BANISHED THE BORE.

A Remedy That Dampened His Ardor For Sitting.

The head of a bureau in an important government department has long been afflicted with a friend who calls upon him regularly and sits down and sits and sits and goes on sitting till assault and battery becomes a virtue. The other day this sedentary bore was in the full exercise of his functions when suddenly the official, who had been scrutinizing him closely, cried: "I knew it! I was sure of it! Confound those office boys, with their tricks on strangers! They've been putting glue on your chair again. Hi, Jimmie, bring a sponge and a pail of water!" And, pressing with all his weight on the shoulders of his victim to keep him down, he continued: "Don't stir, you'd tear the cloth sure. Nothing to half as adhesive as glue on a cane seat chair. Here, Jimmie, moisten this gentleman so that we can get him loose. Don't spare the water; the cloth won't shrink or fade." The faithful messenger obeyed, and when the operation is concluded the official conducts the victim to the door and bids him farewell with the remark: "Perhaps you want to try home and change your chairing, so I won't keep you. Goodby, bless you! If your trousers are spoiled, let me know, and I'll stop the price of them out of the pay of the infernal scoundrel if I can find out who he was, and to that task I will devote all the energies of my lifetime and the whole machinery of the government. Goodby! The scoundrel! I thought for several days past that there was something wrong." His friend goes like the visions of youth, never to return.—Argonaut.

COIN SWEATING.

An Illegal Practice Which Has Fallen Into Disuse.

Closely allied to the making of counterfeit coins and usually combined with that nefarious trade is what is known as "sweating," which requires considerable skill to accomplish successfully. A rubber mold is used, into which a gold coin to be sweated is introduced and held with a clip.

Copper wires having been adjusted, the coin is immersed in a bath of cyanide of potassium and an electric battery set going. The action of the electricity upon the coin in the acid uniformly sweats the metal—that is to say, causes so much of it to become detached. This process is gone through with a large number of coins, and the gold deposit thus obtained is extracted from the acid.

It is for the purpose of detecting the existence of such reduced coins that bankers weigh gold coins in a balance, and if one is in the scale it will immediately be shown by the indicator. The light coin is then taken out, and whatever the shortage represents that amount the customer will have to make up or be fined.

But, all things considered, sweating is but a poor business, says H. L. Adams in his interesting book, "The Story of Crime," and evidently it is thought so by the criminal fraternity, for it has declined to a mere nothing. A sovereign weighs 123.27447 grains, and the limit of error in the weight is 2 of a grain, from which it may readily be gathered that sweating cannot now be a very lucrative business.—London Tit-Bits.

Feminine Inconsistency.

A clubwoman, writing in the Philadelphia Record, reveals a feminine inconsistency in the peculiar views held by some women about the use of their first names. She says:

"A couple of years ago I had occasion to send a letter to a married woman, and in addressing her I wrote 'Mrs. Healy.' Imagine my surprise when in reply I received an indignant letter from her, in which she said: 'I do not at all like to have my identity submerged in that of my husband. I do not see why I cannot be addressed by my own name. Because I am married is that any reason why I should lose my individuality? My name is Anna.' The next letter I wrote to the indignant wife you can be sure it bore the first name of the woman in question, but the climax came recently, when the husband died and my fastidious friend was left a widow. I wrote her on club business, and, bearing in mind her first wedding, took particular pains to address her as 'Mrs. Anna.' The answer to this from her makes me shiver to think about. 'Do you think I have so far forgotten my beloved Henry?' she said, 'as to be willing to abandon his name altogether? I wish you would address me as Mrs. Henry in the future, please. I may be an unfortunate widow, but I still bear my husband's name. I think!'"

Sometimes, We're.

A young lady was recently visiting an editorial office and being shown around by the editor. Approaching a case of drawers upon one of which was the label "MRS.," she said, "Now, how would you pronounce that?" "Oh," said the editor, "sometimes we pronounce it muss and sometimes mess."—Lippincott's Magazine.

A Contradiction.

"That young doctor is a queer contradiction." "In what way?" "He has an exceedingly good temper, and yet he is lacking in patients."—Baltimore American.
