

CONVENTIONS APRIL 22-3

Nominations for City Officials To Be Made in Afternoon On Those Days

The Police Judge has set the dates for the Ward and City primary nomination conventions. The convention for nominating Councilmen will be held in each ward on Wednesday April 22nd, and the general convention for nominating the other city officers will be held Thursday April 23, at the Court House. The convention on both days will be called at two o'clock and will adjourn upon completion of the business.

The City Council last evening named the following judges and clerks: First Ward Judges, Frank Armstrong, O. A. Stearns and M. G. Wilkins; Clerks, Fred Stahlman and Roy Telford. Second Ward, Judges, N. Langell, Wilbur White and John Fountain; Clerks, Roy Hamaker and Burge Mason. Third Ward, Judges, Wm. Whitlock, C. B. Clendening and Will Humphrey; Clerks, Carey Ramsby and W. C. Sanderson. For the City Convention Judges, P. L. Fountain, O. A. Stearns and Marion Haaks; Clerks, R. I. Hammond and E. M. Bubb.

SETTLEMENT LIKELY

Mason, Davis & Co. Claims in Lime Light

There is a possibility that the differences between the Reclamation Service and Mason, Davis & Co. will soon be settled. Engineer J. H. Quinton, who is reclassifying the dirt on the first unit of the canal is the direct representative of Chief Engineer A. P. Davis, who, according to the contract between the Service and the contractors is to decide in all cases of dispute. Mr. Quinton will remain here long enough to go over the entire classification in a thorough manner and he will then report to Mr. Davis, who will base his conclusions upon his report. Mason, Davis & Co. are represented by Engineers Newell and Grundahl, who are at the service of Mr. Quinton in rendering any assistance that he may desire.

It will be remembered that upon completion of their contract Mason, Davis & Co. put in claims for extra work and for mistaken classification aggregating \$370,000. The matter has been hanging fire for over a year, but it is very probable that the settlement will be reached

within a month. The chief engineer's report on the matter will be final, and should the contractors be dissatisfied with his decision they will have recourse to the Court of Claims or possibly to secure an act of Congress covering the same. However, both the representatives of the Government and of the contractors seem to think that the decision of the chief engineer will be satisfactory to all parties concerned.

Chamber Meets Tonight

The Chamber of Commerce will hold a meeting tonight in their rooms in the Murdoch building, to which every business man and property owner in the city is especially invited to be present. The matter of reorganization will be taken up and it is proposed to make the Chamber a much stronger organization and interest all the business men in an effort to secure factories and other enterprises for the city. If you want to get in on the reorganization you should not fail to be present tonight.

BRIEF MENTION

Deputy Sheriff C. R. DeLap will start with the election supplies just as soon as the ballots are printed.

C. A. Lambert the Klamath Falls Bonanza stage man, is in the city on business.

For Upper Lake points by launch call on C. P. Gregory & Son.

County Court is in session again today transacting routine matters.

A skating rink will be opened shortly in the Schallack warehouse on Klamath avenue. The place is now undergoing repairs, and is being fixed up so that it can be used for skating.

It is not necessary to leave your watches so long at Winters. We are now prepared to do your work promptly. All work guaranteed for one year.

D. J. Van Seyoc, of Oakland, Cal., is now connected with the local office of the Holcomb Realty Co.

Spring line Panama and Straw Hats at the K K K store.

E. A. Dunham is getting his automobile in shape for the season. Ed expects to do a wholesale auto-livery business this Summer and he already has a number of passengers for the Crater Lake trip.

Mens Panama Hats K K K store.

C. T. Oliver has had a number of improvements made on his bath house at the Hot Springs. The tent has been walled up and equipped with a door which has a padlock attached to it.

Mrs. O. R. Brown and Mrs. M. Bailey leave in the morning for Twisp, Wash., where they will remain indefinitely. The altitude is too high for the former and the change is made on account of her health.

DORRIS ON APRIL 20TH

Reach Water Early This Fall

HERE NEXT SPRING

Marsh Work Will Be Rushed As It Is Only Thing De- laying Road

H. P. Hoey, chief engineer of the California Northeastern, arrived in the city yesterday accompanied by Henry Crosby, who has charge of the establishment of watering places along the railroad line.

