wood and the shortage of cutters Mr. York was unable to make a contract. He states that the Medford city council are contemplating either securing electric light and power from some of the electric companies or to install oil furnaces in their power station, as wood is getting too high priced for economical use in Medford.

Mrs. Mamie Dox has engaged Fred Fick to build an addition to her house. The new part will be the same size and height as the main part and will replace the small addition now used by her as a kitchen.

Owing to Father E. P. Murphy being called to take charge of the Catholic church in Salem the Ashland church is left without a local pastor. For the present Father J. D. Murphy of this place has charge of both the Jacksonville and Ashland churches. David Linn returned Thursday from Upper Rogue river where he had been since Tuesday as a viewer in company with S. G. Van Dyke and County Surveyor Carl T. Jones in relocating a section of the Rogue River road that runs through J. H. Stewart's land. The new section of road is about a mile in length and gives a shorter distance and a much better grade than was had on the old route. Mr. Linn says that the 40 acres of young pear trees on Mr. Stewart's place are as fine as are to be seen in Oregon, while the corn on the same ground if as thrifty and well cared as any ever grown in the Rogue River valley.

Chas. Basye not having fully recovered the use of his broken leg has engaged C. H. Paine of Medford to help him in his blacksmith and wagon shop. Mr. Paine is an expert horseshoer and a blacksmith able to handle anything in iron. Mr. Basye will for the present do the wood working and the light intricate repair work. Mr. Basye has added the tools he formerly possessed to those in the Cron-miller shop and now he has a complete outfit and is able to do any repair work from the lightest to the heaviest. So soon as he can have it done Mr. Basye will have the Cron-miller building repaired and repainted that it may be in keeping with the general improvement now being carried on in Jacksonville.

J. H. Downing of Central Point was in Jacksonville Thursday seeking information as to the feasibility of growing English walnuts for the market. He called on Mr. Britt and Judge Hanna who each have fine walnut trees in their yards that are bearing to learn whether the trees bore regularly or not and if the nuts ripen perfectly. Mr. Britt's tree, which is the oldest in Jacksonville, has borne nuts for several years that are of fine quality and in abundance each season. Judge Hanna's trees are seedlings from nuts from Mr. Britt's tree and they commenced bearing at seven years. Mr. Downing has 20 acres of hill land north of Jacksonville that he is planning to set to walnuts and cherries. One of the reasons for his selecting these trees is that neither require spraying and he does not wish trees for which he has to wage a ceaseless warfare with the insect pests in order to secure a crop. Mr. Downing's venture will be the first walnut orchard in Rogue river valley and the success of it will be watched with interest by others who have hill land that is not first-class farming land.
