural efforts as a result of a meeting of several interested farmers with a delegation of men interested in the propagation of the flax growing industry in the valley. Hillsboro.—One hundred per cent enrollment in the county, state and national educational associations is the record set by the teachers of the Hillsboro city schools in a report turned over to the county school superintendent Friday afternoon. Marshfield.—The Women's Civic School and Citizenship proved a popular innovation this year when the first meeting was held for organization. Twenty foreigners who were desirous of becoming American citizens enrolled at the opening meeting. La Grande.—A chapter of the De Molay order was formed here Saturday night with 24 Union and La Grande boys taking the initiatory degree. The Pendleton team put on the work. Salem.—Charles Hennegan, a farmer living three miles north of Waconda, was fined \$250 in justice court Saturday. Deputy sheriffs found nearly 300 gallons of grape wine on his place, which was raided earlier in the week. Mill City.—The second shipment of salmon eggs from the racks near Breitenbush was made Friday, when approximately 2,000,000 eggs were shipped to the hatchery at Mehama. Albany.—Albany's auto tourist camp ground in Bryant park has brought in \$1948 so far this season and more than 8000 persons have stopped at the camp over night. The total for the year is expected to reach \$1290 before the park is closed for the winter. Salem.—There were two fatalities in Oregon due to industrial accidents during the week ending October 9, according to a report prepared here by the state industrial accident commission. The victims were Milo Shestak, Joseph, laborer, and F. J. Schultz, Knappton, chaser. Eugene.—At a meeting of the Lane County Farmers' union at Lorane Saturday resolutions condemning the county board of equalization for lowering Assessor Keeney's figures on the assessment of timber lands and bank stock were adopted unanimously, according to members who attended. The Dalles.—Tygh grade, for years dreaded by motorists who traveled over The Dalles highway, is no more. The new grade of the highway, leading down Butler canyon on an easy incline, has been completed and surfaced by the contractor and opened to travel, it was announced at the local state highway office. Salem.—Fire losses in Oregon, exclusive of Portland, in September aggregated \$667,391.36, according to a report prepared here by Will H. Moore, state fire marshal. The most disastrous fire was at Perry, where a sawmill was destroyed with a loss of \$150,000. A total of 125 fires were reported, three of which were of incendiary origin. Albany.—Linn county's assessed valuation on this year's tax rolls has increased \$706,650, most of which is taken up by unimproved lands. An increase of 4 cents an acre on unimproved lands, mostly timber, caused the increased valuation. A decrease in tillable lands of 2 cents an acre was made possible by increasing the tax on timber lands. Redmond.—The Deschutes county fair, one of the most successful ever staged, closed here Saturday. According to William Wilson, president, the fair has been a remarkable success from every standpoint. The farm produce, livestock and poultry exhibits were far above those of former years, and the financial returns will be sufficient to clear everything. Salem.—It is against the law to divide commissions with persons not licensed to sell real estate, according to Will Moore, real estate commissioner. Mr. Moore urges that the public co-operate with the state department by transacting all real estate sales or purchases through licensed real estate brokers, as licensed brokers have furnished the state a bond for \$1000. Portland.—With a tremendous clamor of hammer and saw in the hands of an army of workmen, the new \$350,000 building of the Pacific International Livestock exposition, built upon the ashes of the structure destroyed by fire July 23, is being rushed to completion at North Portland. Wednesday it was turned over to O. M. Plummer, general manager, and the directors of the stock show organization, complete in every detail and all ready to house the 14th annual event of the Pacific International series November 1 to 8 inclusive.

WRIGLEYS

A pleasant and agreeable sweet and a refreshing breath as well. Good for teeth, breath and digestion. Makes the next cigar taste better. Sealed in its Purify Package.

Esquimo's Igloo. The dome-shaped house or igloo of the Eskimos contains the neatest approach to the keyed arch found among North American Indians.

Silver Plating Easy. Silver plating that, according to its inventor, can easily be applied at home to worn-off silverware, is now on the market.

Mrs. Isabella McLachlan

Operation Avoided

Portland, Oreg.—Dr. Pierce's medicine has been so very beneficial to me that I am glad to give it my recommendation. Doctors said I would have to undergo an operation, but after taking the 'Favorite Prescription' I found that an operation was not necessary. During one expectant period I suffered with inflammation and became so weak and rundown I could not do my work. Doctors again advised an operation, but instead I began taking the 'Favorite Prescription' and it soon put me on my feet. My health returned, I had practically no suffering, and my baby was very healthy. Since that time whenever I have felt badly I have taken the 'Favorite Prescription.' It always makes me well in no time.—Mrs. Isabella McLachlan, 768 Mich. Ave. Go to your neighborhood drug store and get Favorite Prescription in tablets or liquid. Write Dr. Pierce, President Invalids' Hotel, in Buffalo, N. Y., and receive good medical advice in return, free.

LODGE DIRECTORY

Pythian Bath House and Sanitarium. Knights of Pythias of N. A., S. A., E., A., U. and A. A. (Operating Under Supervision of U. S. Government) 415 1/2 Malvern Avenue Hot Springs Nat. Park, Ark. C. GEE WO CHINESE MEDICINE CO.

