

2800 Acres Free

The Lakeside company has 2800 acres of land under the Adams ditch that it will give RENT FREE for one year. This includes the use of the land and water. The renter must clear and cultivate the land in cultivation. The renter gets all the crops but we reserve the right to pasture the stubble.

The Lakeside Company,
J. Frank Adams, Manager,
Merrill Oregon.

Sixteen-inch and four-foot wood for sale in any quantity. Leave orders at Walker's Jewelry Store or Newcomb and Underwood's Drug store.

Klamath Falls Public Library
The Klamath Falls Public Library is open every afternoon from 2 to 5:30 p.m. and each evening from 6:30 to 9 o'clock. A cordial invitation is extended to all.

Fire Alarm Districts

District No. 3—West side of river.
District No. 4—South of Main street from the bridge to Center street.
District No. 5—Conger and California streets.
District No. 6—Ewanna Heights.
District No. 12—South of Main, between Center and Third.
District No. 13—South of Main, between Third and Fifth.
District No. 14—North of Main, between Third and Fifth.
District No. 15—South of Main, to west between Fifth and Seventh.
District No. 16—North of Main to high, between Fifth and Seventh.
District No. 21—South of Main to almost, between Seventh and Ninth.
District No. 22—North of Main to high, between Seventh and Ninth.
District No. 23—Hot Springs district west of Main and Ninth.
District No. 24—South of Walnut to high, between Fourth and Sixth.
District No. 25—South of Walnut to high, between Sixth and Eighth.
District No. 31—South of Walnut and west of Eighth.
District No. 32—North of High to almost, between Sixth and Eighth.
District No. 34—North of Jefferson, between Sixth and Eighth.
District No. 35—North of High to almost, between Eighth and Tenth.
District No. 41—North of Jefferson, between Eighth and Tenth.
District No. 42—East of canal.
The general alarm will be sounded by ring ten rapid strokes of the bell, followed by the number of the district which the fire is located, which will ring three times. When the district is represented by more than one number, as No. 24, after giving the general alarm the bell will be tapped twice, with a slight pause, followed by four rings with a longer pause, and then repeated twice more before sounding the general alarm again.

Treasurers Notice

Notice is hereby given that there are due to the county treasury for the redemption of all outstanding county warrants protested on and prior to July 28, 1906. Interest on same will run from this date.
Filed at Klamath Falls this 15th day of April, 1906.
L. Alva Lewis,
County Treasurer.

PERSONAL MENTION

Everything guaranteed at Winters.
Dr. W. S. Johnson is in the city from Bonanza.

Spring line Panama and Straw Hats at the K K K store.

Dr. G. W. Maston is very seriously ill at his home. He has been confined to his bed for several days.

Wanted—Girl for general housework. Inquire at this office.

Arcadie Mason left for Portland Sunday morning after spending a few days in the city on business connected with the claims of Mason, Davis, & Co. against the Government.

E. B. Hall can sell you a fine ranch in the Klamath basin at reasonable figures and on easy terms. Office, 2nd door, Baldwin block.

The Easter services at the churches were largely attended in both morning and evening. The special programs were exceptionally good and were very much appreciated by all who were present.

Five acres 2 1/2 miles from Klamath Falls; good garden location. Will furnish fencing material to the party who will fence and clear the place for the use of the ground for the present season. Address, P. O. Box 41.

HOW TO WIN BATTLES.

Men Who Hit What They Shoot at Are the Determining Factor in War.

Other things being equal, good shooting is the determining factor in war. Poorly drilled and hastily organized bodies of men can give a good account of themselves if they know how to shoot and hit what they shoot at.

In our war for independence, says Army and Navy Life, the colonists were woodsmen. They carried and used their arms to supply their homes with food and to protect them from the savage. As marksmen they vastly outclassed the British, and that more than anything else gave Washington the final victory.

Again, in our great civil war mark the effect of a general knowledge of firearms. In the south were sporting people. They were fond of riding and hunting. Shooting at target and at game entered into their sports and pastimes. The north was commercial.

Its men knew little or nothing of firearms save the flintlocks of their grandfathers, objects of curiosity in their shops or homes, except in the far west, where the life of 1776 was still being lived. The result was that in the east the southern troops were generally victorious for a couple of years until the northern troops learned to shoot. What little success the north had was in the west, where they were little better than a standoff.

A Case of Bluff.

"Talking about bluffing," said the horseman, "there was a chap who thought blacksmithing looked simple and easy, and so, being out of work, he decided to have a try at it. He went to a smith and asked for a job."

"Well," said the smith, "you are a strong, likely looking young fellow. What experience have you had?"

"Eleven years," was the prompt answer.

"All right. I'll try you," said the blacksmith. "Shoe that mare while I go home to dinner."

"The smith on his return from dinner frowned and said to the new hand:

"What! Haven't you got that mare shod yet?"

"The bluffer bit his lip, flushed and replied:

"I can't get her confounded foot in the vise."—Exchange.

Left to the Jury.

Judge Martin decided that certain evidence was inadmissible. The attorney took strong exception to the ruling and insisted that it was admissible.