In speaking of the railroad extension Mr. Hoey said that the road will be completed to Dorris by the 20th of this month, and that there is no reason whatever why it should not be at the water front this Fall. He says the work on the "shoo fly" is progressing nicely and the grade is already more than half finished. He says the delay in reaching this city will be in crossing the marsh. The company is not altogether satisfied with this branch of the work and something will be done at once to expedite the construction of this part of the road. Just what action will be taken Mr. Hoey did not state but he said very emphatically that the marsh work would be rushed from now on.

When asked if it was possible that the road might get here this year Mr. Hoey replied that he thought it very improbable but he felt sure that it would reach the water in the early Fall. He would not express an opinion as to what time the road might be completed to this city, saying that the entire matter hinged upon the dike across the marsh. He says the bridges will cause no delay as they can be put up in a short time. He did not say what kind of bridges the company proposed using in crossing navigable channels.

Mr. Hoey still has his office at Bray, but will move up the line just as soon as the regular service is established to a point farther along. The road is now completed to a point a few miles beyond McDoel, and sidetracks are now being put in at both Mt. Hebron and McDoel. When this work is finished it is very probable that a regular train service will at once be inaugurated to McDoel. The time until the road will reach Dorris is so short that the other towns along the line will be the terminal for only a few days, while Dorris will enjoy that distinction until the road is completed to the water.

The labor situation is very favorable to the early completion of the road and Mr. Hoey states that he finds it unnecessary to advertise for men as he has all the applications he can handle.

Mr. Crosby is making his first trip over the route of the proposed road, but he already has a force at work drilling wells at Mt. Hebron and McDoel. He is very favorably impressed with the country and especially with the Klamath basin. He says this city has a great future and is as nicely located as any little place that he has seen.

J. P. Bonham and E. W. Muller, proprietors of the Singer Sewing Machine Agency, wish to inform the public that they have removed their entire stock of Edison phonographs and records which have been on display and for sale at Winters' jewelry store, to the S. K. Noel building on Main St., between Seventh and Eighth, where they will be pleased to serve you and respectfully ask for a share of your patronage.

A. Wallam, who formerly resided here, has returned from the east and is looking after his farming interests.

IN FAVOR OF BONDS

Council Agreeable to This Method

PROTECTION NEEDED

Property Owners Fear Fire and Demand Larger Water Mains

At the regular meeting of the City Council last evening there were present Mayor Bishop and Councilmen Maston, Castel, Stitts and Sanderson. After the regular bills were read and allowed, the petition of property owners for a street light at the corner of Main street and the Esplanade was granted. A petition was read signed by a large number of residents owning property in the neighborhood of the public school, asking the Council to install a fire hydrant on a six inch main at the corner of High and Tenth streets, near the Methodist church. As there is quite a territory in this vicinity without adequate fire protection it was decided to order the water company to put in a six inch main and connect a hydrant. The petition of Forest Berry for a liquor license for the Log Cabin Bar was granted.

A communication signed by Geo. T. Baldwin, as secretary of the Water Works Company, was read before the Council. The communication was presented at the request of Fire Chief Oliver, who had asked the company to make an estimate of the cost of a system of hydrants and new mains covering Klamath avenue. The cost of installing the new pipe was given at \$1,250 a foot and the cost of two styles of hydrants was given, the cheaper being \$35 each. The total cost of the system was between \$5000 and \$6000. Mr. Baldwin stated in his communication that as the company's franchise expired in about four years they would not be justified in expending this amount of money on new pipe, especially when they already had a line covering this territory. He made two propositions, one in which the company agreed to put in the new pipes at a certain yearly rental and the other that the city pay the cost and the amount to apply on the purchase when the city took over the plant. No action was taken in the matter by the Council as the Mayor and members stated that no more money could be expended until the people should take up the matter of bonding the city. The expressions were all in favor of bonding the city and eventually municipal ownership of the water system. Henry Boivin was also present and presented an argument for larger mains for fire protection on the hill in the vicinity of the High School.