C. GEE WO, the well known Herbalist, has made a life study of the curative properties possessed by Oriental Roots, Herbs, Buds and Bark, and therefrom compounded his truly wonderful 'Herb' remedies. In their make-up no poisons or narcotics are used; perfectly harmless, and many cures and herbs that he uses are unknown to the medical profession of today. AVOID OPERATIONS by taking his remedies in time for Stomach, Coughs, Colds, Rheumatism, Kidney, Lung, Liver, Catarrh, Blood, Inflammation, Neuralgia and all female and children's ailments. Call or write, Sent by mail or parcel post.

STRAIT-TEX

HAS ENJOYED SUCH UNEXPECTED SUCCESS IN THE PAST YEAR THAT WE HAVE DECIDED TO ADD A FEW MORE BEAUTIFYING PREPARATIONS TO OUR LIMITED BUT EFFECTIVE LINE. The following is our complete list: Strait-Tex Hair Refining Tonic \$1.00 Refines kinky, frizzy, coarse hair to medium, medium hair to good. Strait-Tex Hair Grower 25c Not only promotes growth of the hair, but makes it soft, pliable and luxuriant. An excellent pressing oil. Gloss-Tex Brilliantine 50c Makes the hair soft and glossy and keeps it in good condition without leaving it oily or gummy. Strait-Tex Hair Remover \$1.00 Is a vegetable preparation that actually straightens and restores the original color to gray or faded hair. Color permanent—positively without rub off, no matter how often the hair is shampooed. Three shades: Black, Brown and Chestnut-Brown. Kokomo Shampoo 40c Is made from pure coconut oil; cleans the scalp and roots of the hair in a natural, healthy manner. Bronze Beauty Vanishing Cream 50c Is a soothing, greenless vanishing face cream that will not grow hair. Bronze Beauty Lemon Cream 50c Is nourishing, softening and stimulating to the skin; is filled with a triple strength of oil of lemon—making it a mild, bleaching cream. Bronze Beauty Face Powders 50c Are suited to all complexions. Can be successfully used on dry or oily skin. The shades: High Brown and Bronze Glow are favorites. Mollyglosco \$1.00 Is a special hair straightener for men; positively gus anted to straighten the most stubborn hair in from 15 to 20 minutes without the use of hot irons. Will not injure the scalp or turn the hair red.

25,000 Farmers Unite to Pray Gods for Rain

Kioto, Japan.—More than 25,000 farmers participated in a prayer ceremony held recently in Funi, county, Kioto prefecture, to pray to the ancient Shinto deities to send rain. Drought has been threatening the western and southern part of Japan with serious rice crop shortages this year. The drought is causing quarrels among farming communities in various parts of southern Japan, where the water supply is inadequate. The governor of Kumamoto prefecture has been asked to act as referee between two villages which are quarreling over the right of one higher up the stream than the other to dam the stream to get water for its parched crops. Solitude is often the best society.

Average Production of Holstein-Friesian Cows

A total of 20,000 pure bred Holstein-Friesian cows now have completed yearly production records in the advanced registry of the Holstein-Friesian Association of America with an average of 15,003.2 pounds milk and 528.49 pounds butterfat, equivalent to 900.6 pounds butter, according to the report of the superintendent of advanced registry for the last fiscal year recently closed.

Feeding Dairy Cow

It is easy to let the cow slip down in her milk production, but very hard to bring her back. The cow that milked well during the early part of the summer, when the pastures were good, if allowed to go down when the pastures are poor and the flies a torment, will never come back and milk in the fall and winter as she should. A little feed will not only hold her from going down, but make it possible to keep her up to a good level for months to come.

Safest Cattle Feeding

Feeding calves for the baby beef market is the safest kind of cattle feeding and a larger number of calves are being fed for the market this year than ever before. Feeders of this kind of cattle too often send them to market before they have become fat enough to command a price that will insure the large net returns. No other class of cattle is discriminated against so severely as a half fat baby beef. The fatter the baby beef the more profit he makes.

Grain for Young Colts

There is one advantage in feeding sucking colts grain that every farmer who raises colts will appreciate. It makes the weaning of the colts an easy matter. The colts being accustomed to eating the grain, do not miss their mother's milk when taken away from them, because they are not dependent upon them for their nourishment. It is a simple matter to increase their grain rations and so keep them up in their course of development.

Plant With Bad Odor

A wonderful and unpleasant plant from the Indian jungle is in the famous Kew gardens in London, England. While in flower the odor from this tropical visitor is extremely unpleasant, somewhat like carrion. Male and female species of the plant appear in the flower, the male portion being a ring of bead-like yellow blossoms on top and the female a second ring of smaller and closer petals below. When the bloom was at its height the odor of tainted meat was so strong and unpleasant that visitors to the house hastened from it. It is the evil smell of the flower which attracts the flies, and they, in their turn, pollenate the plant. As the flower dies and its deep purplish-colored mantle shrinks, a single leaf springs from the decaying bloom, and reaches in a short period the great height of 50 feet. It is classified as one of the Amorphophallus species.