"I know, your honor," said he warmly, "that it is proper evidence. Here I have been practicing at the bar for forty years, and now I want to know if I am a fool."

"That," quietly replied the court, "is a question of fact and not of law, so I won't pass any opinion upon it, but will let the jury decide."—Liverpool Mercury.

The Eternal Sea.

Edith is one of the children in a household where Sabbath observances are of the old school type of severity.

"I shall always stay here," she declared at the close of her second day at the beach, "because they don't put the sea away on Sunday."

It is only imperfect that complains of what is imperfect. The more perfect we are the more gentle and quiet we become toward the defects of others.—Fenelon.

DEPARTMENT OF THE INTERIOR, GENERAL LAND OFFICE, Washington, D. C. March 27, 1906. NOTICE OF RESURRECTION OF PUBLIC LANDS TO SETTLEMENT AND ENTRY.—Notice is hereby given that the acting Secretary of the Interior has vacated departmental order of withdrawal in so far as the same affect the withdrawal for irrigation purposes under the act of June 17, 1902 (32 Stat. 388) for use in connection with the Klamath Project, Oregon, of the following described lands in the State of Oregon, and by his authority such of said lands as have not been heretofore finally restored and are not otherwise withdrawn, reserved or appropriated, will be subject to settlement under the public land laws of the United States on and after June 20, 1906, but shall not be subject to entry, filing or selection until July 20, 1906, at the United States land office at Lewiston, Oregon. All such settlement or occupation being forbidden by 34 Stat. 1741, based on 20 Stat. 378, R. 9 E. Oregon. FRANK DENNETT, Commissioner of the General Land Office. FRANK PIERCE, First Assistant Secretary of the Interior.

WOLVES FEAR IRON.

A Piece of the Metal Will Keep the Animals From Any Carcass.

In the early days wolves were comparatively unsuspicious, and it was easy to trap or poison them. Then new knowledge, a better comprehension of the modern dangers, seemed to spread among the wolves. They learned how to detect and defy the traps and poison, and in some way the knowledge was passed from one to another till all wolves were fully possessed of the information. How this is done is not easy to say. It is easier to prove that it is done. Few wolves ever get into a trap, fewer still get into a trap and out again, and thus they learn that a steel trap is a thing to be feared. And yet all wolves have the knowledge, as every trapper knows, and since they could not get it at first hand they must have got it second hand—that is, the information was communicated to them by others of their kind.

It is well known among hunters that a piece of iron is enough to protect any carcass from the wolves. If a deer or antelope has been shot and is to be left out overnight, all that is needed for its protection is an old horseshoe, a spur or even any part of the hunter's dress. No wolf will go near such suspicious looking or human tainted things. They will starve rather than approach the carcass so guarded.

With poison a similar change has come about. Strychnine was considered infallible when first it was introduced. It did vast destruction for a time; then the wolves seemed to discover the danger of that particular smell and would no longer take the poisoned bait, as I know from numberless experiences.

It is thoroughly well known among the cattlemen now that the only chance of poisoning wolves is in the late summer and early autumn, when the young are beginning to run with the mother. She cannot watch over all of them the whole time, and there is a chance of some of them finding the bait and taking it before they have been taught to let that sort of smell thing alone.

The result is that wolves are on the increase. They have been, indeed, since the late eighties. They have returned to many of their old hunting grounds in the cattle countries, and each year they seem to be more numerous and more widely spread, thanks to their mastery of the new problems forced upon them by civilization.—Ernest Thompson Seton in American Magazine.

SELF RELIANCE.

The Lesson That Was Taught to Henry Ward Beecher.

Henry Ward Beecher used to tell this story of the way in which his teacher of mathematics taught him to depend upon himself:

"I was sent to the blackboard and went, uncertain, full of whimpering. 'That lesson must be learned,' said my teacher in a very quiet tone, but with a terrible intensity. All explanations and excuses he trod underfoot with utter scornfulness. 'I want that problem. I don't want any reasons why you haven't it,' he would say. 'I did study two hours.'

"That's nothing to me. I want the lesson. You need not study it at all or you may study it ten hours, just to suit yourself. I want the lesson." "It was tough for a green boy, but it seasoned me. In less than a month I had the most intense sense of intellectual independence and courage to defend my recitations.

"One day his cold calm voice fell upon me in the midst of a demonstration. 'No!'

"I hesitated and then went back to the beginning, and on reaching the same point again 'No!' uttered in a tone of conviction, barred my progress. 'The next! And I sat down in red confusion.

"He, too, was stopped with 'No!' but went right on, flushed, and as he sat down was rewarded with 'Very well!'"

"Why," whimpered I, "I recited it just as he did and you said 'No!'"

"Why didn't you say 'Yes' and stick to it? It is not enough to know your lesson—you must know that you know it. You have learned nothing till you are sure. If all the world says 'No!' your business is to say 'Yes' and prove it."

Riding Backward.

