

MIDLAND WITH RAILS MONDAY

ENGINES AND CREWS ARE HAULING AND LAYING TRACK.

Between Midland and Klamath Falls has been leveled and is now ready for ties, and work has been progressing smoothly.

An announcement was made by engineers that the track of the California-Northwestern railroad will be completed to Midland on Monday. Two engines and two crews are at work laying track across the marsh, and the work was completed today between Ady and Midland.

One day has been lost since laying commenced, or otherwise Midland would have been reached coming Sunday. The grade on the yards in this city and has been leveled and is now ready for the ties, with the exception of a small fill at the Williams where a culvert is to be put in.

Oregon Woman to Be Deported

BRIDGEFIELD, April 15.—The capture of paper pulp from the bark of the fir tree and waste products of sawmills will be attempted on Monday. Spruce is chiefly used in making paper pulp, but a new chemical discovery will be employed in the possible use of fir. The chemical discovery was made by George B. Frankforter, a professor in the University of Minnesota. The experiment will be back to C. A. Smith of Minneapolis. Frankforter is expected in Mars on about a month, when an experimental plant will be established. The invention is a process of distillation by means of chemicals which removes from the fir wood properties which now make it suitable for wood pulp. There will be a number of by-products among them alcohol, turpentine and rosin. From this rosin rubber can be made. The newly discovered process is the whole of a fir tree cut for lumber can be utilized. By-products will also be a source of big revenue.

Mr. B. St. Geo. Bishop and two children left this morning for Globe, Arizona, for an extended visit with her mother. Mrs. Bishop will stop for a few days at Los Angeles.

Upper Country In Good Shape

Land Selling From Eight To Twenty Dollars An Acre—Many New Settlers Are Taking Advantage of Prevailing Low Prices.

Editor S. C. Graves of the Bonanza Bulletin is in the city today. Mr. Graves states that times are lively in the upper country since the Reclamation Service started work on the Clear Lake dam. Property is beginning to change hands and the country is obtaining quite a number of new settlers.

It has often been remarked that a man cannot live very long in Bonanza without becoming a booster. Mr. Graves cannot be blamed for thinking that the upper country is the only section of the county in which to live. He says that they have the best bargains in land of any part of Oregon. Farm lands are now selling from \$8 to \$20 an acre. Good land can be bought for \$3 or \$10, which, as soon as the irrigation canal is completed, will be worth \$50 an acre. The ranchers now are making good money on dry land, and it has been proved that the soil will average as good as any in the county. Outside parties, who are wise enough to recognize the future value of the land, are coming in and taking advantage of the present low prices.

A. F. & A. M.

There will be a special communication of the Masonic Lodge tonight, conferring second degree.

GEO. L. HUMPHREY, W. M. D. B. GATES, Secretary.

Ninety-one hunters' licenses have been issued by the county clerk to date this year. This is considered a large number, inasmuch as there is usually very little hunting at this time of the year. It is only an indication, however, of what the hunting license business will be this fall.

Have you visited the WOMAN'S EXCHANGE? They carry handsome, home-made underwear, neckwear, aprons, handkerchiefs, hand painted accessories—the newest thing out for trimmings—and all kinds of fancy work suitable for prizes and birthdays. Stamping done. Home baking every Wednesday and Saturday.

All kinds of sewing machines for sale or rent at Singer Agency. Phone 254.

BEGIN MAKING BRICK MONDAY

CHILDERS BROS. WILL START A KILN ON UPPER LAKE YARDS.

Are Over Two Months Earlier Than Usual—Expect Big Demand For Their Product For Building Purposes Hereabouts This Year.

Childers Bros. will start a kiln of brick at their yard near the upper lake on Monday. As soon as this is burned they will start another yard, the location of which has not yet been decided upon. Mr. Childers states that on account of the expected demand it was decided to start their first kiln much earlier than usual this year. They have never begun making brick before July in the past, but as the orders are coming in, they will take advantage of the favorable weather and get ready to supply the demand.

Mapping the Air Currents

SEATTLE, Wash., April 15.—The balloon and airship have suggested, in keeping with aeronautical progress, that there is a possibility of mapping the air currents, and an attempt to do so is about to be made by Capt. Thomas S. Baldwin, famous balloon expert.

