Summons

In the Circuit Court of the State of
 Oregon for Klamath County.
 John Koontz plaintiff, vs. Amanda
 Ella Koontz defendant, suit in equity for
 divorce.
 In the name of the state of Oregon:
 You are hereby required to appear and
 answer the complaint filed against you
 in the above entitled suit on or before
 Saturday, June 13th, 1908, being the
 last day prescribed in the order for pub-
 lication of this summons, the first publi-
 cation of which being on Saturday, May
 2nd, 1908, and if you fail so to answer,
 for want thereof, the plaintiff will apply
 to the court for the relief demanded in
 the complaint, filed herein, to-wit: for
 a decree dissolving the bonds of matri-
 mony existing between plaintiff and de-
 fendant.
 This summons is served by publication in
 the Evening Herald, by order of Hon.
 Henry L. Benson, Judge of the Circuit
 Court for the first judicial district of
 Oregon, dated May 1st, 1908, which or-
 der requires summons to be published
 once a week for six consecutive weeks
 from the 1st day of May, 1908.
 A. L. LEAVITT,
 Attorney for Plaintiff.

DEPARTMENT OF THE INTERIOR, GENERAL

2500 Acres Free
 The Lakeside company has 2500 acres
 of land under the Adams ditch that it
 will give RENT FREE for one year.
 This includes the use of the land and
 water. The renter must clear and
 place the land in cultivation. The renter
 gets all the crops but we reserve the
 right to pasture the stubble.
 The Lakeside Company,
 J. Frank Adams, Manager,
 Merrill Oregon.

Notice

All accounts due me must be settled
 by note or cash within thirty days or
 they will be published and sold at public
 auction to the highest bidder.
 C. D. Willson.

Klamath Falls Pu. Sc. Library
 The Klamath Falls Public Library is
 open every afternoon from 2 to 5:30
 o'clock and each evening from 6:30 to
 10 o'clock. A cordial invitation is ex-
 tended to all.

C. D. Willson is closing out his whole-
 sale stock of liquors cheap as the cheap-
 est.

Merrill. The town without a boom.

FACTS ABOUT KLAMATH PROJECT

The Klamath Project
 The Klamath Project is the name
 that has been applied to the reclama-
 tion of about 100,000 acres of land now
 under the overflow of the Klamath
 River and of Lower Klamath Lake and Tule Lake
 and the irrigation of about 1,000,000 acres of valley
 land adjacent to the Klamath River, along the course
 of Lost River and the tributary portion of the great
 plateau lying chiefly in Klamath County, Oregon, but
 also embracing a part of Siskiyou and Modoc Coun-
 ties, California, a total area of 200,000 acres.

The Project embraces the construction of a very
 great mileage of canals, laterals and drainage canals
 and will have its principal source in Upper Klamath
 Lake. Clear Lake and Horsefly are reservoir sites
 where flood water will be impounded and utilized for
 irrigation of land included in the upper portion of
 the Project.

Work on the main canal was started in the Spring
 of 1906 and the first unit of nine miles is now com-
 pleted. About 13,000 acres of land will be irrigated
 from the first unit, the laterals for which are being
 constructed under the supervision of the engineers
 having charge of the Project. By far the largest
 proportion of the land under the first unit is now in
 sagebrush and must be cleared and broken in time
 for crops in the Spring of 1908. Work on the sec-
 ond unit is being done by the Government and em-
 braces nineteen miles of main canal and twenty-six
 miles of laterals to furnish water to about 20,000
 additional acres of land. Work on this unit will be
 prosecuted as rapidly as possible.

Nearly one-half of the area to be irrigated is now
 under water to a depth of from one to fifteen feet
 and will be reclaimed by a system of drainage to
 lower the level of the rivers and lakes. A large part
 of the swamp land and practically all of the valley
 land in the Klamath Basin are held in private own-
 ership and some in very large tracts which must be
 sold in tracts of 160 acres or less under the regula-
 tions governing the perfection of a water-right.

