

PETITION.
 In the County Court of the State of Oregon, for Klamath County.
 In the Matter of the Application to Adopt Baby Eaton, a minor child.
 To the Honorable J. B. Griffith, Judge of said Court:
 Your petitioners, W. P. Rhoads and Mattie E. Rhoads, respectfully represent:

1. That your petitioners are husband and wife, reside in the State of Oregon, and reside at Merrill, in said Klamath County.
2. That they have in their possession a female child of the age of eight months, and that said child is the illegitimate off-spring of Iva Eaton; that the said mother is a non-resident of the State of Oregon, and that said child is wholly without parental care and protection.
3. That your petitioners are competent, able and willing to support, educate, train and properly care for and bring up said child.

WHEREFORE your petitioners pray a decree of the Honorable Court:

1. That said child be, to all legal intents and purposes, the child of the petitioners.
2. That the name of said child be changed to Iva Willa Rhoads, and that a certificate of such change be granted.

W. P. RHOADS,
 MATTIE E. RHOADS,
 Petitioners.

Subscribed and sworn to before me this 1st day of May, 1909.
 E. E. FITCH,
 Notary Public for Oregon.

Rough on the Parents.
 If a schoolboy is caught smoking, more than once by the police in New York on Duin, Russia, his parents are liable to be exiled to Yakutsk, northern Siberia.
Bamboo in China.
 The greatest blessing to the masses of natural productions that exists in China is the bamboo. To recite the different uses to which it is put would cover reams of paper. Over sixty varieties of bamboo exist, and it can be properly termed the national plant. It is applied to domestic, commercial and industrial uses.
Liberia's Rubber Trees.
 The negro republic of Liberia has twenty-two species of rubber trees.
Ermine and Rank.
 In England a baron's robe has two rows of ermine, that of a viscount two and half rows; an earl's has three rows, a marquise three and a half and a duke's robe four complete rows.
French Trials.
 French judges never "sum up," because if it supposed that their remarks would confuse the jury.

Knots and Miles.
 In considering the speed of a steamship it must be remembered that a knot, or nautical mile, is a very different thing from a land mile. A mile is 5,280 feet, while a knot is 6,080 feet and a fraction. Therefore when a vessel makes 23.05 knots an hour she passes over very nearly twenty-seven land miles.
Graphite.
 Graphite, of which lead pencils are made, was first discovered in Siberia in 1842.
Rain at the Equator.
 A little north of the equator a great belt of clouds 300 miles in breadth surrounds the earth. Within this belt rain almost incessantly falls, sometimes in sheets, and the wind seldom stills.

 The officials of Korea wear upon their hats the figures of various birds and animals.
The Petroleum Industry.
 In 1846 the late Lord Playfair suggested the petroleum industry and afterward that of paraffin candles and induced his friend James Young to establish a manufactory for both.

The Ears.
 The right ear is generally larger than the left.
Spectacles.
 When spectacles first came into use in Italy about the year 1285 on the recommendation of a monk of Pisa women were forbidden to wear them, because it was thought such facial ornamentation would make them vain.
Cools His Temper.
 Under the laws of China the man who loses his temper in a discussion is sent to jail for five days to cool down.
Father of Electricity.
 The first step along the way of electricity was made by the celebrated Galvani, who just before the beginning of the last century demonstrated that electricity could be produced by the contact of metals and fluids. Galvani's experiments suggested to Volta in 1800 the electric battery, out of which have come all the other electrical triumphs.

Cuba.
 Cuba is about 175 miles long, from 30 to 120 miles wide and has an area of 40,000 square miles. In area the island republic and the state of New York are about the same. Its soil, as a general thing, is extremely rich.
The Umbrella Tree.
 A curious tree grows in one of the numerous islands which are studied about the Pacific ocean. It grows at its full height to nearly thirty feet, with branches spreading like a huge umbrella, yet it is completely leafless, the species having never been known to show signs of a single bud. Its sap is useful as a medicine, but as fuel the wood is worse than useless, being as hard as iron and quite as difficult to burn.

The Canary in China.
 When a Chinaman takes a walk he likes to take along a cage with a canary bird, hang it up on a tree and listen to the song which the surrounding things inspire.
When Wedding Veils Began.
 Wedding veils owe their origin to the old Anglo-Saxon custom of holding a square piece of cloth over the heads of bride and bridegroom while they were being married. This was done by two tall men, each holding an end, and was intended to hide the blushes of the fair bride. Widows were not so honored.
Tissue Paper.
 Tissue paper is so called from the fact it was put to when it was originally made, which was to place between gold or silver tissue cloth to prevent its tarnishing when folded.

The Yak of Tibet.
 The yak's chief habitat is Tibet and the adjacent parts of central Asia. Its hair is long and covers in fringed style its backs and shoulders. The yak rug is a notable article of commerce. Yak milk is one of the chief articles of diet in Tibet. The yak does not like heat at all and is found in the summer season as high as 20,000 feet above the sea level. In Tibet it is both a wild and domesticated animal.
The Human Body.
 Each ear has four bones.
 The lower limbs contain thirty bones each.
 The human body contains over 2,000 miles of tubing.
 In three faces out of five the eyes are out of alignment.
 The bones of an average male skeleton weigh twenty pounds, while those of a female are about six pounds lighter.

Woman's World.
 Six married women have been admitted to the bar in New York city.
 The national suffrage convention for 1909 will be held at the Alaska-Yukon-Pacific exposition in the first week in July. One day of this week will be observed as women's day.
 Patents for inventions relating to typing machines have been applied for by British women, and they have also directed inventive attention to railroad cars and to wireless telegraphy.