To be comfortable in summer, always ride with your back toward the engine. Your eyes miss all the smoke and cinders. Insist that the porter make your berth with your pillow toward the engine. This will drive your blood to your feet and keep them warm, winter and summer, and your head cool—which is one of the familiar rules of health, handed down from our forefathers. In case of accident you go in headforemost.—New York Press.

Her Method.

Uncle Bob—Yes, my wife altho' blithered in ty'n' a string to her finger to remember things. Uncle Bill—She has one on her finger most of the time, I notice. Uncle Bob—Yes, 'ceptin' when she has somethin' very perticular to remember; then she leaves off the string, an' when it ain't there she remembers why.

He Had Traveled.

"Speaking of the 'Mysteries of Paris,'" said the literary boarder. "The greatest one of them," said the boarder who had been on a "personally conducted," "is the language."—Cincinnati Enquirer.

The poor must be liberally cared for, so that mendacity shall not be tempted into mendacity or want exasperated into crime.—Winthrop.

BLOOD SUBSTITUTE.

Why Saline Solution Is Sometimes Injected into the Veins.

Occasionally in cases of serious wounds where there has been great loss of blood the published reports state that "saline solution" was injected into the veins to supply the deficiency. The average reader, however, has a very vague idea of just how a solution of salt takes the place of blood.

Not to go into a complete analysis of the blood, it is sufficient to note that of 1,000 parts, 780.15 is composed of water, albumen 65 parts, sodium and potassium 8.571, coloring matter (supplied by the red blood corpuscles) 133, leaving only some 12 parts to be composed of fibrin, fat, calcium and magnesium, etc. Where there is serious loss of blood a state of collapse sets in because, the normal weight of blood being reduced, the heart's action is diminished, there being less resistance for that organ to overcome.

To counteract the result of shock and collapse it is necessary to stimulate the heart by restoring the normal weight; in other words, to get it to work by giving it something to work on. As the analysis shows, of 1,000 parts of blood nearly 800 are composed of water and sodium, and therefore a plain saline solution makes a good substitute. The heart does not know the difference, and it goes to pumping away as usual as soon as this imitation blood gets in the veins. The saline solution serves to tide the patient over the danger point. As the food is converted into chyle, new blood is formed, the red corpuscles are supplied rapidly from the normal tissues, and the saline solution is thrown off through the secretions in the usual way.

Formerly transfusion of blood was the means employed, but this always objectionable method has been supplanted. The greatest objection to the transfusion of blood from one person to another was that to supply the necessary amount to restore the wounded patient it was inevitable that the volunteer should be almost as badly drained, so that the physician would have two patients on his hands were he had one. Besides, there was always the risk of transfusing disease to the patient with the other's blood. Dogs and sheep have been sacrificed to surgery for this purpose, but most people prefer to use blood of their own manufacture to any imported from beasts or their fellow creatures.

ITEMS OF INTEREST.

The first of the modern bank notes were made in China about the year 1000 A. D.

Blood in its natural state contains a surprising amount of pure air, amounting to nearly seven-eighths of its entire bulk.

The wasp's nest is constructed of a first class article of papier mache, made from the pulp of wood, with an animal glue specially prepared by the wasps for the purpose.

The honey of the snapdragon cannot be extracted by the common bee, which has not weight enough to pull down the lower jaw of this curious flower. Only the humblebee has access to the interior.

The first trapdoor was made by a species of African spider which has its nest in the ground and closes the entrance by means of a trapdoor opening outwardly and covered with bits of earth and grass in order to escape observation.

Women's Love of Ugly Men.

The illustrious men in history who were distinguished as much for the fascination which they exercised over the fair sex as for their talents and ability were, as a rule, plain and insignificant in appearance. Julius Caesar was a very ill favored man, and yet when a mere stripping, before his fame in Rome, girls of his own age sighed for him and mature women longed for his love. Among the men of later times who were renowned in like manner were Sir Philip Sidney, plain almost to ugliness; Paul Scarron, the comic poet, a cripple; Voltaire, unmistakably ugly, and Rousseau, whose manners were awkward as his face was plain, while John Wilkes, who had the power to subjugate any woman who spoke to him for even five minutes, was admitted by his own showing to be the ugliest man in England in his time.

The Toe Nails.

Owing to the friction and pressure to which toe nails are exposed in all persons who wear boots or shoes there is a great tendency to thickening on the underpart of the free growth, the portion of the nail that extends beyond the toe point. This thickened part sometimes gets pressed against the flesh, and then very painful corns result. The preventive treatment is to keep the nails cut short and to remove the rather soft thickened parts with a blunt pocket knife or scissors blade.

Pleasant.

"Tommy," said the young man to his prospective brother-in-law, aged five, "will you be sorry when I marry your sister?"

"Yes," answered the little fellow; "I'll be sorry for you."

The Difference.

Harry—Do you know the difference between capital and labor? Jack—No. Harry—Well, if I loaned you 25 cents, that would be capital, and if I tried to get it back, that would be labor.

The Drawback.

"So Snooks married his steeple-chaper? Well, she doesn't have to work any more."

"Well, she doesn't draw wages any more."—Cleveland Leader.
