THIRD YEAR, NO. 695.

KLAMATH FALLS, OREGON, FRIDAY, OCTOBER 30, 1908.

PRICE, 5 CENTS

THREE HUNDRED MEN IN TEN DAYS

WILL STAND THE CLIMATE

Mr. Shortt Says the Ready-Made House Will Fill All Requirements.

October 31, 1908.

Dear Sir: Referring to the article in your paper, Wednesday, in which reference is made that some persons seem to think the Ready-Made houses will not be suitable, or adapted to this climate.

If the persons who have doubts on that point will call at the office, on Main street, or at Mr. Goeller's office, Klamath Falls Planning Mills, and see the samples of just how the walls are made with the quarter inch thick, air insulator equal to 27 sheets of building paper which is put between the double panels throughout the entire building, they will have no further doubts that this style building will not be warm and comfortable, in this climate, the coldest days you may have.

Will say further, that this same style building has been manufactured in Seattle, Wash., the past five years, and has been shipped and in use in different parts of Alaska, also to South Africa, and in School houses in New York state, and they give general satisfaction wherever used, as per copies of letters which you are at liberty to publish herewith.

All fair minded persons, who have seen the samples, have no doubts but that the houses will be all that we represent them to be, as evidenced by orders being placed. We are now estimating the price for thirty of these houses for one party.

The advance orders and the encouragement received from people who have looked into the real merits of the proposition, would indicate that this industry will have to employ one hundred hands, or more, within a year.

Yours truly,
E. T. SHORTT

Endorsements of the Ready-Made house:

Law offices Frank H. Guffey, Pittsburg Pa.

American Portable House Co., Seattle, Washington.

Gentlemen—I can heartily recommend your portable houses to any one desiring a comfortable, easily erected building, which will give good satisfaction, if desired for a permanent location, and at the same time can be easily moved.

More than two years ago I purchased one of your portable houses, to be used by a relative of mine in Alaska. The building has proved ab-

solutely waterproof during the violent rains of the open season. And my cousin has lived in it warm and comfortable through two rigorous Arctic winters.

Very respectfully,
(Signed) Frank H. Guffey

American Portable House Co., Seattle, Washington.

Gentlemen: Referring to the portable school houses erected by you for this district, I beg to state that they have proved entirely satisfactory, being comfortable in winter, plenty of light and good ventilation, and if we find it necessary to increase our room, the board will purchase more buildings.

Very truly yours,
(Signed) Chas. K. Greene, Secretary

Board of Education, Everett, Wash. Seattle Schools, Board of Education, Lyman Banks, secretary.

Seattle School district No. 1. I had fourteen of your portable school buildings in use during the last school year. They have proved a good investment, enabling us to take care of a rapidly increasing population, and they are well ventilated and easily warmed. In short, they have been thoroughly satisfactory.

(Signed) Lyman Banks, Sec'y

Mrs. M. J. Jones, who has one of the portable store buildings in Nome, Alaska, writes: Have been indeed very comfortable in my little home, and kept all my vegetables from freezing on the upper floor, with only the stove pipe going through the floor.

American Portable House Co.,

Gentlemen: I wish to thank you in behalf of St. Johns Church, West Seattle, for the conscientious work that you put into the church building you erected for them, and which was opened for services Easter Sunday. Not an adverse criticism from any one of the congregation, in fact all were pleased and agreeably surprised at the neat, attractive and substantial building you have erected.

Yours sincerely,
(Signed) Rev. Harry Hudson, St. Johns Church.

ELECTION RETURNS NEXT TUESDAY NIGHT.

The election returns will be thrown on the screen in the Opera House Election night by special arrangement with the Postal Telegraph Company and the Midway Telephone Company Admission 41. Tickets on sale at the Klamath Bakery.

Special—50c and 75c Neckwear at 25c for Saturday night only. Taft and Bryan campaign ties included. The Portland Store. 29-31

We can show you a nice line of Heating Stoves. Virgil & Son. 26

TO WORK ON GRADE

Railroad Contractors Will Soon Be on the Ground.

Grade to the Channel Will Be Completed Within a Week, When the Large Force of Laborers Will Be Transferred to This City.

