PERSONAL MENTION

Merrill. A natural tradecenter.

Abner Weed arrived in the city last night from Dunsmuir.

For the best rig in town call at the Mammoth Stables. H. W. Straw, Proprietor.

Mrs. G. H. Woodbury has returned from Portland where she has been for several month.

Merrill. Investment not Speculation.

Tom Newton left for San Francisco this morning where he will attend to business matters for a few days.

New rings at Winters.

The Eugene Hopkins case was continued until 10 o'clock tomorrow morning in order to get a jury for the case.

Merrill. Property is reasonable.

Mr. and Mrs. E. Tubbs have returned to their home at Yreka after spending a few days in the city the guests of Mrs. F. E. Boyd.

The ice cream season has begun and our parlors are open.—Manning's.

Mrs. F. P. Cronemiller and children leave tomorrow for their new home at Lakeview. They will go with J. Q. Willits.

Have you seen the new line of Jewelry at Winters?

C. C. Chitwood is in the city from his Swan Lake ranch. He says crops of all kinds are doing well and indications are good for an average yield.

The Stilts Dry Goods Co. has received several shipments of Eastern dress goods. Call and inspect the new line.

Arrangements are being made to start up the merry-go-round that has been in storage in this city during the past Winter.

You can get a 21 meal book at Willson's hotel for $4. Board and lodging $5 a week.—C. D. Willson, Prop. tf

K. Sugarman has gone to Weed to meet Mrs. Sugarman and the children who are returning from an extended visit at Portland.

Ice cream at Manning's.

Everything the latest in Summer millinery will be found at the Stilts Dry Goods Co.

W. C. Davenport has moved his family into the residence he recently purchased on the corner of 3rd and Lincoln streets.

Merrill Valley the heart of Klamath.

H. T. Anderson, wife and daughter are in the city from Merrill. The son of Mr. and Mrs. Anderson died a few days ago, aged about 14 years.

Jack Evans was arraigned before Justice of the Peace A. D. Miller this morning, but as no prosecuting witnesses were present the case was postponed.

Workmen are now engaged on Anna River, at the head of Summer Lake, building two dams across that stream to raise the water for irrigation purposes. Silver Lake Oregonian.

MONEY TO LOAN—Hard times but I have some money to loan if you have the security.—E. B. Hall.

Many loads of lumber have passed through Silver Lake of late, going from the Embody sawmill to the "desert" country to be used by the homesteaders in the construction of houses, barns, etc. The sawmill is taxed to its full capacity to supply the demand.—Silver Lake Oregonian.

Furs Wanted

C. D. Willson is in the market for all kinds of furs, for which he will pay the highest market price. Address him at Klamath Falls, Oregon.

He Asked For Stale Bread.

The sympathetic young woman was telling the story. "I went into a bakery to buy some supplies, and as I was waiting for the girl behind the counter to do them up the door opened, letting in a man, unshaved, unwashed, unkempt, with a thin coat buttoned tightly around his neck.

"'Got any stale bread?' he asked the clerk diffidently.

"'No. We keep only fresh bread here,' the lady replied haughtily.

"The man turned around with a weary droop to his shoulders and passed out into the night. All my Samaritan impulses welled up. I gave the haughty clerk a reproachful look and hurried after him. He had stopped in the middle of the next block and was looking around uncertainly.

"I ran up breathlessly and, holding out my last dime to him, panted out:

"'Are you so hungry? Here, please take this.'

"The man stared and then slowly grinned as he replied:

"'Why—why, no, miss, I ain't hungry, but I've got some chickens I want to feed!'"—New York Press.

Selections

MONSTER AIRSHIPS.

Enormous Ones to Be Built by the French Government.