KLAMATH'S GREATEST NEED
 For its development and prosper-
 ity the Klamath Basin must have
 people, and the right kind of people
 at that. Its great need is intelli-
 gent, practical farmers, who understand the meaning
 of intensified and diversified farming; men who will
 buy land, not for speculative purposes, but with the
 idea of clearing off the sagebrush and making per-
 manent and comfortable homes. Such men are bound
 to succeed. There is room for thousands of them.

Developing Various Industries
 Sugar beets have been grown ex-
 perimentally throughout the Klamath
 Valley. The percentage of sugar
 is high, as will be noted from the
 following analysis made by the United States De-
 partment of Agriculture from beets grown near
 sugar in beets, per cent., 21.7; sugar in juice, per
 cent., 24.1; coefficient of purity, 83.1.

Experience has demonstrated that excellent as-
 paragus, onions and celery can be grown, the tulle
 lands being very similar to those of the Sacramento
 and San Joaquin Valleys of California, where such
 vegetables are so successfully cultivated. Through-
 out the world the reclaimed marshlands are the best
 suited for the highest development of dairy inter-
 ests.

There is no question that this will become a sugar
 beet producing section and that a number of facto-
 ries will be built and operated with the development
 of the industry.

All kinds of fruit adapted to the temperate zone
 thrive here—apples, peaches, pears, cherries, prunes,
 plums, apricots and nectarines do well, and small
 fruits bear abundantly and of excellent quality.
 There are a great many small orchards throughout
 the basin that prove the adaptability of the region to
 the profitable production of fruit.

E. L. Smith, former president of the Oregon State
 Board of Horticulture, gives it as his opinion that
 the foothill lands are specially adapted to apple
 growing.

Cultivation of the potato has passed beyond the
 experimental stage, the sandy loam of the uplands
 producing them in great abundance.

Klamath County wheat, grown without irrigation,
 took the premium at the New Orleans Exposition.
 The most important forage crop is alfalfa, the soil
 being peculiarly adapted to its growth.

Excess Holdings Must Be Sold
 All landowners being required
 to sell their excess holdings, there
 is a large area of good land for sale
 at reasonable figures, prices rang-
 ing from about \$15 to \$35 for unimproved, and \$20
 to \$50 per acre for improved land. Land adjacent
 to the principal towns commands higher prices. The
 purchaser pays for the water right at a cost of about
 \$18 per acre to be paid for in ten equal annual in-
 stallments without interest. This amounts to less
 than the ordinary annual rental paid private ditch
 companies. Some of the irrigators of Klamath Val-
 ley (and they are the most prosperous farmers) have
 already paid out to such companies for water \$60 per
 acre and own no water. All of these companies have
 been purchased by the Government and included in
 the system.

No public lands will be open for settlement for
 several years.
Climate The upland soil is mainly a rich sandy
 and loam of great uniformity and composed
 largely of disintegrated and eroded lava,
 with an admixture of volcanic ash and
 diatomaceous earth, the latter material of plant ori-
 gin, formed in the bottom of the ancient sea which
 covered the greater part of the Great Basin, and of
 which Klamath Valley is a northwesterly extension.
 Such soil, characteristic of many of the richest agri-
 cultural sections of the world, including much of
 Italy and the great plains of India, is extremely fer-
 tile, and of lasting productiveness. The lake and
 tule lands are made up of a volcanic soil containing
 much organic matter, a vegetable accumulation of
 ages, and is of a peaty nature.

The climate is extremely healthful and not severe.
 There is rarely any Winter weather before the latter
 part of December, and but little zero weather during
 the entire Winter. The annual precipitation is about
 fifteen inches, with little rain during the Summer
 months.

BUY According to Season

Groceries, the same as wearing apparel, should
 be bought according to seasons. You make

MILLS ADDITION LOTS
are Advancing in Value
 When blocks in Mills Addition were offered
 at bargain prices a number of shrewd invest-
 ors bought; since that time values have
 increased materially.
These Lots are Bargain Buys
 at present prices, and there is every reason
 to anticipate an advance in prices. Remem-
 ber these lots are FIFTY feet in width and
ONE HUNDRED AND TWENTY FEET
 deep—more than double the area of most
 town lots offered to investors.