In ten day more will be heard the ring of the pick and shovel reverberating from the right of way of the California Northern in this city. Three hundred men will be at work preparing the grade from the terminus of the Adams dike to the cut in the Hot Springs addition and this number will be increased as rapidly as possible, until upwards of five hundred laborers will be at work. This is the message that comes to this city today from the offices of Erickson & Peterson, the contractors who are now engaged in completing the grade to the water's edge. The grade to Worden is completed, ready for the rails, and the steel gang will begin laying them Monday. From Worden to the channel, a distance of two miles, the grade is completed, with the exception of the finishing work, which is now under way and which will be done in a week. When this part of the grade is ready for

the rails the men will be transferred to this city.

The big steam shovel which has been employed by Erickson & Peterson on most of their contract is now at Tevora Landing and will be at once through to this city. It will be first employed on the cut near the old race track. When this work is completed it will be transferred to the big cut north of the Hot Springs addition, where over 100,000 yards of earth have to be moved.

Contractor Sears was in the city yesterday and stated that he was making rapid progress with his contract, the work moving much faster than he expected. He stated in effect that the present program was to begin work in this city within ten days and that the force of men to be employed here this winter would not be less than three hundred and probably would reach five hundred. "As I understand it," he said, "the orders are to rush things, and judging from the preparations being made everything will hum until the railroad is in operation to this city."

R. J. MARTIN HERE.

R. J. Martin, of Kansas City, Mo., president of the company now promoting the sale of the Oregon Military Road Grant lands, arrived here last evening from Lakeview, where he had been on business connected with his company. He will remain here a day or two, when he will return east. When asked whether the people who are purchasing contracts from his company would come to Lakeview via Klamath Falls he said:

"I cannot say at this time whether they will or not. That is a matter that has not yet been taken into consideration by our company. However, if we find that our people can come this way with greater comfort and easier than by some other route, then we will assuredly have them come this way."

"We are meeting with remarkable success in disposing of our lands and have no doubt but that every contract will be sold before the date of the drawing arrives. We firmly believe that this is the greatest effort that has ever been made to settle up Southern Oregon, and naturally we feel that we ought to have a cordial cooperation of every resident of this section. It will mean more to them than it does to us, for we bring in here a class of people who are well equipped to make desirable citizens."

ANOTHER BANK.

Klamath Falls is to have another bank—The First Trust and Savings Bank. When the Klamath County Bank removes to its new location in the Withrow-Melchase block, the First Trust and Savings Bank will occupy the building vacated by Klamath County's oldest financial institution. Heretofore the First Trust has confined itself to savings accounts, but when it removes to its new home it will do a regular banking business. The popularity of its cashier will insure it a fair share of the banking business of the county, and will, in addition, command practically all of the business of the west end of the city.

ATTENTION ODDFELLOWS.

Business of importance to the order requires the attendance of all members Saturday night at the A. O. U. W. Hall.

O. A. STEARNS, Sec'y.

MOVING THE CITY JAIL.

Once more the poor, miserable looking shack, commonly called the city jail, is on the move. Not long ago it was removed from its original location on Third street to the lot at the corner of Third and Klamath avenue. Recently this property was purchased by J. L. Fielder, and he realizing that the building did not enhance the value of his property any, informed the city that in future, if it wanted the building to remain on his property, he would have to be paid \$12 a month. The present condition of the city's finances would not warrant such a drain on the treasury and steps were immediately taken to find a new location. With unexpected eloquence Mayor Stilts prevailed upon the county court to permit the city to occupy a portion of the court house square, and accordingly the O. K. Transfer people began this morning the removal of the building to its new location—the corner opposite where it rested for so brief a time.

HAZEL HEADS FOR OREGON RELATIVES.

Sheriff Howard and posse have returned to Yreka from a fruitless day's search for Denny Hazel, the convicted murderer, who escaped from the county jail Monday night. They determined the general direction the fugitive took, for they followed his tracks north through the Evergreen Cemetery, over the mountain, down to Hamburg Creek and on toward Klamath River.

Not a single person was found who had seen Hazel at any time. Unless he has managed in some way to get a hat and a coat, he would be recognized by anybody.

