## FACTS ABOUT KLAMATH PROJECT

The The Klamath Project in the name Klamath that has been applied to the reciama－
Project
tion of about 100000 neres of land now under the overfiow of the Klamath
und and fiver and of Lower Klamath Lake and Tule Lake and the irrigation of about 1 No．，．000 andere of valley hand adjanent to the Klamath River，along the course of Lost River and the tributary portion of the great
plateau lyink chiefly in Klamath County Oregon，but pinteau lying ehiefly in Klamath County，Oregon，but ties，California，a total area of 200,000 acres．
The Project embracea the conntruetion of a very grent mileage of eanalis，interals and druinage amanala
nid will have its principal mource in Upper Klamath anke．Clear Lake and Hornefly are renervoir sitee where flood water will be impounded and utilized for irrigation of land ineluded in the apper portion of
the Project．
Work on the main cunal was started in the Spring fleted．About 13,000 acres of land will be irrigated． from the first unit，the laterals for which are being constructed under the supervision of the engineera having elarge of the Project．By far the largest proportion of the land under the first unit is now in for eropus in the Spring of 1908．Work on the sec－ nnd unit in being done by the Government and em． braces nineteen miles of main eanal and twenty－nix
miles of laterais to furninh water to mbout 20.000 miles of laterals to furning water to about 20.000
idditional aeres of land．Work on this unit will be arsusecuted as rapidly as possible．
Nearly one half of the area to be irrigated in now nuder water to a depth of from one to fifteen feet
and will be reechaimed by a nyatem of drainage to lower the level of the rivers and lakes．A large part of the $\boldsymbol{n w a m p}$ land and practically ail of the valley
and in the Klamath Basin are held in private own． and in the Kiamath Basin are held in private own．
erahip and nome in very large tracta which muat bo old in tracts of 160 neres or less under the reguia． tions governing the perfection of a water－right．
KLAMATH＇s
GREATEBT por ita development and proe－ NEED $\begin{aligned} & \text { perity the ond the right kind of people } \\ & \text { peop }\end{aligned}$ at that．Ite great need is intelis． gent，practical farmers，who underatand the meaning
of intensified and diveruined farming；men who will buy land，not for apeculative purposes，but with the idea of clearing off the uagebruat and making per． manent and oemfortable homes．Such men aro bound to succoed．There is room for thousands of them．
 Various
Industries $\begin{aligned} & \text { perimentanily throughout the kiam－} \\ & \text { nth Valley．The }\end{aligned}$ Oollowing analysiis made by the United Statea De． partment of Agriculture from beets grown near sugar in beets，per cent， 2.17 ；sugar in juice，per ent．24．1；coeflicient of purity， 83.1 ．
Experienee has demonstrated that excellent as－ paragus，onions and celery can be grown，the tule lands being very simimiar to thone of the Socramento and San Joaquin Vanleys of California，where such
vegetablen are so suceensfully cultivated．Through－ vegetables are so suceessfully cultivated．Through－
out the world the reelaimed marshlands are the best out the worid the reciaimed marsinand of are the beter
suited for the highent development of dairy inter－
ests．
There is no question that this will become a sugar beet producing section and that a number of facto－ of the induatry．
All kinds of fruit adapted to the temperate zone thrive here－nples，peaches，pears，cherries，prunes，
plums，apricots and neetarines do well，and nmail fruits，benr abundantly and of excellent quality． There are a great many small orchards throughout The basin that prove the adaptability of the region the profitable production of fruic
E．L．Smith，former president of the Oregon State Board of Hortieulture，gives it as his opinion that
the foothill lands are specially adapted to apple the footh
growing．

Cultivation of the potato hass passed beyond the experimental stage，the sandy loam
producing them in great abundance．

Klamath County wheat，grown without irrigation， took the premium at the New Orleana Exposition． The mont mimportant forage crop is alfalfa，the soil
Sxoesa All landowners being required Eoldings Mut to nell their exceesa holdings，there Bo Sold is a arge arcea of good land for sale ing from about $\$ 15$ to $\$ 35$ for unimproved，and $\$ 20$ to $\alpha 50$ per acre zor improved land．Land adjacent to the prineipal towns eommanda himber prices．The purchaner paya for the water right at a cost of about $\$ 18$ per aere to be paid for in ten equal annual in． stallmenta withont interest．This amounts to less companieg．Some of the irrigators of Klamath Val－ ley（and they are the most prosperous farmera）have already paid out to such companies for water 460 per acre and rwn no water．All of thene companies have the ayatem．
No publio lande will be open for settlement for ecveral yoara．The upland eoil io mainly a rieh eandy and loam of great uniformity and composed largely of diaintegrated and eroded hava
with an admixture of voleanic ash and diatomaceouenearth，the latter material of plant ori－ in，zormect reater part of the Great Basin，and of which Klamath Valley is a northwesterly extension． Such moil，oharrateriatio of many of the richest agri． cultural geotions of the world，including much of
Italy and the great plains of India，in extremely fer． Italy and the great plaium of India，in extremely fer． tile，and landa are mado up of a voleanio noil gontaining mueh organio matter，a vegetable aceumulation of ages，and lin of a pentty nature．
The olimate io extremely healthful and not severe． There ia rarely bay Wipter weather before the latter part of December，and but little eero weather during fiteen inches，with little rain during the Summer montha．

## BUY According to Season

Groceries，the same as wearing apparel，should be bought according to seasons．You make no mistake when you leave it to us to decide which is the best at this time．We always guarantee satisfaction．Just call up phone 516
