Notice to the public

SUPPOSE you are today paying 50c a tube for your tooth paste (and there are many very good dentifrices selling today at that price).

Suppose, like most people, you buy about twelve tubes during a year. Now if you knew that you could buy as good a dentifrice as can be made and still save each year the price of 25 loaves of bread or 60 bars of soap or 40 pounds of sugar or a box of fine cigars—could you conscientiously fail to take advantage of such an opportunity?

That is exactly what you do when you buy Listerine Tooth Paste at 25c for a large tube. Figure it out for yourself.

FOR YOUNGSTERS

Children's undergarments are just as brief and comfortable as possible, for the active little person of today scorns anything fussy. The all-in-one illustrated on the left combines an underwaist and side-closing panties of modern brevity. The underwaist is closed snugly at the back.

The well-dressed child mirrors the grown-up mode in miniature. When mother goes in for pajama ensembles, similar costumes are sure to appear in little daughter's wardrobe. The one shown here, on the right has a plain sleeveless blouse which contrasts with the printed coat and trousers.

First Model: Pictorial Printed Pattern No. 4414. Sizes 1 to 6 years, 30 cents.

Second Model: Pictorial Printed Pattern No. 4915. Sizes 2, 4 and 6 years, 35 cents.

NEW ENSEMBLE

Paris approves the short-jacketed ensemble for sports and informal daytime wear. In its accepted version, the jacket is always very simply tailored, with button trimming on the sleeves, as in the model shown here. The blouses are practically all in novelty jerseys in striking designs and combinations of colors. At present, striped motifs are claiming the largest share of attention, with grouped stripes and combinations of uneven widths, prominent. Skirts are given width by slight flares or wide box pleating at front.

Excella Pattern, Jacket No. 2994, Sizes 14 to 46, 25 cents. Frock No. 3005, Sizes 14 to 48, 25 cents.

The European peasant measures wealth by the dimensions of his farm or by the gold he has stored away.

The true measure of wealth is the "standard of living." This means not only the comfort of our daily lives, but the amount of leisure time which we have.

The electrical industry is contributing to the wealth of the nation by adding to the comfort and convenience of living and to the amount of leisure time which the average citizen has at his disposal.

We are selling service as well as commodities.

Great strides in invention, great expenditures...

BUSINESS, using the telephone, eliminates space and time. The far-flung parts of an organization with its dealers and customers are brought together by instant speech. The home, like the office, reaches out over an ever-widening circle of neighbors.

The telephone is tireless and quick. It runs errands near and far, transacts business, keeps friendships alive. Telephones throughout the house save time and fatigue. They bring the comforts and conveniences of the office to the women in the home.

Keeping ahead of the new developments in American life calls for great strides in inventions, great expenditures in money. The Bell System's outlay this year for new plant and service improvements is more than \$50 million dollars. This is one and one-half times the cost of the Panama Canal.

This program is part of the telephone ideal that anyone, anywhere, shall be able to talk quickly and at reasonable cost with anyone, anywhere else. There is no standing still in the Bell System.