The dray ordinance which has been before the Council nearly all Winter had to be laid over to another meeting as Councilman Maston had to leave before action was taken on it and the meeting was therefore without a quorum. The main protection desired by the draymen, as stated by Mr. Kenyon, is for hauling lumber, and there is some objection to this as it would prevent contractors and mill men hiring any but licensed teams to haul their lumber.

Useful Invention

William H. Clark, foreman of the construction crew of the Electric Light and Water Company, has just placed on the market the Ideal Panlifter. It is a device for the use of the housewife in lifting hot plates, pie, pudding and sauce pans and will undoubtedly prove a quick seller. It automatically fits any sized pan and is positive in its action. The housewife who has so often suffered from burns will welcome to her kitchen

an article of this kind, and it is this fact which is certain to make the invention a popular seller. It is to be hoped that its demand will be sufficient to warrant there manufacture in this city and thus add another industry to the resources of the community.

Buys Large Grader

At a session of the County Court this afternoon a large road grader was purchased for the county. The machine will cost \$1200 and is one of the most up to date road graders in the market. The purchase of this expensive grader gives assurance that the roads will receive considerable attention this Spring and Summer.

Mail Stage Runaway

The outgoing mail stage had a runaway yesterday at Sarvis flat. The tongue of the wagon was broken and the harness badly damaged. One of the horses got away and has not yet been found. The McIntire Straw stage was following the mail stage and took the mail on to Pokegama. George Porter, the driver, had his leg quite badly hurt.

He Didn't Go

D. V. Kuykendall did not go to Lakeview with H. L. Holgate as was stated in last night's Herald. Mr. Holgate is now mixing up with the voters of that County. The Herald was simply misinformed and made one of those mistakes that will occur.

Federation Will Meet

A regular monthly meeting of the Civic Federation will be held Thursday night at the court house. A full attendance is desired.

Real estate men report a demand for Klamath County lands and a considerable acreage has changed hands during the past thirty days. Many of the transients who have arrived recently have invested in lands, some buying for homes and others as an investment.

Chas. Graves came down from Odell yesterday to meet Mrs. Graves, who has been in Arizona during the Winter. They will start for home tomorrow taking the election supplies for Odell precincts with them.

Mr. and Mrs. Fred Melhase are making arrangements to move to Dorris by May 1st. Fred Schallack will also go there about that time as the new bank will commence business on the first.

The meeting of the Chamber of Commerce tonight will be largely attended as matters of importance are coming before the organization.

Ladies and Childrens Straw Hats of every description at K K K store.

MUST SIGN MORE LAND

Engineer Henny Says Per- centage is Yet Too Small in Upper Project

Engineer D. C. Henny and D. W. Murphy have returned from Merrill and Tule Lake. In speaking of the outlet of the Lake Mr. Henny said it is impossible to tell anything about the matter at this time and that before the usefulness of it could be determined it would have to be further developed.

Mr. Henny leaves in the morning for Portland after making a thorough investigation of the project. He seems well pleased with conditions here. The bids on the South Branch have been submitted to the Secretary of the Interior and it is now up to him to render a decision on them. The engineers here have submitted their recommendations on the same, but these are not made public at this time.

Mr. Henny stated that the season's work would depend largely upon the outcome of the bids on the Clear Lake dam, and the percentage of lands in the Upper Project signed for government water.

APPOINT ATTORNEY

Kuykendall Selected by State Land Board

D. V. Kuykendall has been appointed attorney for the State Land Board for Klamath County Vice C. H. Withrow, who has resigned.

It will be the business of Mr. Kuykendall to look after the interests of the board in this county and to pass judgment upon loans on Klamath County lands that may come before the board.

The landowners of the Klamath country who have listed their lands for government irrigation are at a disadvantage in borrowing money on their lands as the contract for irrigation acts as a mortgage against the land. This works a hardship upon members of the Water Users Association possessed of limited means. This matter will be taken up at the next session of the legislature and doubtless a bill will be passed which will do away with the chance of incurring a hardship upon many of the Klamath farmers.

J. A. Houston is getting things in readiness for the opening of the dining room in his hotel. The place will be opened about the first of the month.
