Tested And **Proven Best**.

"BLindfold" test may be all right for cigarettes — but when buying face powder, it's a good idea to keep your eyes wide open.

Not unlike other articles of merchandise, there are good face powders on the market and face powders not so good — in fact, inferior and dangerous to one's complexion

Ours has been tested and proven best. Use this simple little test yourself.

Put one-half teaspoonful of our face powder in your hand and pour in an equal quantity of water. The water will run off which proves emphatically that it is water proof and we guarantee it to be free of lead, bismuth salts or any other harmful ingredients.