Since the very latest types of the airship and the big modern gas bags are to be exhibited at the Alaska Yukon-Pacific Exposition at Seattle this summer, and numerous flights and tests will be made, Capt. Baldwin, to further demonstrate that to manage a balloon in long flights, is one of the greatest scientific problems of the day, proposes to make a balloon flight from Seattle to Boston.

This is the longest balloon trip ever talked about, and if attempted will be the greatest in history. While the date for the start has not as yet been set, it is expected that Capt. Baldwin will leave the exposition grounds during the coming summer, at a time when atmospheric conditions are right.

Capt. Baldwin will take this hazardous voyage through space not because he is in search of adventure, but because there is scientific purpose back of it all. H. Helm Clayton of the Blue Hill Observatory, one of the most noted students of atmospheric conditions in the world, is behind the proposed Baldwin ballooning expedition from Seattle to Boston.

Clayton, by the use of kites and the modern meteorological instruments, has fetched just enough knowledge concerning that mysterious space overhead to the earth below to venture the opinion that at an elevation of about 15,000 feet there is always a steady wind from the westward. Now Clayton further believes that should a balloon be kept constantly at this, or even a higher elevation, the great bag would enjoy the full power of this steady wind and should, if all theories pertaining to ballooning prove true, traverse the continent rapidly. Again, if these same atmospheric conditions were exactly right at the time, Capt. Baldwin will land his balloon on Boston Common within four days after departing from the Seattle Exposition.

Flying through the air at a rate of speed yet to be attained by the fast express trains would no doubt be a nerve-racking experience, but Capt. Baldwin believes that the men who will write the scientific progress made in the study of the airship and balloon will have several pages to add if the balloon trip across the continent should prove a success. En route Capt. Baldwin proposes to make meteorological observations and to map the currents of the air. This would prove as a guide to the future voyagers along the same lines.

WRECK ON THE ALTURAS ROAD

SERIOUS DELAY OF TRAFFIC IS CAUSED BY BROKEN RAIL.

Freight Cars Are Dumped Into the Ditch On Narrow Gauge Road—No Injuries Reported To the Passengers, Except a Shake Up.

RENO, Nev., April 15.—The mail train from Superior California points on the Nevada-California-Oregon railroad, due here Tuesday evening, did not arrive until yesterday morning, as a result of a wreck of a north-bound mail and passenger train on the road Tuesday afternoon at a point called Summit. The wreck was caused by a broken rail, and several cars loaded with perishable freight were rolled into the ditch. The mail and passenger cars left the track but did not turn over. All of the passengers received a severe shaking up, but all escaped serious injury. So bad was the wreck that it was necessary to build a track around it for the south-bound mail train arriving here yesterday morning.

Oregon Water Code Is Best

SALEM, Or., April 15.—After a visit to Wyoming and Utah of a week to examine the workings of the water laws in those states with F. M. Saxton, Water Commissioner, State Engineer Lewis has returned to Salem. He pronounces the new water code of this state better by far than any law in this country.

Wyoming has a law similar to the Oregon law, except that the water board in Wyoming is the final tribunal in the adjudication of water rights, while in this state the findings of the water board must be affirmed by the courts before they are final. Should the circuit court fail to affirm them they will, of course, in time become operative automatically.

Clear the Way For Railroad

Reclamation Engineers Believe That Favorable Action Will Be Taken On Their Recommendations For the Deschutes Road.

PORTLAND, April 15.—Report of the local engineers of the United States Reclamation Service agent the Deschutes railroad project reached Washington, and D. C. Henny and E. P. Hopsen, the supervising engineers who prepared the report, are confident that favorable action will be taken upon their recommendations within a week. They will, however, not reveal anything of the details of the recommendations made, but in all human probability the Government will not put any obstacles in the way of the early construction of the Harriman road from the mouth of the Deschutes to Bend.

It is anticipated that the Secretary of the Interior, to whom the report has gone forward, will not only approve the Harriman maps, but the locations of the Oregon Trunk. This will throw the whole matter into the courts. The courts must then decide the question of propriety of rights where locations conflict, and it is expected that the Harriman people will be able to sweep all barriers aside by the show of good faith already made in the way of expensive and extensive engineering work which has been done on the project up the Deschutes Canyon.

A chance to get a lot to build a home on. No better residence lots in Klamath Falls than First Addition near the high school. Hall-Shepherd Co.

