College, winter rye planted in the syring will continually stool throughout the summer and will of the Children not grow very rank and will keep of the Children more succulent than the winter rye

more succulent than the winter rye planted in the fail. Too much green feed for laying birds may have a tendency to affect the quality of the albumen, but for growing birds there is very little chance that much harm can be done by overfeeding of green feed. "Mother, tomorrow is pay day and we can ha some meat unless they are limited on other feeds, such as grain and mash. Some poultrymen also are be-gining to allow their growing chicks to go in their sweet corn or field corn fields after it has become about one foot high. This gives the growing chicks a chance to get shade as well as green feed and does no serious harm to the corn as long as the birds are not large enough to jump up and eat the

enough to jump up and eat the sweet corn ears later on in the sea-son. When trouble of this kind taken out of the field. At least the birds should be al-lowed some-sort of green feed that will help to keep-the digestive sys-tem in got condition.

THE HUMAN

The afternoon tes tray should have both cream and lemon on it, so that the guest may have her choice.

Always put a cloth on the table on which tea is placed. The cloth may be of colored linen; but white either plain; hemstitched or trimmed with lace and needlework -is a more general choice

A guest at an afternoon tea who happens to be seated close to her bostess facilitates matters by ex-tending her hand for her cup of tea

CHILDREN WITH

HARSH MEDICINES

## Mother of Healthy Family Tells How to Keep Youngsters Happy and Strong

Mrs. J. E. Gaines' children are full of life. Neighbors of the Gaines have always envied the glorious health of her six youngsters. (Three are shown in the picture above.) Their complexion is always clear. Appetites fine, and bowels move just like clockwork. And they are always so full of pep, too! They get high marks at school and have a lot of energy left over to help their mother with the chores. mother with the chores.

All of her friends in Atlanta say Mrs. Games is just plain lucky having such lovely children. Mrs. Games, however, tells another story. In a special story for the newspapers, to, aid mothers with the health of their young ones, Mrs. Gaines said. Gaines said:

"Good health is never an accident like many people think. It comes from watching the physical needs of children. When a youngster is sluggish, headachy, with clogged-up bowels and coated tongue, it's inc that the with organs are out a sign that the vital organs are out of order. This makes the child dull at school. Sometimes these children at school. Sometimes these theorem just mope around, or get into mis-chief instead of playing like other children. Don't spank children who get this, way. You'll find-that the pone youngster's bloodstream-has been poisoned by accumulated wastes. This always results from sluggish vital organs and accounts for a lot of misery and suffering by both children and mothers.

"Some mothers, not knowing what else to do, give 'patent medi-cines' they know nothing about, or strong eathartics which may in-jure the bowels. This is always a mistake. You have all seen dull, droopy children with the cathartic habit!

"Following the advice of a fa-mousfamily physician, I have always believed in stimulating the vital believed in stimulating the vital organs of my children regularly. I find that Dr. Caldwell's Syrup Pepsin is a safe stimulant which is thorough in action and does the work. It's deligions, and children actually like it. It contains pure pepsin, active senna and fresh laxative herbs. For convenience, it is already put up in bottles, with full directions. Every druggist has it and it isn't expensive."

Protect your family from colds, sick spells, loss of appetite and chronic constipation. Throw out old-fashioned, dangerous remedies. Dr. Caldwell's Syrup Pepsin gets the bowels to working naturally.

No griping or burning; can be used at regular intervals with benefit. It's fine for adults, too.

Dispossessed

readily grows again after being cut But if the aps is cut cloae to the ground, especially during dry veather, it will not respo d and will die out. One of the troubles with rape ying birds, however, is that it cast a greenish color to the whites of a few of the eggs. Swiss chard and rye planted in the spring have proved to be two very popular gi n feeds for sum-mer in the r ultry plant. Accord-ing to Prof. Graham, of Ontario

enough to jump up and eat the