The French war department is actively pushing the construction of the new dirigible La Republique and is expecting to have this new aerial warship ready in May. The 1908 budget includes the construction of two dirigibles of like size, and when these are completed the government will undertake to build several larger airships of twice the size. The plans for the first of these have been drawn up recently by the Lebaudy brothers and submitted to the war department. The length of these new airships will be 100 meters (328 feet), the greatest diameter 11½ meters (37¾ feet) and the capacity between 7,000 and 8,000 cubic meters (247,198 and 282,542 cubic feet). The horsepower will be 240 and will consist of two 120 horsepower four cylinder Panhard engines driving two separate propeller shafts extending the entire length of the body and carrying a propeller at each end. Thus there will be four propellers, two (one at the front and one at the rear) being operated by each motor. In case of a breakdown of either of the engines the other is sufficiently powerful to drive the airship to its destination.

There are also to be two lifting propellers mounted on vertical shafts for the purpose of obtaining stability under the most adverse conditions. The envelope will be constructed of waterproof fabric supported upon a rigid frame in a similar manner to that of the Zeppelin airship, while the ballonnette to allow for expansion and contraction will also be retained.

Following out the plan of the Italians Crocco and Ricaldoni to use their hydroplane gliding boat with aerial propellers as the body part of a new Italian dirigible which is being constructed, it is proposed to use the motor boat Panhard Tellier, which has its engines already installed, as the body part of the new French dirigible. It is expected to obtain a speed of sixty kilometers (37.28 miles) an hour. The lifting power of the new airship will be in the neighborhood of eight tons.—Scientific American.

The Steamship to Be Built.

No man can at this moment say when the limit of size will be reached in the building of ocean liners. Extremely big and swift ships cannot be developed much beyond the present dimensions and speed unless their owners are willing to run them at a loss for the sake of advertising their lines or unless they are made commercially profitable through government subsidies. But ships of extreme size and moderate speed are possible of construction and even of profitable operation to an extent which would dwarf anything now upon the seas. The ocean greyhound 800 feet long is a terrific consumer of fuel. The mammoth of 1,000 feet sauntering across the Atlantic in eight days uses only a moderate amount by comparison. As the coal question is the chief restriction upon size we may as well sit back and watch the builders juggle with it until the day arrives when it shall be absolutely prohibitive upon further rivalry. And by that time maybe we shall have found some cheaper fuel that will help us to build a ship whose bow will be able to touch Sandy Hook before the stern has quite passed the signal station at Nantucket.—Brooklyn Eagle.

An Owl With a Lantern.

North Norfolk, England, is the habitat of a curious species of owl that carries a lantern about at night, according to correspondents of the London Times who have been observing the bird. T. Digby Pigott, for instance, writes that a pair of birds carrying a yellowish light so bright that when first seen it was mistaken for a bicycle lamp by two different men at different places have been flying about the fields. A bailiff who had been watching one of the birds assured Mr. Pigott that after moving about a wheat stack for some time on a very dark night the bird flew across the field and alighted on a tree, and the light it gave out was so strong that the bailiff could distinctly see the outlines of the branches about the bird. Strange as the story is, it seems to be believed by persons who are not easily deceived.

Parachute Thrillers.

Among the latest "thrillers" is the triple parachute leap, in which one aeronaut uses three different parachutes before reaching earth. He leaves the balloon in his downward flight with a red parachute, but after falling a short distance liberates it and makes a second plunge through space with a white parachute. This feat is repeated again after another drop, and he finally lands with a blue parachute.

Another "thriller" is a double parachute leap from the same balloon, in which a man and woman race to earth in parachutes which fall 500 or 600 feet before opening out.—Popular Mechanics.

Marie Antoinette's Guillotine.

The question is being mooted as to which was the first guillotine. On this point a sixteenth century machine with a silex blade, invented by one Jacques Callot, has been found to decapitate sheep in the most admirable manner. Which machine of the type invented by Guillotin was first put to its dread use is not known, but that used for the execution of Marie Antoinette still exists in Berlin.—London Globe.

SPECIAL SALE

RED STAR ROSE CREAM

Here is your chance to treat yourself to a Summer's supply of the daintiest and best eradicator of tans, sunburn and all harmful effects of a hot summer sun on your skin RED STAR ROSE CREAM has gained an enviable name with all who value a cooling emollient cream for the face. . . . . .