Spring vetch and seed oats at Oliver's.

Make Paper of Fir Stumps

A New Chemical Discovery Will Be Tested At Coos Bay For Making Wood Pulp From Oregon Fir and Waste Products.

SAN FRANCISCO, April 15.—A postal card sent to the Immigration Inspectors at Douglas, on the border between Washington and British Columbia, joshing them on their lack of skill, has indirectly been responsible for the order to report an Oregon woman from the United States. Mrs. Norah Loat, formerly of Lake county, Oregon, is the woman, and the tale behind the little tragedy is an interesting one.

Mrs. Loat was married in Vancouver, B. C., to an Englishman, and shortly afterwards left that city with her husband, who was under contract to go to work in California. Immigration officers stopped the couple and refused them admission to the United States under the contract labor law. In spite of this, however, the two stole across the line, and eventually landed at their destination. In a spirit of fun they wrote a postal to the inspectors, telling them that they had eluded their vigilance.

This was more than the dignity of the guardians of the border could stand, and they gave chase to the pair, finally landed them in the federal jail at Alameda. The Department holds that Mrs. Loat expatriated herself in marrying Loat, and ordered her deported with her husband.

Band Concert Next Sunday

The Klamath Falls Military Band will give its first out-door concert at 3 o'clock Sunday afternoon. Director Daniels states that the people do not want to expect too much from the boys at their opening concert, but that they will do their best. The band is composed of twenty pieces. If the enthusiasm among the band can be kept up, it is possible that free concerts will be given during the summer, but as the members all donate their services, it is sometimes a difficult matter to get them all to attend regularly. The concert on Sunday will be given in the court house park.

Why buy property and pay what it will be worth three years from now? Buy First Addition lots at fifty per cent of their actual present value—then you can't lose. Hall-Shepherd Co.

\$5.00 will buy \$10.00 worth of goods at the Boston Store.

MILLION FOR CRATER LAKE

MEDFORD COMMERCIAL CLUB ADOPTS A MEMORIAL TO CONGRESS.

Ask Big Appropriation For Improvement of National Park—Invite President Taft and Secretary Ballinger to Visit This State.

MEDFORD, April 15.—At a meeting of the Medford Commercial Club held Tuesday evening memorials to Congress were adopted asking the appropriation of \$1,000,000 for Crater Lake park improvements, and a \$100,000 appropriation for a new federal building for Medford, to be used for postoffice, federal court and other federal purposes. Invitations were sent to President Taft and Secretary Ballinger to visit Medford and Crater Lake during their western tour this summer. A committee was appointed to ascertain what could be done in securing a site for a five-story hotel to be erected here by A. Ostrander of Chicago. The club adjourned to meet Tuesday to hear the report of the special finance committee appointed to raise a publicity fund.

Mr. Ostrander stated that he was prepared to erect a modern five-story hotel if a site could be furnished, but had not investigated construction prices here, so could not make a definite proposition. The committee will meet with him to ascertain details.

Mrs. Flora Jackson, who has been visiting her father, Dr. Ellsworth, for the past three weeks, returned today to her home in Wichita, Kan.

D. B. Campbell announces nine lots sold in Midland yesterday. Two four-horse loads of investors were taken to view the property today.

The Kerlew launch has been transferred from John Griffith to W. H. Clark and H. E. Calkins. A regular daily trip service will soon be inaugurated.

Mr. Uel Bussey, who has been in the high school the past winter, opened a term of school at Wampus on Monday.

Fence posts for sale. Call at City Bakery. 13-6t

We have said and we still maintain that First Addition lots at our prices are the best investment ever offered in Klamath Falls. Hall-Shepherd Co.

Ripley & Co., the new grocers now occupying the store next to the bowling alley, carry a fine stock of package goods. Every article is new and sold at prices that are sure to please you. It will pay you to stop in and see what we have, get our prices. You are welcome whether you buy or not. 13-3t

Snappy Clothes

There's plenty of "go" in the clothes made to your individual measure by

Strauss Brothers,
Master Tailors, Chicago.

The vim and snap are due to two things—the pattern of the cloth and the style cut and sewed into the clothes. Just drop around to our store and look over our extensive collection of the season's most artistic weaves. You'll be welcome whether you order or not.