Sheriff Howard is quite certain that Hazel is working his way toward the Blue Ledge copper mines on the Oregon line and that he will sooner or later show up at Eugene, Ore., where reside friends who came to his assistance at the time of his trial for murder.

An accurate description of the fugitive has been telegraphed or telephoned in every direction. The Klamath River will be carefully guarded, it being assumed possible that Hazel will try to work down that stream to the coast.

There will be no let-up in the chase Sheriff Howard resumed the pursuit the next morning, going north to take up the trail where it was abandoned

when darkness made further trailing impossible.

Following is a description of the fugitive:

Height 5 feet 6 1/2 or 7 inches; weight 135 or 140 pounds; very bald headed, almost down to the ears; very dark brown, heavy beard of three weeks' growth; mustache much longer than beard; complexion white as writing paper; aged over 40; English by birth and gives foreign accent to some words, very slow talker.

BOWEN FUNERAL WILL BE HELD TOMORROW.

Undertaker Whitlock received a telegram from the daughter of R. S. Bowen instructing him to bury the remains in this city for the present. In accordance therewith Mr. Whitlock has arranged for the holding of the funeral services in the chapel of his undertaking parlors at 11 o'clock tomorrow morning. Rev. Pratt will conduct the services. Interment will be in the city cemetery.

A postmortem examination was held this afternoon by Dr. Hamilton. He found that death was due to fat lodging in two of the valves leading from the heart. In view of this fact a coroner's inquest will not be held.

As far as could be ascertained the deceased carried no life insurance and did not belong to any of the fraternal organizations.

HIGH SCHOOL NOTES.

Rev. Pratt addressed us in chapel this morning. He spoke to us on our purpose in life. He said that we should all have a purpose in life and in order to fulfill it we should have the right environments. His talk was applauded most vigorously. We all enjoy Mr. Pratt's talks, and we sincerely hope that he will address us often in the future.

The boys will commence basket ball practice this evening and will soon be ready for out side games.

REMODELING THE FRONT.

Carpenters and bricklayers were busy today remodeling the front of the Withrow-Melchase building, or that portion of it that is to be occupied by the Klamath County Bank. The corner entrance is to be closed and a door is to be opened facing on Main street. It is expected that the bank will open for business in its new location about the first of the year.

NOTICE.

November 5, 1908. There are funds in the City Treasury for the redemption of all Warrants protested prior to and including Sept. 6, 1905. Interest on same will cease from above date.

J. W. SIEMENS, City Treasurer.

CANALS ARE ALL RIGHT.

Col. Allison, a Man of Wide Experience, Passes Judgment on Big Canal.

"The main canal of the Klamath Reclamation Project is the best irrigation canal I ever saw, and for twenty years I have been interested in irrigation enterprises and engaged in constructing canals and having them built. I can say the same thing concerning the laterals and distributing canals that have come under my observation in the valley south and southeast of Klamath Falls, and the representatives of the Government may well be proud of the results they have secured in this project up to the present time."

The above expression came from Col. M. L. Allison, of Portland, who has so successfully brought excursion parties of homeseekers to Klamath County this year, and has been enjoying an outing on the Upper Lake for several days with B. St. George Bishop, at the pleasant home of the latter near Pelican Bay Lodge. Col. Allison came to Oregon from Northwestern Colorado where he was manager of the Routt County Development Company, which has brought a large acreage of land in that section under irrigation. Previous to that he was for many years in the Grand and Uncompagha valley, and was a pioneer in canal construction in the Grand valley. With associates he was interested in the first headgate built to take water from the Grand River in the vicinity of Grand Junction, and carried the chain in plating the townsite of Grand Junction, the principal town of the Grand valley in Western Colorado. Therefore the opinion of Mr. Allison is worthy of consideration. Continuing he said:

"Lack of transportation facilities has been the only thing that has retarded development of the agricultural lands of this basin. Happily, that is now past and scores of families of the right sort of people will be located on farms in this valley and the contiguous irrigated valleys of the Klamath Project within the next six months and in ample time to cultivate the land next year. I came in for my first trip through the irrigated district last year when we were obliged to make the journey by way of Pokeyama, and realized the utter impossibility of this section attracting farmers of the right class in any great numbers until that condition could be overcome.
