

# No. 14—What Is Your Natural Talent?

By DR. M. N. BUNKER, D.C.S.  
Nationally Known Grapho-Analyst.

## Fit at Sixty!

REMEMBER Ponce de Leon and his fruitless quest for the fountain of Youth? Far more fortunate today are thousands of men and women who at fifty, sixty, even seventy are still young inside. How have they preserved their vigor and enthusiasm? Simple, when you know their secret. PERUNA! This good old internal medicine contains IRON—also roots and herbs that help bring back glowing health and vitality. Stimulates digestion, purifies the system, revives sluggish organs and muscles... in short, makes and keeps you fit. Try one bottle. See if its bracing effects do not change your whole outlook on life.

"What am I good for?" This is a question that has just come from one of our men readers. "I have been trying to teach school but somehow I just don't like it. My pupils all seem to like me well enough but somehow or another I want to do something else? Does my handwriting show any signs that I have any ability? Can you tell me what to do?"

*machinery is very none of the work*  
Arthur Meers

As I study the handwriting of the letter which this man wrote me, it is easy to know exactly why he is not satisfied in the school room. He is not a teacher, he is a mechanic. Give him the tools to make a fine watch, or to do careful accurate mechanical work, and he will not find the hours too long or the work too hard. This is because he will love his work.

This man can make a good mechanical dentist, because he is just as accurate and skillful in the use of his hands, as such a man must be. He must be perfect in his work—and this man's writing shows that he will be exactly that. You may have some mechanical talent, and if you do, your handwriting will show it. If you examine your own writing you may not find that it is exactly similar to that of Arthur Meers, but that does not mean that you lack mechanical skill. However, if your writing is like either one of these specimens you may be sure that you have fine mechanical talent that should be cultivated.

*Charles P. Steinmetz*

Study the signature of Charles P. Steinmetz very carefully. He was the most outstanding electrical engineer

# Favorite Recipes

The recipes printed in this column of the Illustrated Feature Section have been tested and approved by culinary experts. Fit these recipes and you will soon have a complete list of new and delicious dishes.

**RAW VEGETABLE SALAD**  
1 package lemon flavored gelatin  
1 pint boiling water  
1/2 teaspoon salt  
1/2 teaspoons vinegar  
Shake of cayenne pepper  
1/2 cup beets, cut fine  
1/2 cup raw carrots, cut fine  
1/2 cup raw cabbage, cut fine  
1/2 cup celery, cut fine  
Dissolve flavored gelatin in boiling water. Add vinegar, salt and cayenne pepper. Chill. When slightly thickened, stir in beets, carrots, cabbage and celery. Put into individual molds. Chill until firm. Serve on lettuce with mayonnaise. Serves 6.

this country has ever had. He rose from poverty to the greatest place in his field, not because of "pull" but because he cultivated and used his natural talent.

You have some natural talent. It may not be for mechanical work. Instead it may be for the stage, or for an artistic career, but no matter what, your handwriting tells the story, just as completely and accurately as it does in the case of Arthur Meers or Charles P. Steinmetz.

**YOU MAY HAVE A PERSONAL REPORT MADE OF YOUR HANDWRITING IF YOU WILL WRITE A PAGE, USING PEN AND INK, A STAMPED AND ADDRESSED ENVELOPE FOR REPLY BE SENT TO ENCLOSE THE STAMPED ENVELOPE. FOR LETTERS WITHOUT THIS WILL BE DISCARDED**

# Is There Love at First Sight?

Have you a puzzling love affair on which you need friendly advice? Write to Julia Jerome, care of this newspaper. If you wish a personal reply please send a stamped, self-addressed envelope.

A young man in Chicago asks a very old question.

My dear Mrs. Jerome: Do you believe in love at first sight? A week ago I met a young lady who is beautiful and charming. I'm not so bad myself and we are both sure we want each other. And since we do, why shouldn't we marry even if our friends are skeptical and laugh at us? I know it was love at first sight though I often hear people say that there is no such thing. What do you think?

### HAPPY LOVER.

Yes, I believe in it. Rather, I should say, I believe in attraction at first sight and this feeling properly cultivated will lead to love. Of course everyone has a different conception of what love is. But I fancy that love is a relationship which makes the couple happy. Passion, there-

fore, does not always mean love. And mutual attraction can be just passion and not love. But, I repeat, mutual attraction is the first step toward love. You seem so hilariously happy and happiness is so beautiful that I do not want to throw cold water on it by cautioning you to wait. I will, instead, caution you to be considerate and understanding after you marry. You will certainly have quarrels—they can't be just a healthy work-out—they can be sordid and tragic. If you will keep your sense of humor and not indulge in feelings of self-pity when your wife-to-be does something that hurts you, quarrels can help you rather than hinder you in finding and establishing a great and lasting love. But if you are the kind of man who takes himself too seriously you'll have a hard time of it. The new idea of companionate marriage is a modern attempt to meet just such situations as yours. But since society has not given this form of union sanction yet go ahead and marry. Your enthusiasm is worth the chance.
